## Gold Charts R Us

●●●● GCRU #488 on March 28<sup>th</sup>, 2012 (in its 11<sup>th</sup> year)

### MARKETS ADDICTED TO THE FED

Gold is looking a lot better.

In fact, all of the markets got a boost of optimism this week when **Bernanke strongly suggested that loose monetary policy is set to continue.** His comments also reinforced expectations that interest rates will be kept low.

Gold jumped up in heavy trading as buyers bought up gold on **fears of inflation** downstream and economic uncertainty.

His speech also boosted global growth expectations, which in turn pushed up the stock markets, as well as the commodity and currency markets. The Fed is obviously set to continue being the lender of last resort, which is keeping the markets bullish.

The election is also a big influence this year and by keeping a recession at bay, the Fed will probably stay active at least until then.

**This is not a good sign for the dollar.**

The high oil price, however, is a thorn in Bernanke's side. Increasing concerns about global supply is keeping oil firm while the

likelihood of a release of strategic oil reserves is keeping a potential lid on the price.

**Crude is sensitive to world events and this will continue to be the wild card.**

Gold and black gold are the sensitive markets in the current environment, as they react to uncertainty... both economic and geo-political.

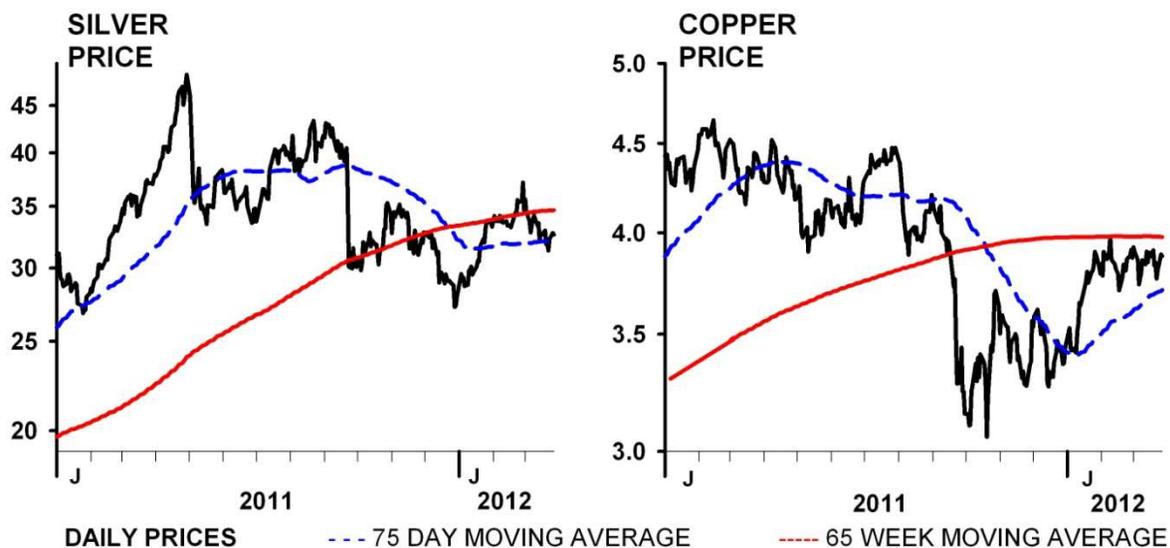

**But silver and copper together also tell us a lot.**

They are an interesting combo now and they'll soon tell us the story. Note on the chart that these two markets are resisting below their 65 week moving averages, in spite of the bounce up this year.

**Silver and copper are in the same technical situation.....**both are firm above their 75 day MAs, but their bigger hurdles to overcome are the 65 week MAs. Keep an eye on these levels as breaks above \$34.75 on silver and \$3.98 on copper would be bullish and it would show impressive strength!

This would then be a market signal that the global economy is indeed looking better.

### IN SIMILAR SITUATION, WATCH 65 WEEK MOVING AVERAGE

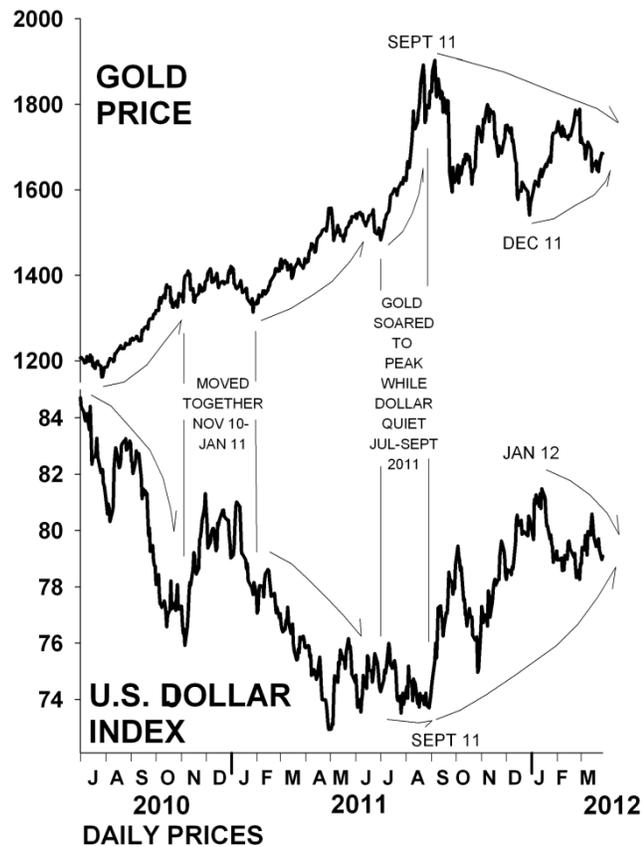

**The gold price and the dollar index are another indication.**

They tend to move in opposite directions because gold is the ultimate currency and the dollar is the reserve currency of the world.

With gold now bouncing up while the dollar index slips back, it could be the start of a continuation of the gold rise and dollar decline that started this year.

There are times that gold and the dollar move together, as you can see on the chart. Most interesting was the July to September 2011 period. **The dollar sat quietly above the 2011 lows while gold soared to record highs.** This situation showed the dollar's strength and it tends to lead a rise in the dollar.

**GOLD AND THE DOLLAR:  
MOVE OPPOSITE**

**And in fact, this rise is still ongoing.** It's now to be seen which will overpower. Will the September 2011 rise in the dollar and the decline in gold continue? Or is this year's change in trend, up for gold and down for the dollar, set to continue for 2012?

**Our indicators are clear and our positions are set....we are ready for the ride.**

**CHART TALK**

**Bottoms up!**

Gold, silver and their shares have bottomed. Most of our recommended gold shares have bottomed at important support levels while forming downside wedges.

During the past week the common thread has been that most of our positions have **broken out of their downside wedges confirming the upside potential** we've been mentioning.

Talk and speculation of more easy money is moving the markets across the board. With unemployment levels still high and half way through an election year, the government will do anything and everything in its power to make things look good.

**The timing could not be better for gold, silver and their shares.**

Gold took a dive during late February when Big Ben came out to say that no more stimulus was needed and the economy was showing signs of a recovery. However, the high unemployment numbers were haunting.

From a technical perspective, we've had a nice chance to buy some gold at the lower levels, and it couldn't be in a better position. Despite weakness, gold held firmly above its 65 wk MA, which shows us a solid major uptrend. **Gold's 65 wk MA is just below \$1600 and just below our recent buying area.**

Moreover, all of our indicators are showing us that gold is ready to rise as it reached oversold levels, and it has bottomed near the \$1650 level.

On Monday, gold jumped and broke above its 75 day MA (\$1675) and has stayed above it for now. If gold breaks above its 25 day MA near \$1700 and stays above it, we'll see renewed strength that could take gold to test its resistance at \$1800. **A break above this resistance will put gold into a stronger phase and a rise into new highs would be very likely.**

In the meantime, we've been recommending buying gold on weakness and you should be well invested by now. If you haven't or just subscribed, wait for the dips and weakness to buy.

**Gold shares: super sale about over!**

We've been seeing that gold shares are poised to outperform gold for some time now. Gold shares have been basing within a mega downside wedge and poised for a break upwards! **Buying at current levels means we're getting gold shares at bargain prices.**

Our in house Adv/Dec Line is showing gold shares ready to bounce up. If their resistance levels are broken, we could see renewed strength that would take gold shares to test old highs. We'll be taking profits as we go along.

**Silver continues to hold strong, but...**

Silver continues to resist below its 65 wk MA. Even though silver has held above its 75 day MA near \$32 (for the most part), it's yet to break above its 65 wk MA, which could be perceived by the market as a sign of weakness.

In the meantime, however, silver looks good and has held strong at current levels. If another QE is passed, you can be sure that silver will benefit as well and rise above this resistance.

**SILVER SHARES: STILL POISED TO CATCH UP**

**Silver shares have been lagging.** Despite the fact that they follow silver, silver has been outperforming its shares. However, the shares have reached a bottom versus silver and are poised to rise.

As you can see on the ratio, a downside wedge is forming, showing that silver shares are poised to outperform silver.

**SILVER SHARES COMPARED TO SILVER**

This is likely to occur when both the stock market and the commodities rise, which would cause gold and silver shares to outperform their metal. **The stage is set and you should be heavily invested to take advantage of this unique opportunity.**

**So, what does this tell us?**

- 1) Keep your gold and silver. Buy more gold if it dips to the \$1650 level or lower and silver if it dips below \$32.
- 2) Keep your gold shares. Buy more while they're cheap. Look at our recommended stocks and entry levels as a guide.
- 3) Gamblers buy a bit of S&P500 at mkt.

The events surrounding the markets are fascinating which is why this week we've decided to have a long edition as opposed to a short one. Next week, we'll have our shorter version to follow up on the events. We'll be sending out alerts, of course, if any of our stops or profit targets are hit.

# GOLD, SILVER & INDICES

GOLD APR 2012 (GCJ12) 3/27/12 CLOSE = 1684.9

SPINNER (3, 16, 16)

Open trades:	Long at:	Entry level: 1640 (Oct-18-11), 1710 (Oct-26-11), 1750 (Nov-10-11), 1725 (Nov-17-11), 1600 (Dec-14-11) and 1595 (Dec-27-11), 1650 (Mar-15 & 21-12) and 1640 (Mar-22-12).
	Stop:	All: 3 dc below 1600.
	Profit targets:	1800, 1900, 2000 &/or 2200.

New Recom: **Keep your positions. Sell a third at 1800.**

Comment: Breakout! Gold broke above its 75 day MA on strong volume but resisting below its 25 day MA, the 1700 level. However, if gold breaks above 1700 on higher-than-average volume, we'll see renewed strength and a rally to test its next support near 1800 is possible. Spinner is rising from a double bottom breaking clearly above its MT MA, showing lots of strength. On the downside 1600 is an important support as its converging with its 65 wk MA. A clear break below 1600 would show a reversal in trend and it could signal the beginning of more bearish action. Keep your positions and sell some if and when gold reaches its next resistance, the 1800 level.

**SILVER MAY 2012 (SIK12) 3/27/12 CLOSE= 32.616**

Open trades:	Long at:	Entry Level: 29.65 (Sept-28-11), 29 (Oct-4-11), 29.95 (Oct-20-11), 31 (Nov-25-11 & Dec-12-11), 28.75 (Dec-14-11), 28.80 (Dec-27-11) and 27 (Dec-27 & 29-11). <b>Sold a fourth at \$33 and another fourth at \$36 for a profit.</b>
	Stop:	ST & MT: 2dc below 27.
	Profit targets:	35, 38 &/or 42 (adjusted)

**New Recom: Keep the second half of your position. Buy again below \$32.**

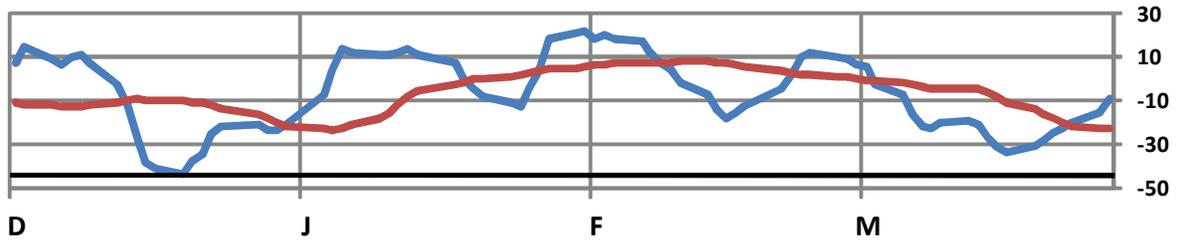

**Comment:** Holding its ground. Silver was able to hold firmly at its 75 day MA (32 level) forming an adjusted Dec uptrend with a solid base at 32. Silver is currently near the bottom side of its adjusted upchannel while Spinner is rising from an oversold area. Keep an eye on 34.75 (65 wk MA) as a break above this level would show us extreme bullish action. Lots of upside potential with limited downside risk. Look to buy again if silver dips below 32. On the downside, silver has strong resistance below 34.75. If silver continues to resist below this level, it'll likely go on to test its support at 32. A clear break below its 75 day MA (32) on a 3dc would show weakness and vulnerability and a decline to its next support near 29 would then be likely.

**HUI GOLD BUGS INDEX (HUI) 3/27/12 CLOSE= 475.34**

SPINNER (3, 16, 16)

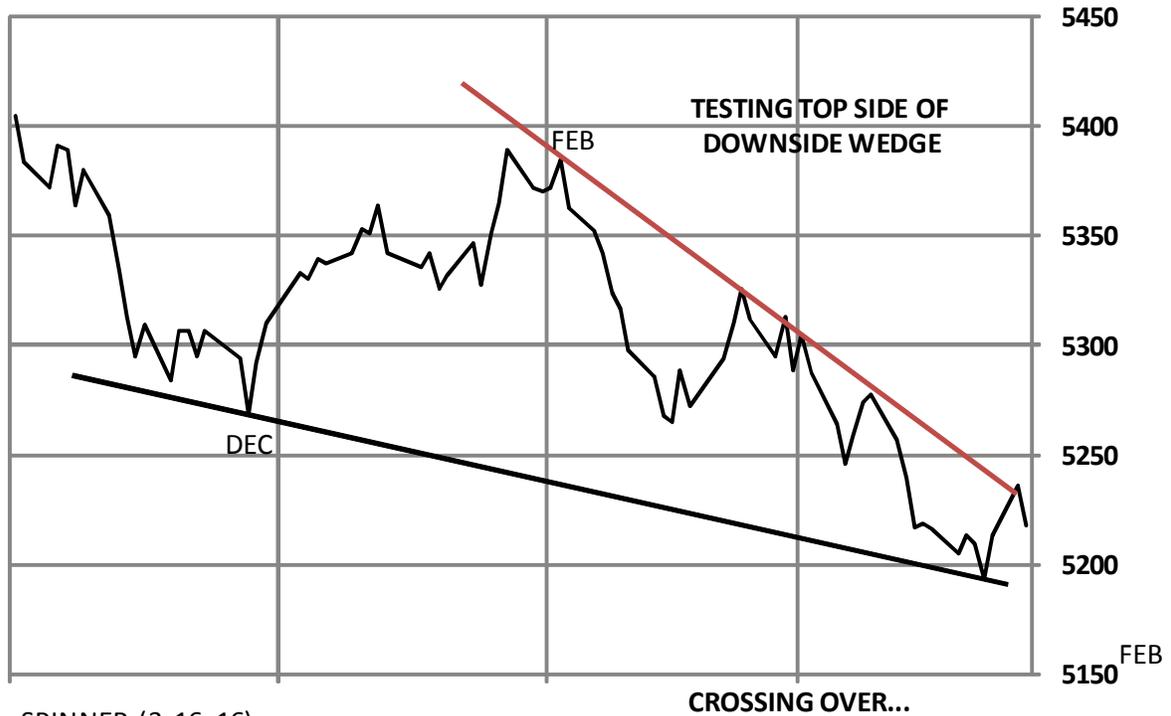

CROSSING ABOVE MT MA

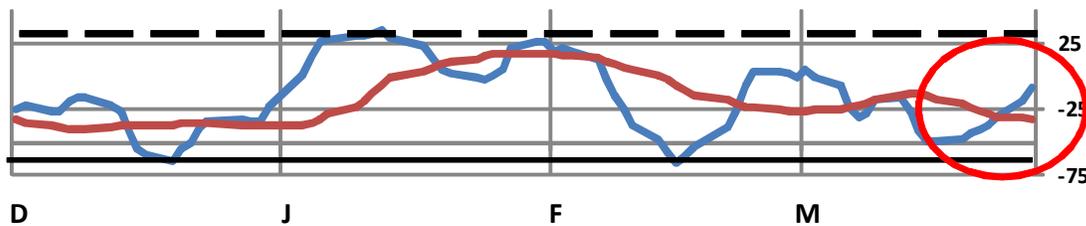

Comment:

HUI has formed a bottom above the 460 level and has started to rise, breaking above the downside wedge. Spinner has bottomed at an oversold area and started to rise, breaking above its MT MA showing lots of upside potential. If HUI can break above 500 on a 2dc, we could see it continue rising to test its next resistance at the 550 level. The 550 level happens to be HUI's 65 wk MA as well as the Jan/Feb highs. A break above this level would be extremely bullish and a rise to the 600 level would then be likely. On the downside, keep an eye on 460, as a clear break below it on a 2dc would confirm weakness and vulnerability.

**ADEN GOLD STOCKS ADV/DEC LINE 3/27/12 CLOSE=5218**

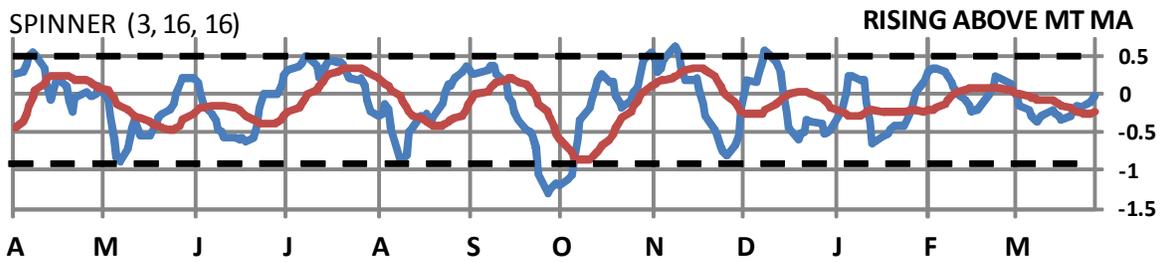

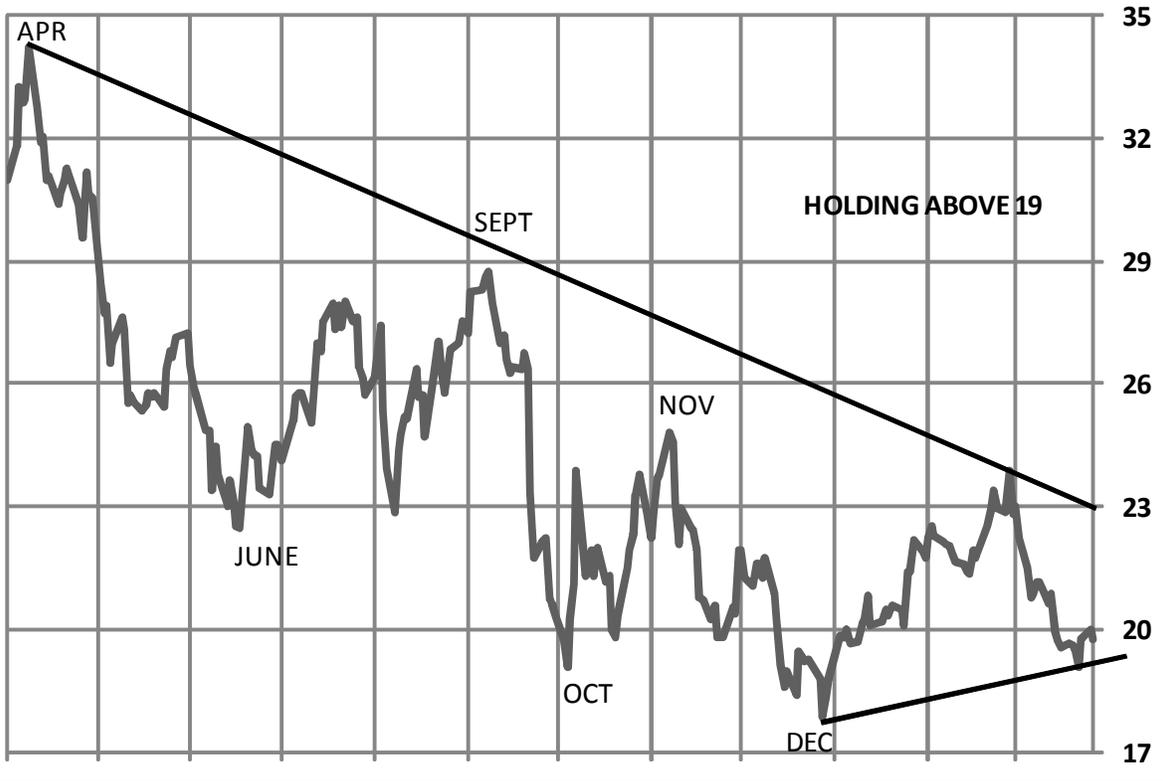

SPINNER (3, 16, 16)

Comment:

Our in house Adv/Dec Line has started to rise from its support level at the 5200 level, breaking above both its Feb downtrend line and downside wedge. Spinner bottomed and rising from an oversold area, breaking above its MT MA with lots of room to continue rising. A clear break above 5250 on a 2dc could push the Adv/Dec Line to its wedge target at 5350. All is showing more upside potential than downside risk at this moment. However, upside may be limited, so look to sell some on a rebound and keep the rest in case HUI breaks above 550 and the Adv/Dec Line above 5350. On the downside, keep an eye on 5200 as its an important intermediate support. A clear break below it on a 2dc would show us a bearish outlook for gold shares.

**ADEN SILVER SHARE INDEX (ASSI) 3/27/12 CLOSE= 19.766**

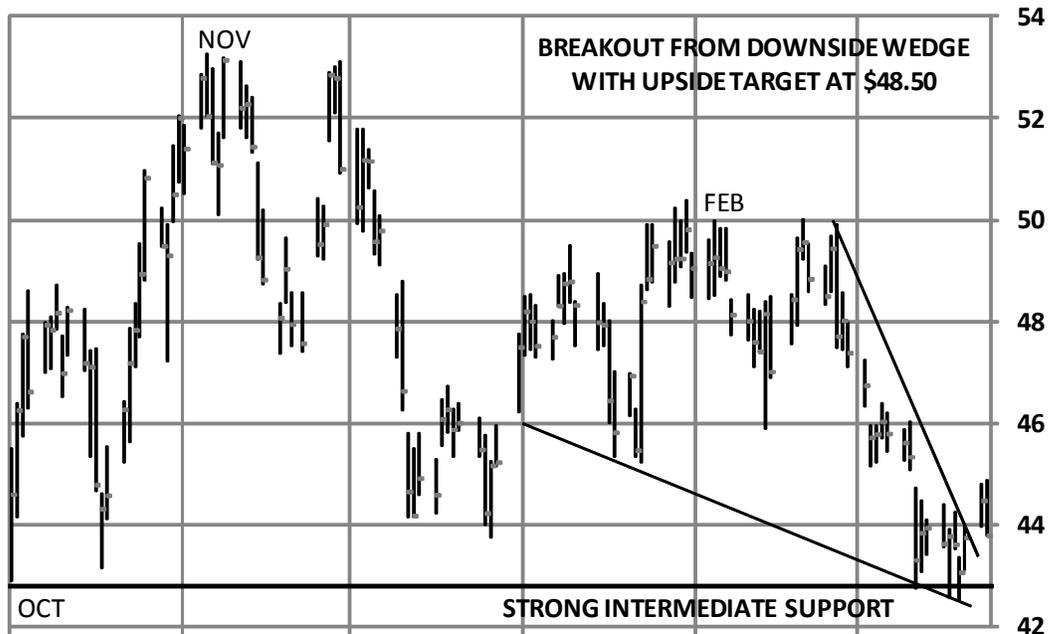

Comment:

ASSI has formed a bottom above 19 while Spinner rises and crosses above its MT MA, telling us that we'll see silver shares rise to test their April downtrend near 23. Keep in mind, however, that until silver shares break above the Apr downtrend, they're still vulnerable and may continue to decline. Keep an eye on the 19 level as a clear break below it on a 2dc would confirm weakness.

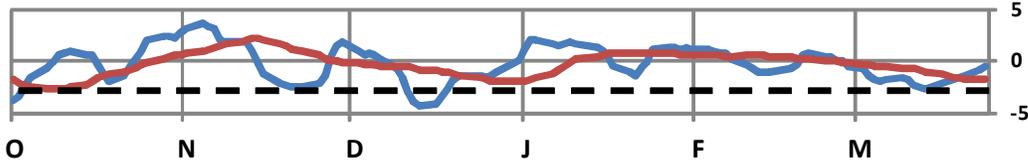

# STOCKS

**Barrick Gold Corp. (ABX) 3/27/12 CLOSE= 43.8 US\$**

SPINNER (3, 16, 16)

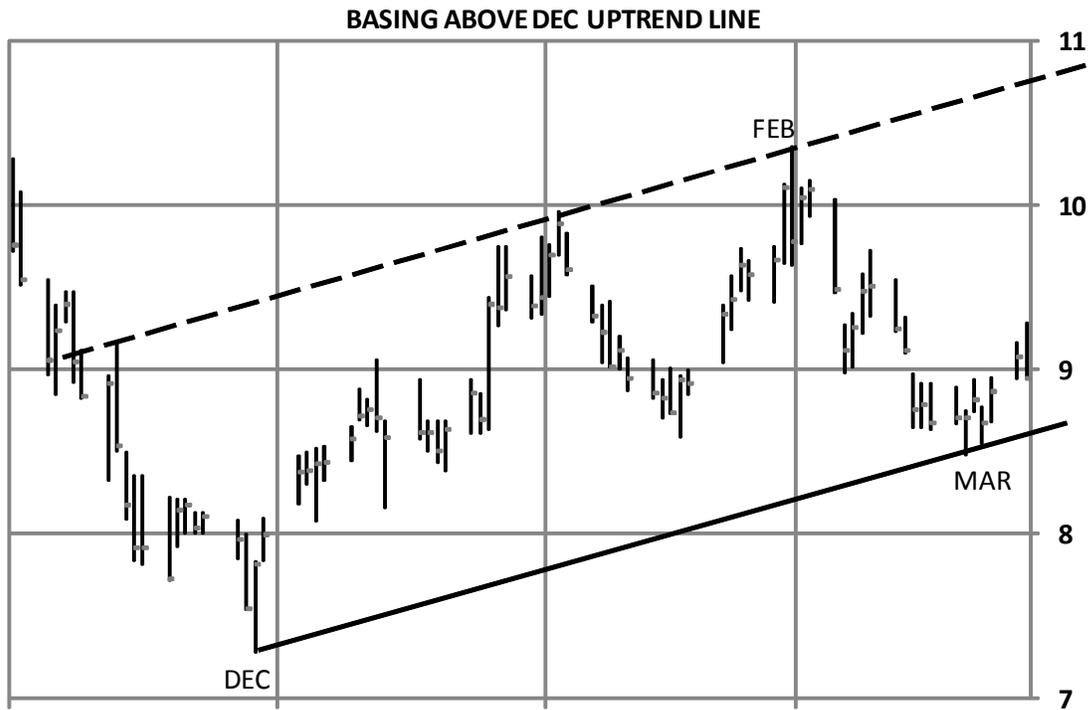

CROSS ABOVE MT MA

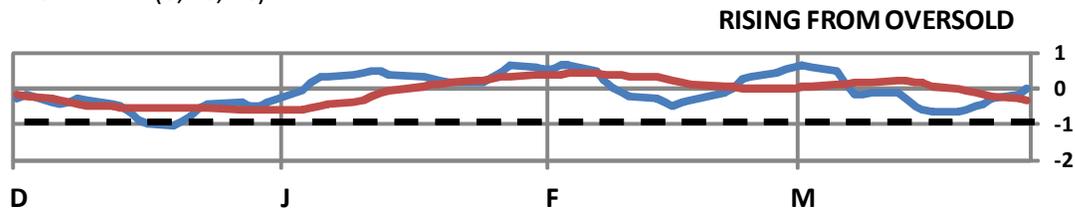

**Barrick Gold Corp. (NYSE:ABX). Also traded inTSX: ABX**

Open trades:	Long at:	43.65 (Mar-14-12), 43.50 (Mar-16 & 21-12)
	Stop:	2dc below 42.50
	Profit Target:	48.50 &/or 52
New Recom:	<b>Keep your positions. Buy more at or below 43.50.</b>	
Comment:	ABX held above its Oct low and has started to rise. Broke out from its downside wedge with an upside target of 48.50. Spinner above its MT MA with room to continue rising, showing lots of upside potential. Feb highs near 50 are an important resistance. ABX must break above it to see renewed strength. On the downside, a break below the Oct lows would show weakness and a further decline would then be likely.	

**Aurico Gold Inc (AUQ) 3/27/12 CLOSE= 8.96 US\$**

SPINNER (3, 16, 16)

**Aurico Gold Inc (NYSE:AUQ). Also traded inTSX- AUQ**

Open trades:	Long at:	9.60 (Feb-23-12), 8.80 (Mar-14-12), 8.70 (Mar-16-12) & 8.80 (Mar-21-12).
	Stop:	2dc below 7.50
	Profit Target:	11 &/or 12

New Recom: **Keep your positions.**

Comment: Broke back above its 75 day MA on a 2dc! Found support above 8.50, near the Mar lows and has resumed its rise, forming an adjusted Dec upchannel. Spinner has bottomed and rising from oversold levels, breaking above its MT MA showing a sign a strength. AUQ is resisting below its 25 day MA, at 9.30. If AUQ breaks above this level on a 2dc, we'll see renewed strength and a rise to the top side of the Dec upchannel would then be likely. However, if it continues to resist below its 25 day MA, we'll likely continue seeing weakness.

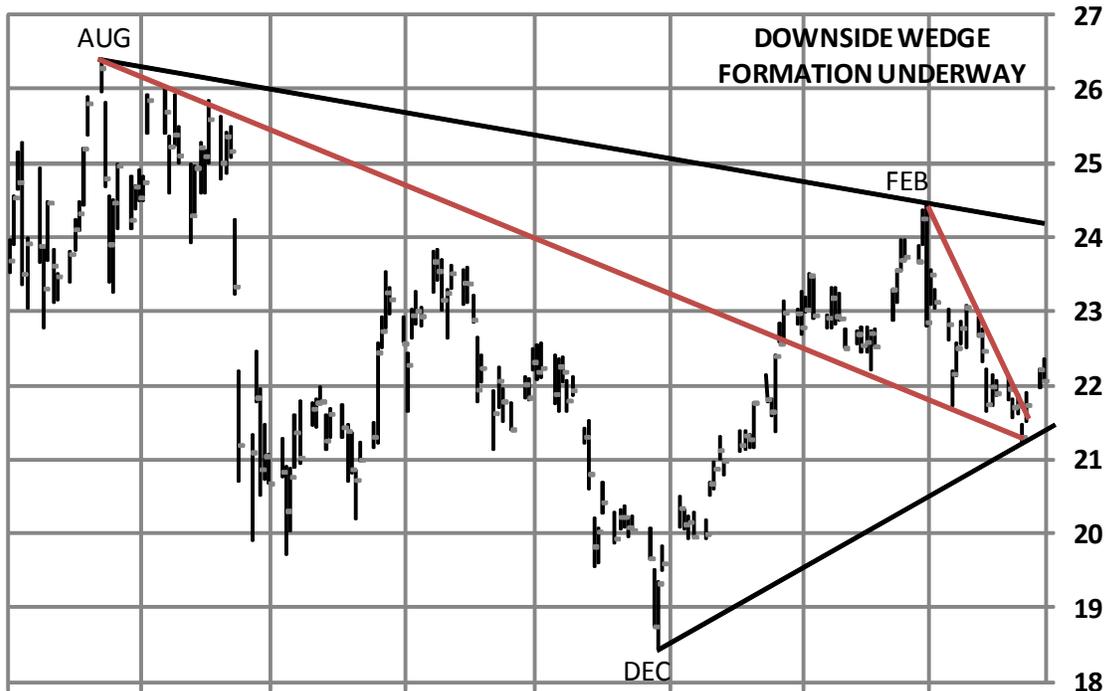

**YAMANA GOLD (AUY) 3/27/12 CLOSE= 15.85 US\$**

**Yamana Gold (NYSE:AUY). Also traded in TSX -YRI /LSE - YAU**

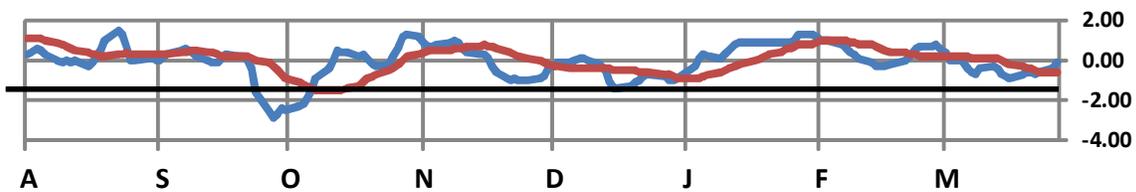

Open trades:	Long at:	Entry Level: 15 (Mar-20-12) & 15.65 (Mar-21-12)
	Stop:	S/T & M/T: 2dc below 13.50.
	Profit Target:	17.50 &/or 18.50.
New Recom:	<b>Keep your position. Buy more below 15.50. Sell half at each profit target.</b>	
Comment:	AUY rose from its intermediate support, the Oct uptrend line at the 15 level. Spinner is rising from oversold, breaking above its MT MA showing good upside potential for AUY. Moreover, AUY has strong resistance at its 75 day MA (16). If AUY can clearly break above this level on a 2dc it'll likely continue rising to the top side of the Oct upchannel. On the downside, if AUY continues to resist below its 75 day MA, we'll see weakness. If AUY breaks below its Oct uptrend line, it could then test its Dec lows near 14.	

**CENTRAL FUND OF CANADA (CEF) 3/27/12 CLOSE= 22.08 CAD\$**

SPINNER (3, 16, 16)

RISING FROM LOW AREA

**Central Fund of Canada (NYSE: CEF). Also traded in TSX: CDN\$: CEF.A & US\$: CEF.U**

Open Positions	Entry Level	21.90 (Mar-14 & 16-12) & 21.75 (Mar-21-12).
	Stop:	2dc below 20.
	Profit Target:	24 &/or 26
New Recom:	<b>Buy more below 21.90. Otherwise keep your position. Sell half at each profit target.</b>	
Comment:	Looking good! Broke above its downside wedge and its 75 day MA. Spinner has bottomed at a low area and has started to rise with room to rise further. All signs of good strength. Has strong support above 21. A break below this level on a 2dc would show weakness and a decline to the Dec lows near 18 would then be likely.	

**GOLDCORP (G.TO) 3/27/12 CLOSE= 44.86 CAD\$**

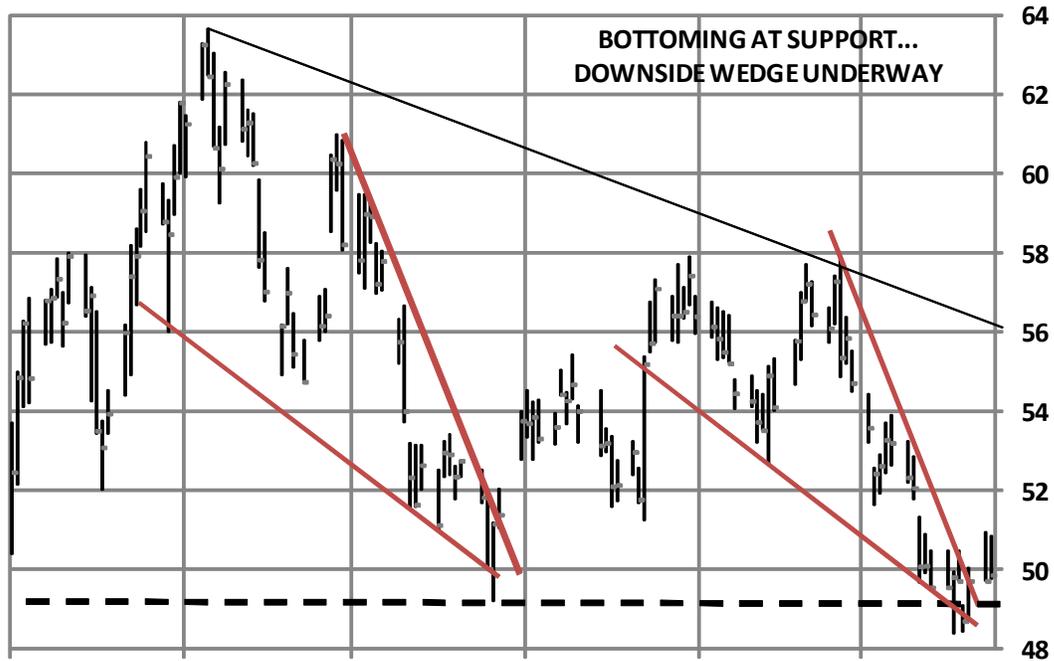

**GoldCorp (TSX: G) Also traded in NYSE: GG**

Open trades:	Long at:	Entry Level: 45.65 (Dec-22-11), 44.40 (Mar-14-12), 43.80 (Mar-16-12), 43 (Mar-20-12) & 43.75 (Mar-21-12). <b>Sold half of original position at 50.</b>
	Stop:	All: 2dc below 43
	Profit targets:	49 (adjusted) &/or 55 (adjusted).

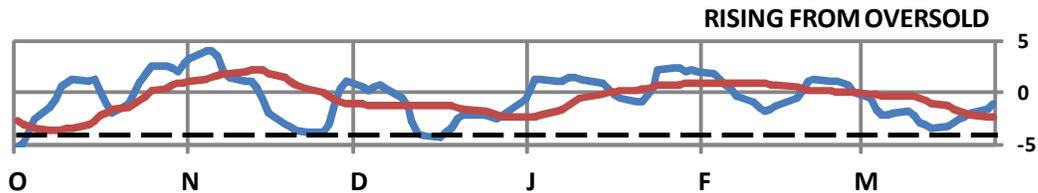

**New Recom: Keep your positions. Buy near below 43. Sell half at each profit target.**

**Comment:** G.TO has formed a bottom near a 52+ wk low and has started to rise as Spinner rises from oversold levels. Both are good signs, telling us there's lots of upside potential with limited downside risk. Keep an eye on 48, the Dec downtrend line, as its G.TO's first resistance. A break above this level on a 2dc could take it to test the top side of its 15+ mo upchannel. However, if G.TO is not able to break above it, it'll likely decline to the uptrend below 44.

**Gold Miners ETF (GDX) 3/27/12 CLOSE= 49.91 US\$**

SPINNER (3, 16, 16)

Open trades:

**Gold Miners ETF (NYSE:GDX)**

Open trades:	Long at:	57 (Feb-23-12), 50.85 (Mar-14-12), 50.25 (Mar-16-12) and 49.75 (Mar-22-12).
	Stop:	2dc below 48.50
	Profit Target:	56 (adjusted) & 61

New Recom: **Buy more below 50.**

Comment: GDX is looking better. It broke above its downside wedge after having formed a bottom near an important intermediate support. Also, the chart above shows a similar pattern. Moreover, Spinner has started to rise from oversold, telling us that GDX has good upside potential. Also, the chart above shows a similar pattern for GDX back in Nov 11 when it declined to its intermediate support while forming a downside wedge. At that moment GDX was also oversold and rose an approximate 15%. Continue buying GDX below 50 to take advantage of the opportunity or to average in a better price if you bought at a high level back in Feb.

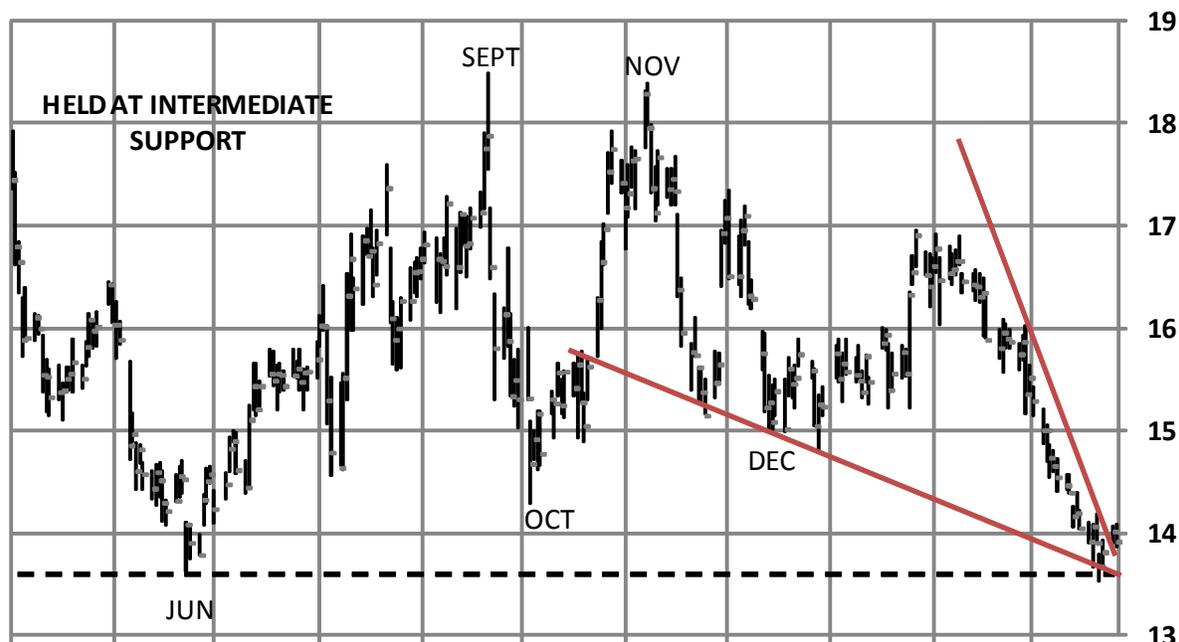

**MKT VECTORS JR. GOLD MINERS (GDXJ) 3/27/12 CLOSE= 24.89 US\$**

**Junior Gold Miners ETF (GDXJ)**

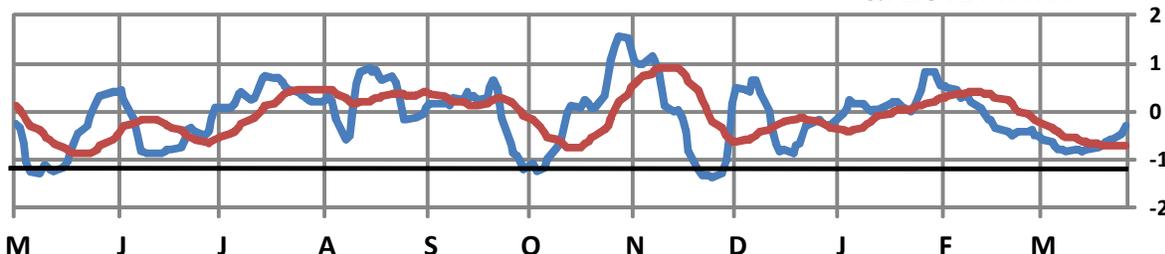

Open trades:	Long at:	Gamblers bought at 29.40 (Nov-30-11), 25.25 (Mar-14-12), 25.35 (Mar-16-12) and 24.25 (Mar-22-12) <b>Sold 2/3rds of original position at 26 and 30.</b>
	Stop:	ST & MT: 2dc below 23
	Profit targets:	28 &/or 30
New Recom:	<b>Buy more below 24.50. Sell half of position at each profit target.</b>	
Comment:	Similar action to GDX, as GDXJ breaks above its downside wedge. Downside wedge for GDXJ has an upside target of 28, which coincides with the Sept downtrend. If GDXJ breaks above 28 it'll show strength that could take it to test its next resistance level near 33. On the downside, the Dec upchannel at 24 is an important ST support. A break below this level would show weakness.	

## GOLD FIELDS Ltd. (GFI) 3/27/12 CLOSE= 13.93 US\$

SPINNER (3, 16, 16)

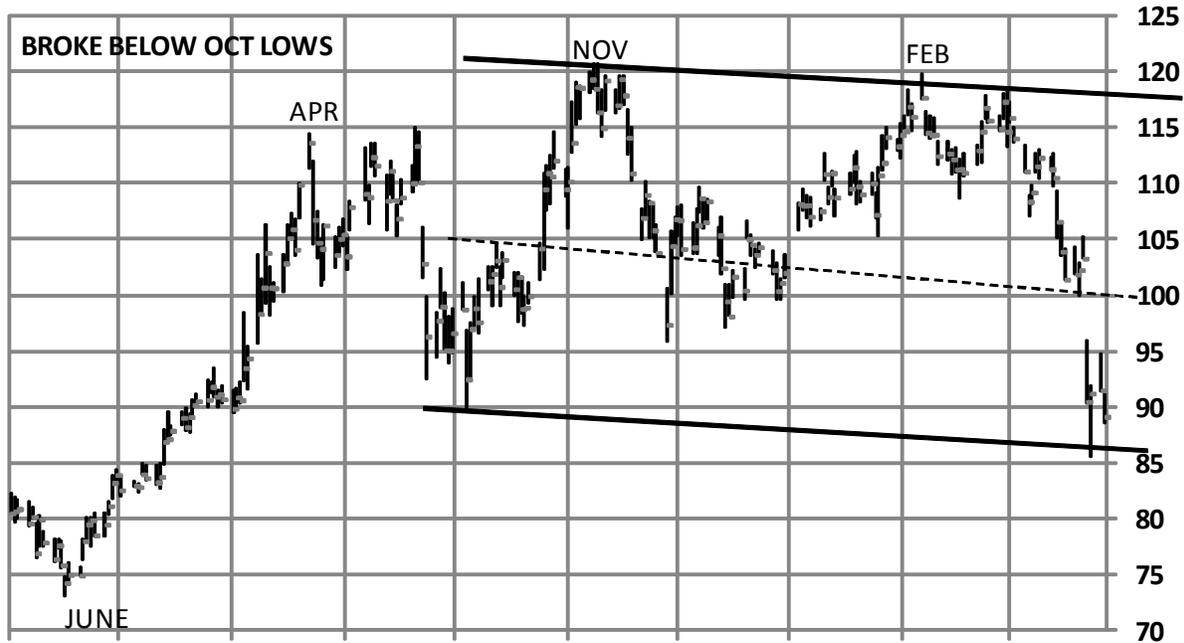

RISING FROM OVERSOLD  
& ABOVE MT MA

### Gold Fields Ltd. American Depos (NYSE/JSE: GFI). Also traded in SWX-GOLI

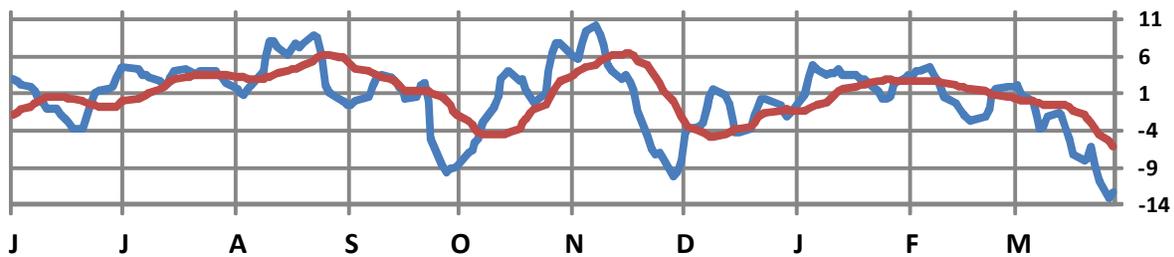

Open Positions	Entry Level	15.40 (Nov-23-11), 15.40 (Jan-19-12), 15.50 (Feb-29-12), 14.20 (Mar-14-12) and 14.10 (Mar-16-11). <b>Sold half at 17.15 for a 11% gain (Dec-11).</b>
	Stops:	ST & MT: 2dc below 13.65
	Profit Targets	16.50 &/or 17
New Recom:	Keep your positions. Sell half at first target level.	
Comment	Looks good. Held at June 11 low support and broke out of the downside wedge. Spinner has bottomed and has started to rise, breaking above its MT MA showing lots of upside potential. On the downside, the June lows are a crucial support level. A break below it would show bearish action and a clear sell signal.	

**RANDGOLD RESOURCES Ltd. (GOLD) 3/27/12 CLOSE= 89.26 US\$**

SPINNER (3, 16, 16)

EXTREME WEAKNESS

**Randgold Resources Limited (NASDAQ: GOLD). Also traded in LSE: RRS**

Open Positions	<b>Entry Level</b>	105.5 (Nov-30-11) <b>Sold half at 115 and half at 91.</b>
	<b>Stop</b>	ST & MT: 2dc below 96.
New Recom	<b>Stay out for now.</b>	
Comment:	Fell sharply on speculation that political unrest in Mali may adversely impact the mining operation of GOLD. Until political situation is resolved we recommend staying on the sidelines. Spinner at extreme lows suggesting a temporary bounce is possible.	

**NEW GOLD (NGD) 3/27/12 CLOSE= 9.690 US\$**

**New Gold Inc. (NYSE/AMEX:NGD) Also traded in TSX:NGD.CA**

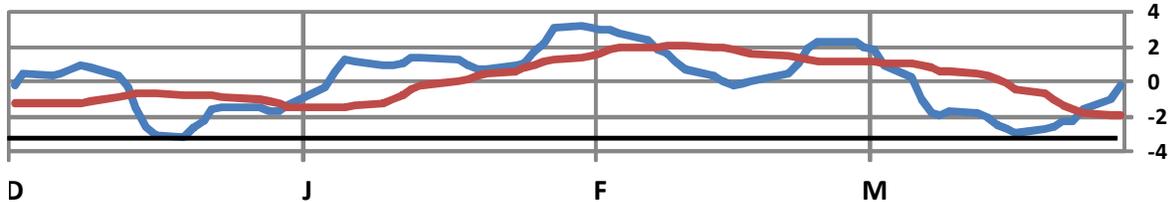

Open trades:	Long:	Entry Level: 9.60 (Mar-14 & 16-12) and 9.43 (Mar-21-12).
	Profit Target	11.50 &/or 12.50.
	Stop:	ST & MT: 2dc below 9.
New Recom:	<b>Buy more below 9.50.</b>	
Comment:	Breakout! Bottomed above 9 and has started to rise steadily. Spinner is rising from a double bottom at oversold levels, breaking above its MT MA showing strength. On the downside, keep an eye on 9, a clear break below it after a 2dc would confirm weakness. Sell position at the proffittargets.	

**SILVER WHEATON CORP (SLW) 3/27/12 CLOSE= 33.57 US\$**

SPINNER (3, 16, 16)

RISING FROM OVERSOLD

**Silver Wheaton (NYSE: SLW) Also traded in TSX:SLW**

Open trades:	Long at:	Entry Level: 34 (Mar-14-12), 33.25 (Mar-16-12) and 32.50 (Mar-21-12).
	Stop:	ST & MT: 2dc below 29.
	Profit targets:	39 (adjusted) & 42 (adjusted)
New Recom:	Keep your position. Buy more below 32.50.	
Comment:	Looking good. Formed a base at the bottom side of the funnel while forming a downside wedge with an upside target of 39. Spinner formed a bottom at oversold levels and is rising above its MT MA. On the downside, keep an eye on the 75 day MA (32) as a clear break below it would show vulnerability.	

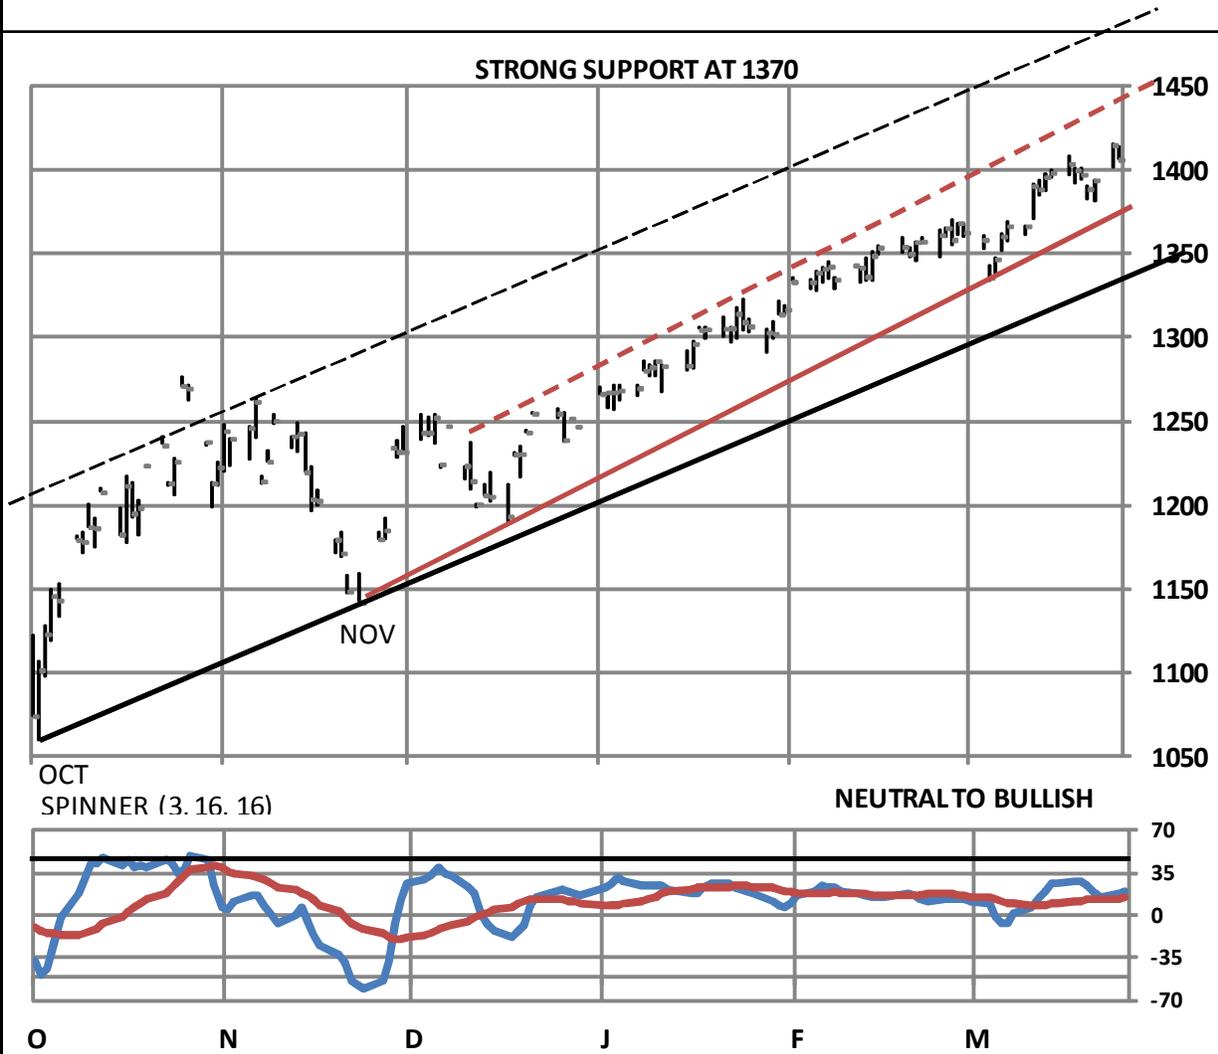

# FUTURES

**LIGHT CRUDE OIL APRIL 2012 (CLJ12) 3/27/12 CLOSE= 107.33**

New Recom:	<b>Buy after a decline that holds above 99 after a 2dc.</b>
Comment:	Crude continues to hold firmly above both its Oct uptrend line and is 75 day MA. Crude is currently resisting below the Feb highs at 110 but looks poised to continue rising. However, crude broke below its 25 day MA, showing first signs of weakness. Moreover, if crude continues to resist below this level, we'll likely see it decline to the mid to low 90s.

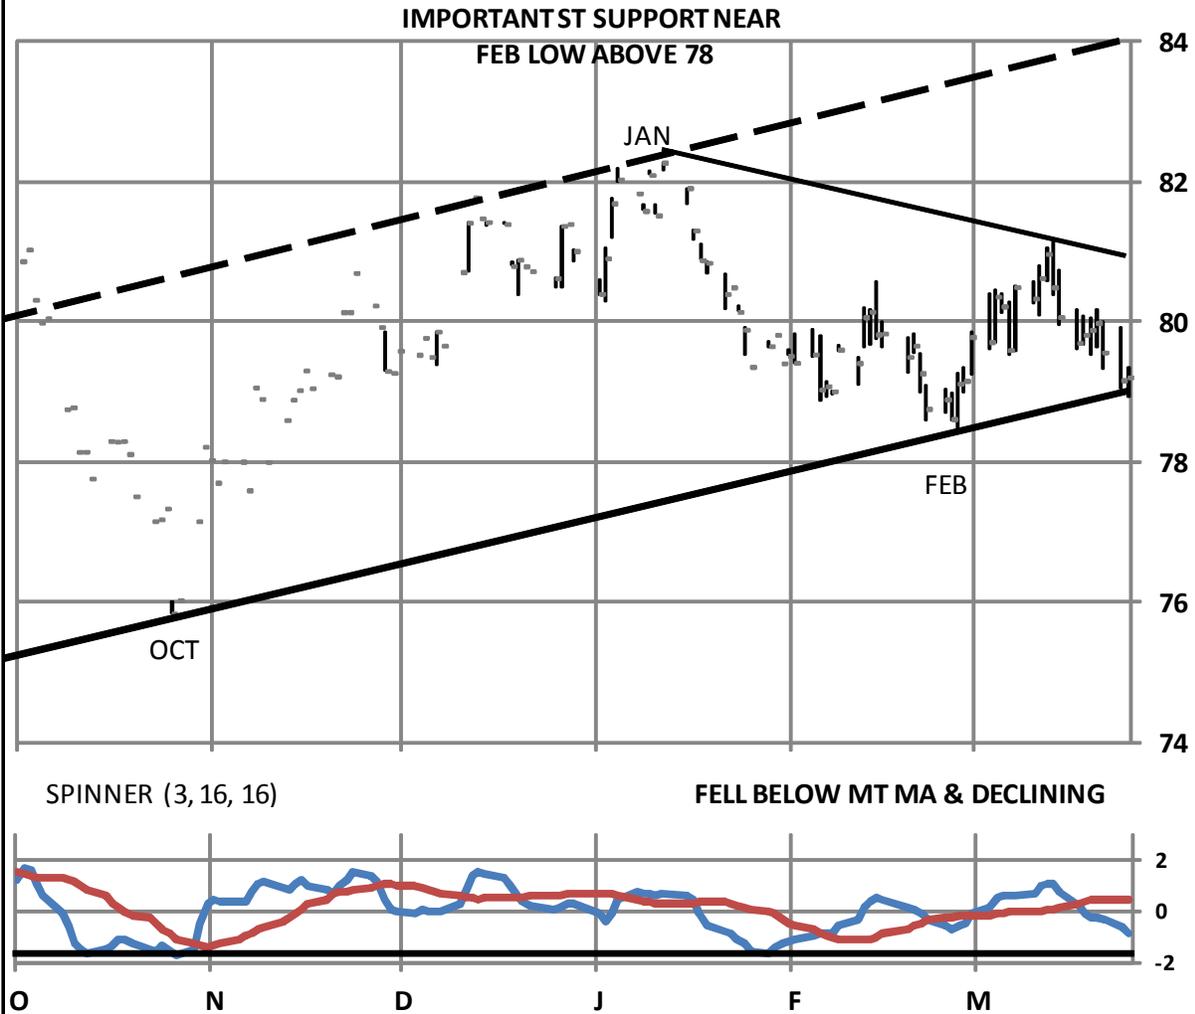

**S&P 500 INDEX JUN 2012 (SPM12) 3/27/12 CLOSE= 1406.4**

Comment:

Continues to rise to new highs! S&P 500 is moving firmly within the middle of the Oct upchannel as it holds above 1400. S&P500 is very strong above the 1320 to 1340 level, both its 75 day MA and its Oct upchannel. If the S&P holds above 1400 ST, it could rise to the top side of the Oct upchannel near 1500. On the downside, a break below its 75 day MA on a 2dc below 1320 would show weakness.

**U.S. DOLLAR INDEX JUN 2012 (DXM12) 3/27/12 CLOSE= 79.222**

Comment: US Dollar Index is holding at the bottom side of its Oct upchannel at 79. Spinner on the decline with room to decline further. If the Dollar Index can hold at its Oct uptrend and Feb low, while Spinner finds a bottom, we'll see an important sign of strength. A renewed rise to the top side of the Oct upchannel would then be likely, if the Jan downtrend is broken.

Quoting *GCRU* is permitted provided *GCRU* name, website address & subscription price are given.

All charts in *GCRU* are daily prices.

Fax subscribers please note this week's password to access *GCRU* daily edition via our website is: *(takingoff)*.

Subscribers can obtain free online chart updates for all gold shares in *GCRU* via: [www.bigcharts.com](http://www.bigcharts.com). To view Canadian stks please use CA as prefix (ie, to view Agnico Eagle (Toronto) you must use CA:AEM).

**Note:** U should NOT feel our recommended prices are set in concrete. If mkts suddenly feel hot or cold to U, or dramatic news occurs, U can buy or sell, or stop at slightly higher or slightly lower prices. It also hinges on your experience level. Some people can use our prices as guides & know when they can take bigger risks.

**Spinner:** Spinner is an in-house momentum indicator (not always shown on charts). Momentum indicators use the rate of change in price to determine predominant energy flows. Spinner trading signals are generated when the faster timing line crosses above or below the slower confirming line. Upside crosses in the lower range of positive territory offer the most reliable signals for longs; downside crosses in the top range of negative territory for shorts. Avoid trading against the timing line, ie, buying/selling if the timing line is in corrective mode (against direction of trade) unless the confirming line is positioning for a new 'confirming cycle'. It's important to always be aware of location, direction & cycling phase of the confirming line. Spinner signals are more effective in trending mkt's than in trading ranges where indicators such as Stochastics & Williams %R should be used.

**NOTE:** payments for *GCRU* services should be made payable to **MAP CUSTOMER SERVICE**. *Gold (& mkts) Charts R Us* is published weekly. You may sign up for 3-mos at \$300, 6-mos at \$585, 9-mos at \$855 or 12-mos \$1,110.
