BUBBLING AND READY

The markets popped up last week. Gold shares, stock markets, some currencies, crude and interest rates all rose. It was a good week filled with anticipation.

The markets have been waiting with baited breath for more stimulus measures by the Federal Reserve and other central banks to help along the weak global economy. So far, no luck, but more important are the better looking markets.

Gold shares jumped up over the last 3 weeks and some of our targets were hit. We sold and took some profits.

Gold shares continue to look good.

They're rising from bombed out levels and they have more to run. Most of our gold share positions, like the HUI index, are now above their 75 day MAs and looking good within a bottom area.

Plus, the Gold Miners Bullish Percent Index hit another 5 month high yesterday thereby pointing the way up even higher.
Keep your positions.

We're also eyeing a new short position in bonds. Government bonds had a great run up with the ever growing deflationary signs. But bonds have been coming down from their super high areas in recent weeks while gold shares popped up.

BROKE ABOVE 75 DAY MA, 1ST SINCE APRIL

And yesterday's good retail sales news gave bonds the extra push down, causing the 30 year yield to close above its 75 day MA for the first time in 4 months. This market may be trying to tell us something.

The chart shows the 30 year yield now firm above its MA at 2.74%. If this levels

holds, we could see the yield rise to the 3% level (the green downtrend) and possibly the 3.20% to 3.50% level before the current rise is over. (Bond prices decline).

The gold price is looking good and ready to rise further. It's been rising in a steeper ST uptrend since the Eurozone bank rescue package took place 7 weeks ago.

The \$1590 to \$1600 level is a key ST support level. If this level holds, a springboard base is forming for an upcoming leg upward.

George Soros and John Paulson know a good gold buy, and that's what they've been doing in recent months. They're accumulating gold during our accumulation time.

Your positions should be set and waiting for the train to pull out.

Silver has also been holding above its key support. Investors' silver holdings are near a record, yet hedge funds are the least bullish on silver in almost 4 years.

We think investors have it right. While still hedged ourselves as a defensive strategy measure, silver is bottoming, see the chart. It rose to its 75 day MA this week for the first time in 5 months, and it looks like a matter of time before it's broken on the upside.

STILL TRYING TO BOTTOM

A close above \$28.30 would do it. Then a rise above \$29.50 would be the final confirm of a strong renewed rise up.

We feel the time is getting closer for another leg up, and we want you to be ready.

We hope you've been enjoying our daily post of the Advance-decline line on the website. By popular demand, we're now including more charts for you to see updated key charts every day.

Please take a look and enjoy our charts more than just once a week.

Stop on Long:	All: 3dc below 1536.
Profit targets:	1700, 1800, 1900, 2000 &/or 2200.
New Recom:	Keep your positions. If not in (long), buy gold at or below 1600.

Gold creeping upward within its May upchannel. Higher lows since May are more evident as the weeks go by... Spinner above the zero line, near at its MT MA with room to rise. Gold is firm above its May uptrend line at 1575 and solid above its ST support, the 75 day MA (1600). If gold holds above 1600, it could rise to the top side of its May upchannel (1675) and Dec downtrend (1700) convergence. A break above this level would confirm a trend reversal and strength that could then push gold to test the top side of its sideways band at 1800. On the downside, a break below the 1600 level would show ST weakness, and a decline to the May uptrend (1575) would be likely. A break below would confirm weakness and gold could then possibly test its major support at the 1536 level (May lows).

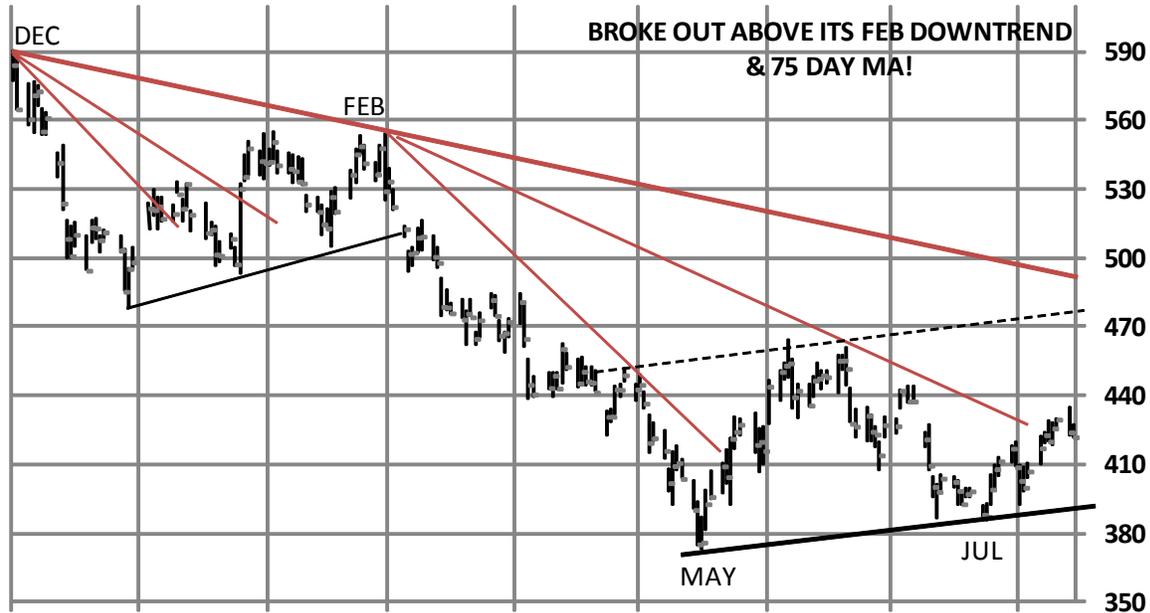

SILVER SEPTEMBER 2012 (SIU12) 8/14/12 CLOSE= 27.763

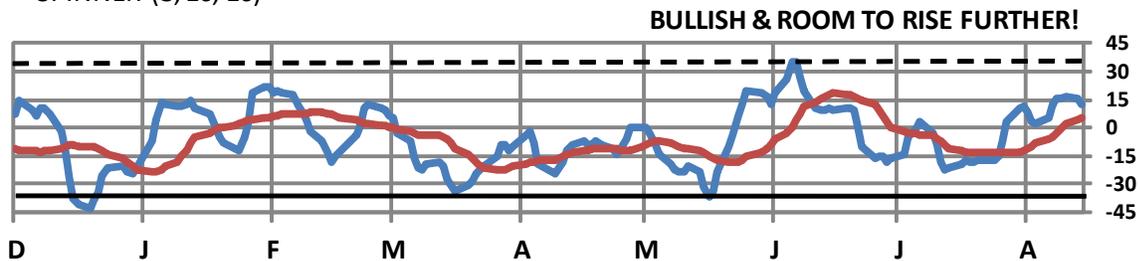

Long at:	Entry Level: 29.65 (Sept-28-11), 29 (Oct-4-11), 29.95 (Oct-20-11), 31 (Nov-25-11 & Dec-12-11), 28.75 (Dec-14-11), 28.80 (Dec-27-11), 27 (Dec-27 & 29-11), 31.50 (Apr-9-12), 28.35 (May-18-12), 27.65 (May-30-12). Sold a fourth of original position at \$33 and another fourth at \$36 for a
Short:	Some may have sold short at 27.50. Cover shorts for a gain near 26. Cover for a loss on a 2dc above 28.80.
Long Stop:	ST & MT: 2dc below 26.
Profit targets:	35, 38 &/or 42.
New Recom:	Keep your position. Buy more below 27.50

Silver rising slowly from its solid base above the 26 level. It's holding above its May uptrend line and its 25 day MA showing ST strength. On the downside, silver continues to resist below its 75 day MA (28.15) showing overall weakness. Spinner neutral to bullish as it holds near its MT MA and above the zero line. Silver must break clearly above its 75 day MA (28.30) to see strength that could push it to the top side of its sideways band. If silver continues to resist below its 75 day MA, it could test its major support above 26. A break below its support would confirm weakness and a decline to the lower 20s would be likely. Key levels to watch are 28.15 on the upside and 26.25 on the downside.

HUI GOLD BUGS INDEX (HUI) 8/14/12 CLOSE= 422.47

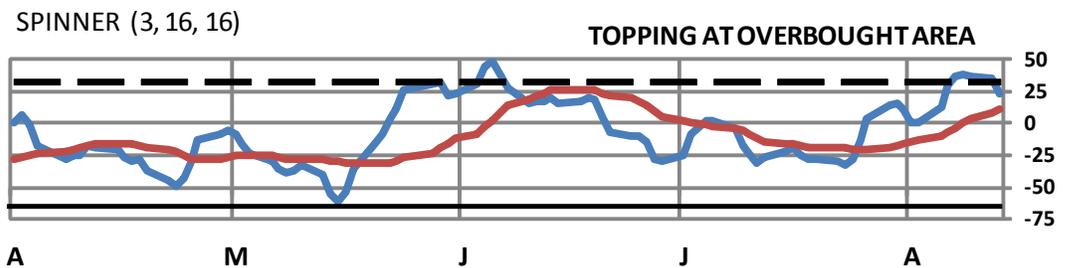

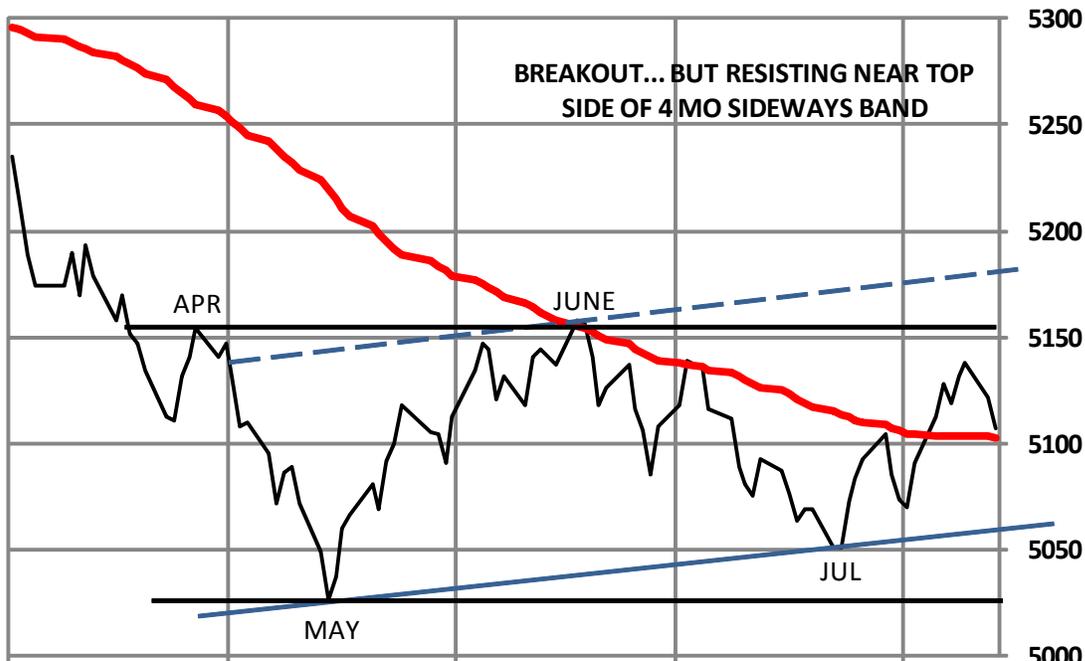

SPINNER (3, 16, 16)

Bullish! HUI broke above both its 75 day MA and its Feb downtrend showing ST strength. Spinner continues to rise solidly with room to rise further. May upchannel consolidating. Top side of May upchannel converging with Dec downchannel below the 500 level. Our indicators are telling us that HUI could rise to test this level in the ST. A break above this level would confirm strength. However, if HUI rises and resists below this level, it'll likely fall back to the May upchannel or lower. Keep your gold share positions and look to take profits at or near profit targets. We'll be looking to buy on weakness as well.

ADEN GOLD STOCKS ADV/DEC LINE 8/14/12 CLOSE=5107

Breakout! The Adv/Dec Line broke above its 75 day MA for the first time all year! It's rising within the May upchannel nearing the top side of a 4+ Mo long sideways band. As long as the Adv/Dec Line holds above its 75 day MA (5100), it'll remain bullish. However, the Adv/Dec Line is resisting below the top side of the band while Spinner topping at an overbought area. This tells us the Adv/Dec Line must break above the top side of the band on a 2dc to confirm strength. Otherwise, a decline back to the bottom side of the band would be likely. For ST triggers, keep an eye on 5175 on the upside and 5050 on the downside. A break in either direction would tell the next tendency for gold shares in the ST. Look for HUI action for confirmation.

ADEN SILVER SHARE INDEX (ASSI) 8/14/12 CLOSE= 16.506

ASSI held at the May lows and rose once again, breaking above both the mid-channel line and its 75 day MA above 16. This tells us silver shares have lots of demand near the May lows, confirming a strong support and good buying area. However, the Sept/Feb downtrend is strong resistance. ASSI must break above the Sept/Feb downtrend to see a reversal and a rise to the Feb highs. If ASSI fails to break above this level, it'll likely decline back to the May lows. **Look to buy silver shares on weakness.**

STOCKS

Agnico-Eagle Mines Ltd. (AEM) 8/14/12 CLOSE= 44.53 US\$

Agnico-Eagle Mines Ltd. (NYSE:AEM). Also traded in TSX: AEM.TO.

Long at: 37 (May-23-12), 37 (May-30-12), 37 (July-12-12) and 36.35 (July-18-12).
Sold best of rest of position at 44 for a 18% for a gain!

New Recom: **Stay out.**

Bullish rise! AEM rose with strength, reaching a 9 Mo high, and the top side of the Apr upchannel! However, Spinner has formed a top at overbought levels and has started to decline, breaking below its MT MA telling us some weakness is likely in the ST. AEM has been one of the best gold shares recently, and we've been able to attain great profits. It still has lots of upside potential. We'll be buying again on weakness.

Aurico Gold Inc (AUQ) 8/14/12 CLOSE= 6.24 US\$

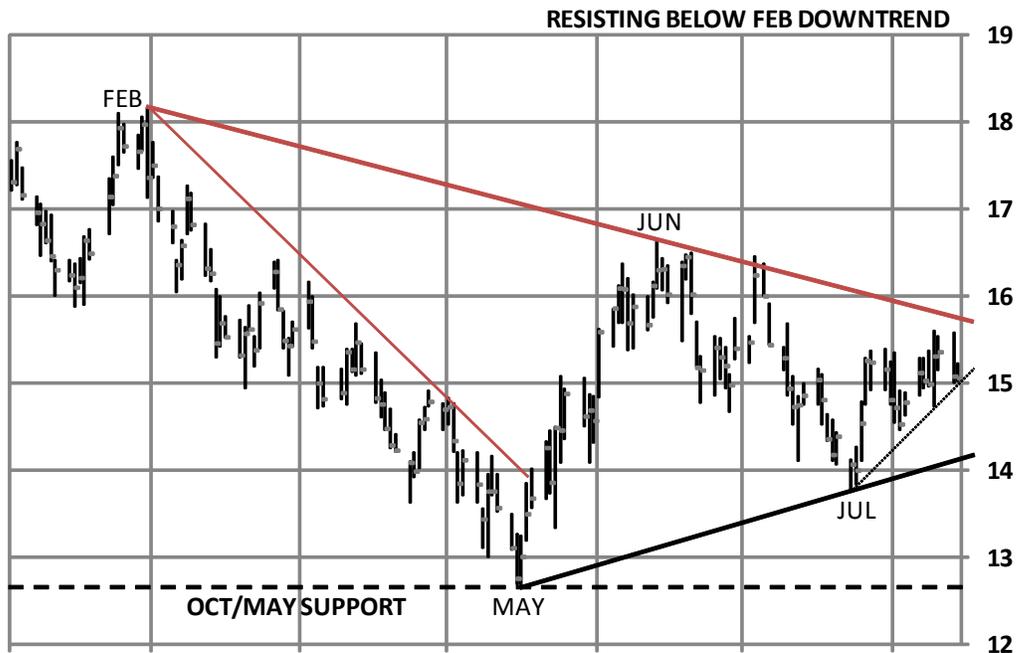

Aurico Gold Inc (NYSE:AUQ). Also traded inTSX- AUQ

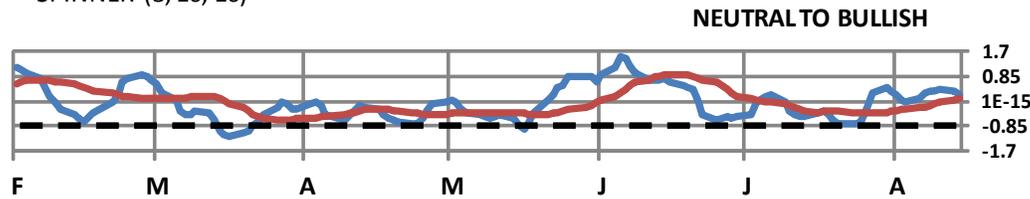

Long at:	9.60 (Feb-23-12), 8.80 (Mar-14-12), 8.70 (Mar-16-12), 8.80 (Mar-21-12), 7.40 (May-18-12), 7.35 (May-23-12), 7.60 (May-30-12), 6.35 (July-18-12) and 6.25 (July-19-12).
Stop:	2dc below 6.
Profit Target:	8, 10 & 12
New Recom:	Keep your position.

AUQ declined after it failed to break clearly above the mid-channel line showing weakness. Spinner declining, breaking below the zero line and at its MT MA. A break below its MT MA would signal more weakness. On the upside, if AUQ can hold above the Jul lows during weakness, it could rise once again to test the mid-channel line. A break above this level would push it to the Feb downtrend at the 8 level. Our weakest gold shares indeed but keep your position.

YAMANA GOLD (AUY) 8/14/12 CLOSE= 15.06 US\$

SPINNER (3, 16, 16)

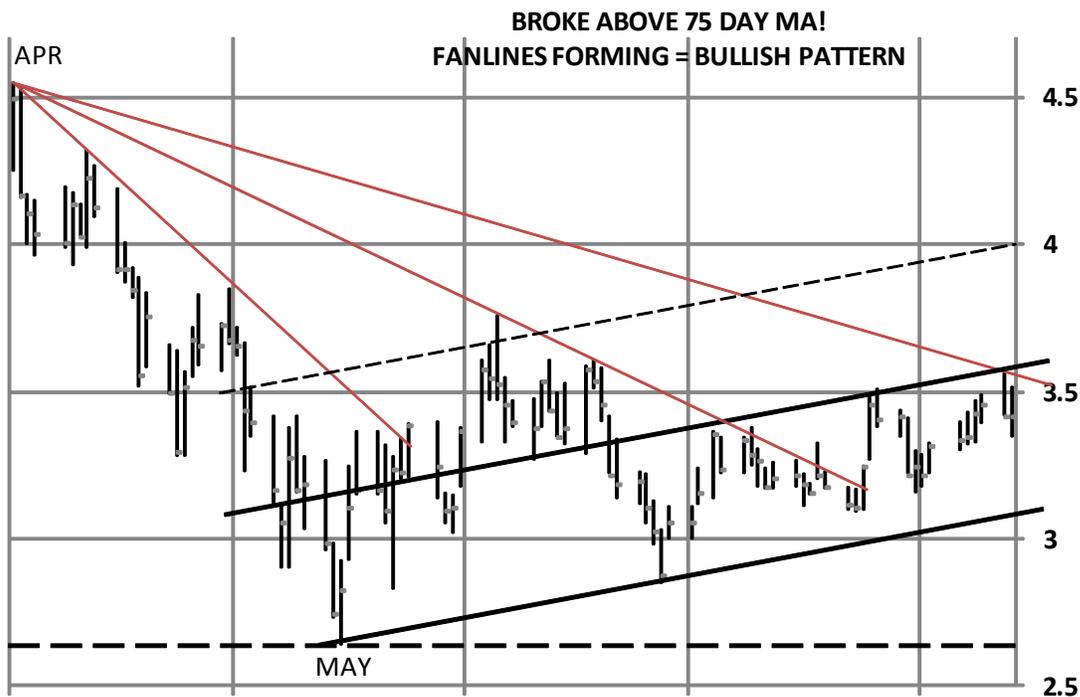

Yamana Gold (NYSE:AUY). Also traded in TSX -YRI /LSE - YAU

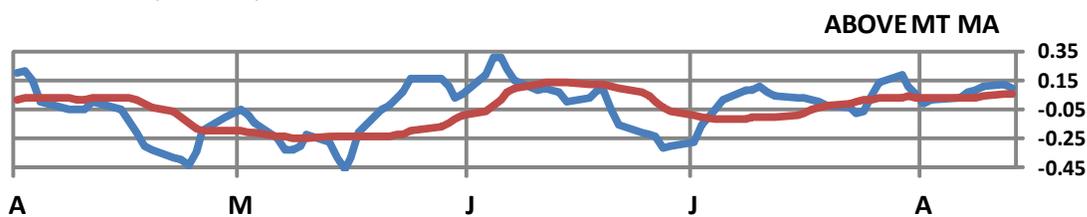

Long at:	Some: 13.75 (May-23-12), 14.25 (May-30-12); All 14.95 (June-28-12), 14.40 (July-18-12) and 14.25 (July-19-12) Some sold the second half of original position at 16.30 for a 16% gain :)
Stop:	2dc below 14.00.
Profit Target:	16 & 18
New Recom:	Keep your positions. Sell half above 16 and the rest above 17.

AUY is resisting below the Feb downtrend below the 16 level. However, AUY is strong above its 75 day MA at 14.90 and solid above its May uptrend at the 14.25 level. If AUY breaks above the Feb downtrend on a 2dc above 16, we'll see renewed strength that could push AUY to the Feb highs near 18, our second profit target. On the downside, if AUY fails to break above the Feb downtrend, it'll show ST weakness and a decline to the MAY uptrend would be possible. Keep an eye on 16 on the upside and 14.90 on the downside, as a break in either direction will show AUY's next move.

B2GOLD CORP. (BTO.TO) 8/14/12 CLOSE= 3.42 CAD\$

SPINNER (3, 16, 16)

B2Gold Corp. (TSX: BTO.TO). Also traded in OTCQX-BGLPF

Long at:	Entry Level: 3.5 (June-20-12)
Stop:	2dc below 3 (adjusted)
Profit Target:	4.05 &/or 4.35
New Recom:	Keep your positions. Sell all above 4.

Higher lows as BTO.TO consolidates its rise within the May upchannel. BTO.TO broke above its 75 day MA during the early days in August and held above it showing signs of strength. However, BTO.TO has some resistance at the mid-channel line near 3.5. BTO.TO must break this level to confirm strength that could push BTO.TO to the top side of the May upchannel near 4. If BTO.TO fails to break above the 3.5 resistance, it would show weakness and could decline to its May uptrend and ST support near 3.

CENTRAL FUND OF CANADA (CEF) 8/14/12 CLOSE= 20.05 CAD\$

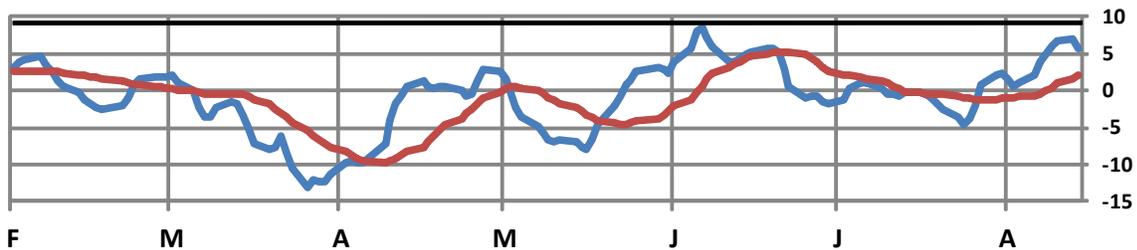

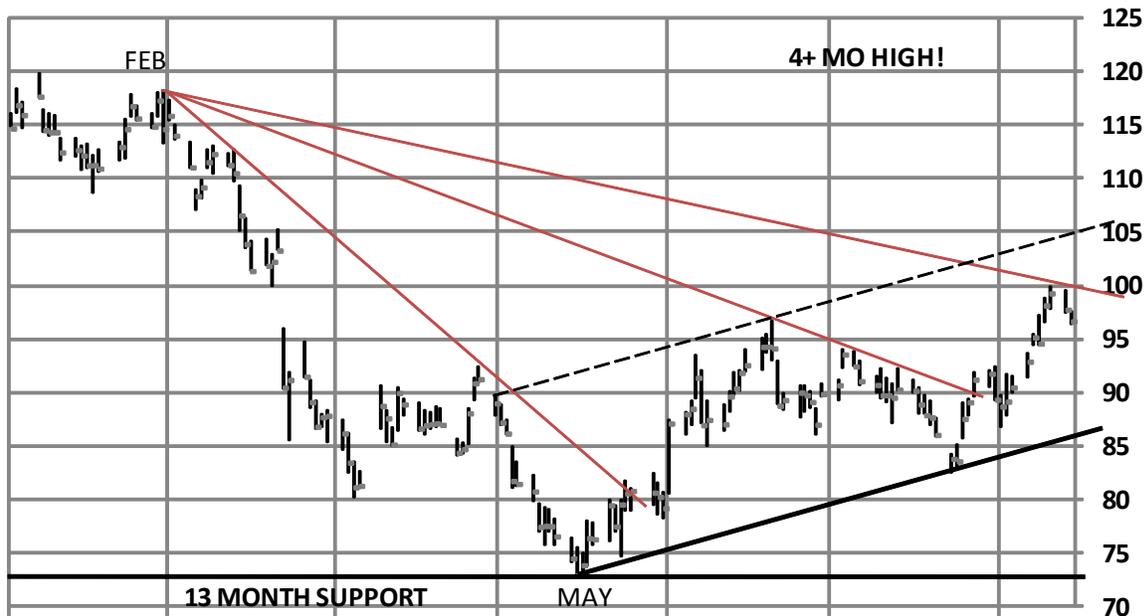

CEF.U

Long:	21.90 (Mar-14 & 16-12), 21.75 (Mar-21-12), 21.65 (Mar-29-12) and 19 (May-23-12).
Stop:	2dc below 18.50
Profit Target:	24 &/or 26
New Recom:	Keep your positions.

CEF looking stable above its 75 day MA. However, CEF has strong resistance at the 20.50 level where the mid-channel line and the May downtrend line are converging. CEF must break above this level to see renewed strength and a rise to the top side of the May upchannel would be likely. On the downside, keep an eye on the 75 day MA, as a break below it would confirm weakness and a decline to the May uptrend line near 19.50 would be possible.

RANDGOLD RESOURCES Ltd. (GOLD) 8/14/12 CLOSE= 96.8 US\$

Randgold Resources Limited (NASDAQ: GOLD). Also traded in LSE: RRS

Entry Level	90 (July-2-12) and 89.75 (July-10-12). Sold half near 100 at 99.50 for a 10% gain! :)
Stop	ST & MT: 2dc below 85 (adjusted).
Profit	100 (almost reached!) & 115
New Recom	Sell the rest above 105.

Bullish! GOLD rose to a 4+ Mo high last week, only a couple of cents away from reaching our first profit target. Next ST target is the top side of the May upchannel near 105. Spinner above its MT MA and the zero line in bullish territory. GOLD must break above the 100 level to see renewed strength. Otherwise, we could see GOLD fall back to the May uptrend near 86. Sell the second half of your position if GOLD reaches the top side of its upchannel, near 105. We'll be looking to buy again on weakness.

NEW GOLD (NGD) 8/14/12 CLOSE= 10.05 US\$

New Gold Inc. (NYSE/AMEX:NGD) Also traded in TSX:NGD.CA

Long: 9.60 (Mar-14 & 16-12), 9.43 (Mar-21-12), 9.50 (Apr-9-12), 8.15 (May-18-12), 8.25 (May-23-12), 8.50 (May-30-12)
Sold half at 9.65 for an average 8% gain :)

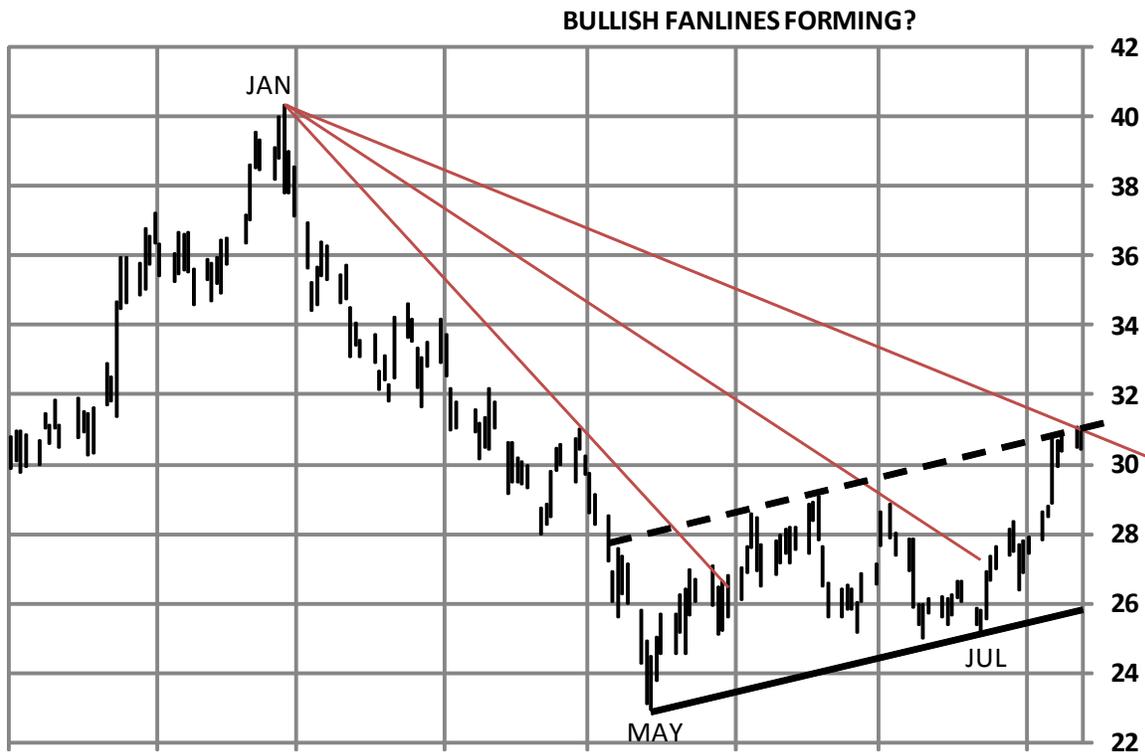

Profit Target 11.25 (adjusted) & 12.50

Stop: ST & MT: 2dc below 9.

New Recom: **Sell the rest of your position above 11.**

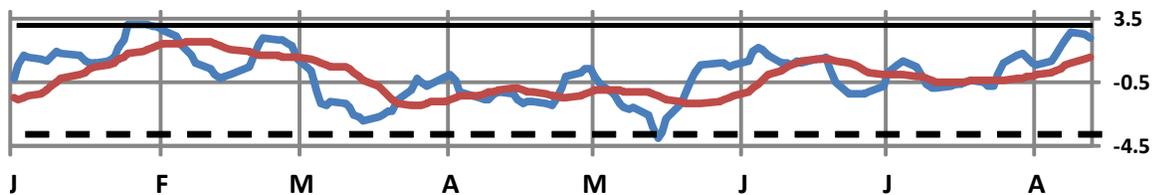

Higher lows! NGD continues to rise within its May upchannel and a H&S bottom formation, looking bullish. However, NGD continues to resist below the neckline resistance at 10.50. NGD must break above this level to confirm H&S bottom formation and to see strength that could push it to test the Oct/Feb downtrend line at 11.50. If NGD fails to break above this level, a decline below the May uptrend would be likely. Look to sell the rest of your position at or above 11.

SILVER WHEATON CORP (SLW) 8/14/12 CLOSE= 30.44 US\$

SPINNER (3, 16, 16)

TOPPING AT OVERBOUGHT

Silver Wheaton (NYSE: SLW) Also traded in TSX:SLW

Long at: 28.30 (July-5-12), 27.50 (July-6-12), 25.50 (July-11-12) & 25.25 (July-12-12)
Sold half at or near 31 for an average 15% gain! :)

Stop: 2dc below 26 (adjusted).

Profit targets: 31 (reached!) & 34

New Recom: **Keep your positions.**

Bullish rise! SLW rose feverishly to the top side of its May upchannel as it forms bullish fanlines along the way. SLW found some resistance at the top side of the upchannel confirmed by Spinner. This means some weakness could occur before SLW tests its next resistance, the 32 level. If SLW fails to break above this level, it'll likely decline to the May uptrend near 26.

OTHER MARKETS

LIGHT CRUDE OIL SEPTEMBER 2012 (CLU12) 8/14/12 CLOSE= 93.21

New Recom: **Stay out for now. Looking to buy on weakness.**

Breakout! Crude broke above its 75 day MA to a new 12 wk high showing strength. Crude's 25 day MA is breaking above its 75 day MA as well, showing another bullish sign for crude. Spinner above its MT MA and the zero line. Crude's next resistance is the 100 level, the Mar/May downtrend line. If crude breaks above 95 followed by 100 we'll see confirmed strength and a rise to the 110 level or higher would then be likely. However, if crude resists below 95, it could decline once again. A break below the June uptrend would confirm weakness and a decline to the mid to low 80s would then be likely. Keep an eye on the 95-100 level resistance and the 90 level support.

S&P 500 INDEX SEPTEMBER 2012 (SPU12) 8/14/12 CLOSE= 1401.6

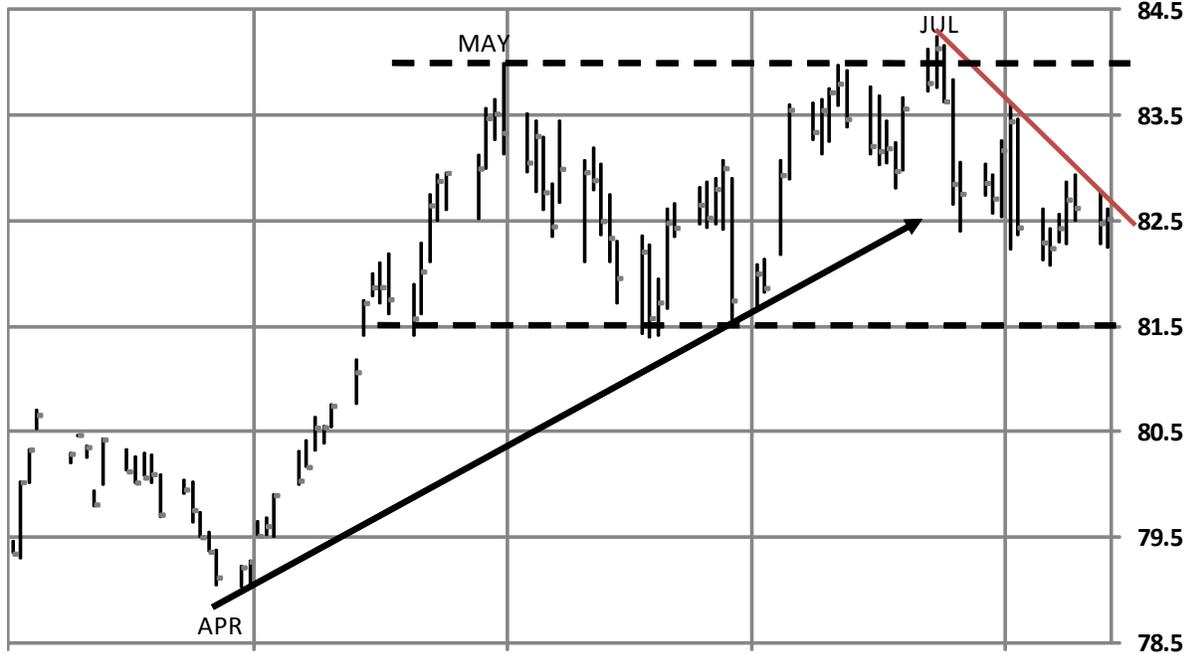

New Recom: **Covered for a loss at 1400.**

S&P 500 broke above the Apr downtrend but continues to resist at the Apr highs. Spinner bullish with room to continue rising. S&P must break clearly above the Apr highs to see renewed strength. Otherwise, it'll likely fall back to its June uptrend at the 1350 level. A break below this level would push S&P to its 1300 level support.

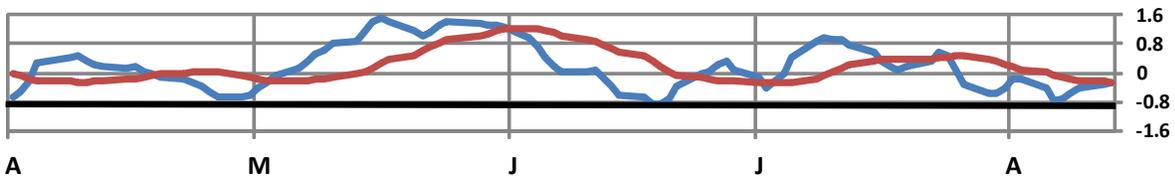

U.S. DOLLAR INDEX SEPTEMBER 2012 (DXU12) 8/14/12 CLOSE= 82.527

JUL DOWNTREND GAINING MOMENTUM

SPINNER (3, 16, 16)

BOTTOMING AT OVERSOLD

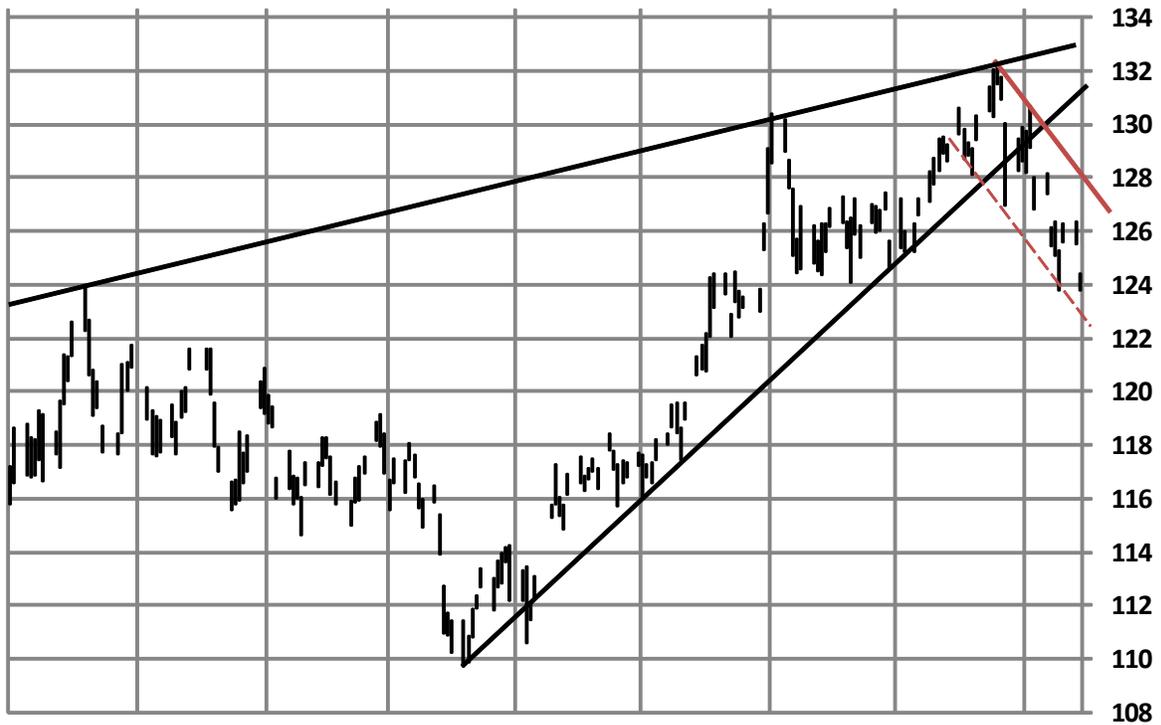

Short	82 (June-21-12). Some may have covered for a loss at 83.50.
Short Stop:	2dc above 84.
Profit Target	79 & 76
New Recom:	Keep your short positions.

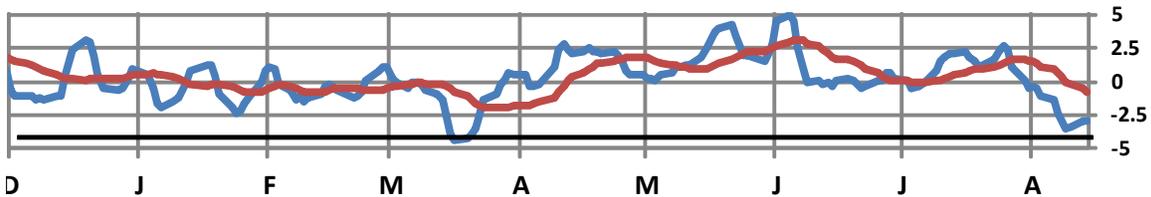

Lower highs. The dollar continues to decline within its Jul downtrend showing weakness. Moreover, dollar moving within a sideways range between 84 and 81.50. A break in either direction will show the dollar's intermediate move. Moreover, the dollar must break above its Jul downtrend to see a change to the upside. A break above this level means a rise to test the top of band to 84.50 level once again would be likely. Otherwise, the dollar is vulnerable and it could decline to the bottom side of the band. A break below this level could push the dollar to the 79 level (Apr lows).

iShares Barclays 20+ Year Treas Bond (TLT) - NYSEArca 8/14/12

SPINNER (3, 16, 16)

20+YEAR TREAS BOND - NYSEArca

New Recom: **Sell short at/or near 127**

Bonds broke below a 9 Mo upside wedge with a downside target of 116. Wait for a pull back to the top side of the Jul downtrend near 127 to sell short. Cover for a gain at 116. Cover for a loss on a 2dc above 132.

Spinner: Spinner is an in-house momentum indicator (not always shown on charts). Momentum indicators use the rate of change in price to determine predominant energy flows. Spinner trading signals are generated when the faster timing line crosses above or below the slower confirming line. Upside crosses in the lower range of positive territory offer the most reliable signals for longs; downside crosses in the top range of negative territory for shorts. Avoid trading against the timing line, ie, buying/selling if the timing line is in corrective mode (against direction of trade) unless the confirming line is positioning for a new 'confirming cycle'. It's important to always be aware of location, direction & cycling phase of the confirming line. Spinner signals are more effective in trending mkt's than in trading ranges where indicators such as Stochastics & Williams %R should be used.
