IN ITS 20th YEAR - Nº 918

MOMENTUM IS SHIFTING U.S. EQUITIES ARE PULLING BACK PRECIOUS METALS & RESOURCES LOOKING VERY STRONG, POISED FOR MORE YEAR IN REVIEW

During the month of December a shift in sentiment took place... One that's giving gold renewed strength...

Animal spirits are brewing and they're fueling inflation expectations.

We can see it with the slow but gradual and consistent rise in LT U.S. gov bond yields and the breakdown in the U.S. dollar index.

You can also see it with the global coordinated effort to debase currencies in an attempt to spur inflation in local economies. And in turn we're seeing a rise in resources and global equity markets.

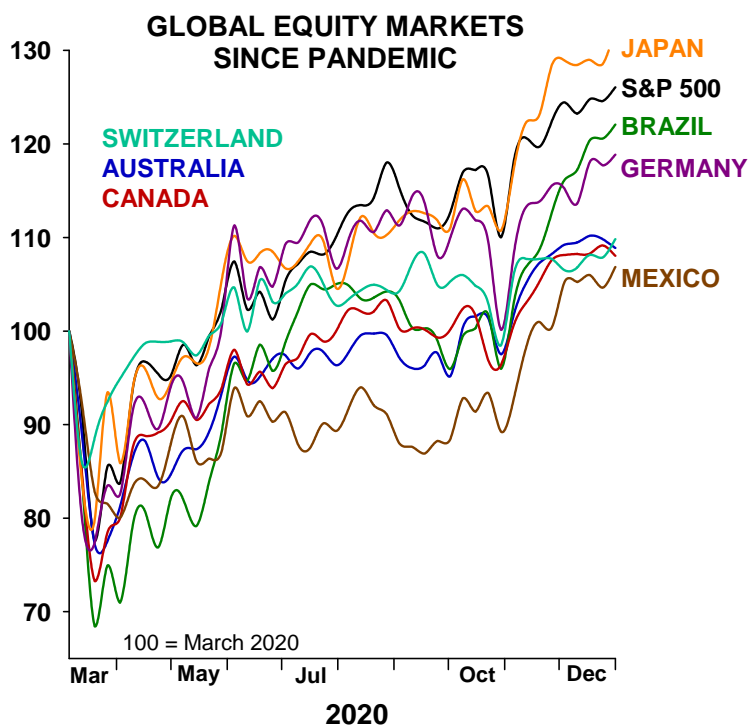

And like we're seeing with gold's rise above the Aug downtrend and resistance level at \$1900 just recently.

"Buy good stocks at cheap prices and hold on!" - Dick Davis

And although U.S. equities have now started to pullback, the Dow Averages recently triggered a bull market re-confirmation suggesting the primary trend is to the upside.

We did reduce exposure as some of our profit targets were hit. And while some weakness may remain, as long as the primary trend is to the upside, the underlying force driving equities will remain up.

For now, and since Dec 2020, momentum has shifted in favor of resources and precious metals....

Dr. Copper has risen non-stop from the Mar 2020 lows, breaking to multi-year highs, confirming the start of a secular bull market in resources.

With economies coming out of pandemic caused lockdowns, an economic recovery is unavoidable.

Timing is trickier... But central banks globally are doing whatever it takes to keep confidence in the global economic system and business.

More recently, we've been increasing exposure to resources and precious metals.

We bot resources and resource shares first. We made some nice profits before the end of the year and have even better gains built up in our open positions.

Exposure to resources is about a 20% of our total portfolio.

My largest exposure ex cash is precious metals... We've recently started adding positions as key support levels within the gold universe were being confirmed with renewed up moves developing.

Exposure is about 28% of total portfolio. I'm looking to increase it further selectively and as the gold universe continues to break out.

The rest is in a basket of cash with U.S. dollar, Australian dollar and the British Pound Sterling. The different currency holdings have allowed us to maintain purchasing power of our cash as opportunities develop.

The past year was a good one.

We executed just over 100 trades. About 35 are open trades today (meaning they were bot but haven't been sold). And about 35 positions that were bot and sold in the course of the year.

The average gains on closed positions (weighted) was 25%. Gains for the year were 80% annualized. It would be higher if we add open positions.

Our best performing portfolio was precious metals, which averaged 42% returns on trades, followed by conventional stock portfolio which averaged 15% gains, and the resource portfolio last with break-even numbers.

The trades on the second half of 2020 in resources were great. And so are the gains on our open positions.

GOLD FEB 2021 (GCG21)
01/05/20 CLOSE = 1954.4

But the positions in resources we closed before the end of the year couldn't turn the losses of earlier in the year into a yearly profit, zeroing out in resources.

The 25% gain this year is equal to last year's gain and it's above the 5 year annual average of 22%.

OPEN POSITIONS

Gold's bullish break above the Aug downtrend shows signs of renewed strength and confirms support near \$1800.

Notice Spinner on chart rebounding from the zero line, showing momentum picking up steam. The chart suggests gold will continue rising to test the Aug highs near \$2100.

A break above this level is to be seen. Keep your positions.

The Leader! Silver is leading the gold universe into higher levels. It broke above the Aug downtrend first. It now has solid support at \$22, the Sep/Nov lows and deeper support at \$19. If silver holds above the Mar uptrend at \$24, it could reach the Aug highs near \$30 initially, A clear break above this level and it's off to the races...

Spinner below is also above zero, starting to separate from its MT MA. It's showing momentum building up quietly. Keep your positions.

SILVER MAR 2021 (SIH21)
01/05/20 CLOSE = 27.64

GOLD BUGS INDEX (HUI)
01/05/20 CLOSE = 319.39

NOVAGOLD RESOURCES INC. (NG)
01/05/20 CLOSE = 10.17

Gold shares overall are picking up steam. They're not as strong as resource companies, but they're also breaking out, showing signs of renewed strength.

Watch for HUI to break above 330 (the Aug downtrend) to confirm renewed strength that could push HUI to the Aug highs near 400 initially.

Our individual positions include: 4 junior miners, 2 intermediate miners and 3 intermediate silver miners.

EQUINOX GOLD CORP. (EQX)
01/05/20 CLOSE = 11.17

Nova Gold (NG) confirmed support at the Mar uptrend near \$9.50. It's now testing the Sept downtrend near \$10.50. A break above this level allows NG to rise to test its double top resistance at \$12.

Spinner is showing signs of a bottom with room to rise further. Buy some at mkt, ideally below \$10.

Equinox (EQX) is looking similar to NG. It confirmed support at the Mar uptrend and it's now rising to test the Aug downtrend near \$12. A clear break above this level could propel EQX to the Aug highs near \$14.

BLACKROCK GOLD CORP. (BRC.V)
01/05/20 CLOSE = 1.07

Spinner is on the rise, breaking above zero and its MT MA suggesting momentum is on the rise. If not in, buy at mkt. I have a small position and will buy more below \$11.

Blackrock Gold Corp (BRC.V & BKRRF.OTC) is also doing great! It broke above the Jul downtrend recently and followed up by rising to a new 3 month high!

BONTERRA RESOURCES INC. (BTR.V)

01/05/20 CLOSE = 1.26

Spinner is on the rise, showing strength above its MT MA. Blackrock Gold will likely remain volatile, but a rise to the Jul highs initially, near CA\$1.5 (BKRRF: \$1.18) is likely ST. Keep your positions.

Bonterra Resources (BTR.V & BONXF.OTC) continues to consolidate, unable to break above the Aug downtrend near CA\$1.30 (BONXF: \$1.02) Resistance is strong. On the downside, Bonterra has strong support at the Jun lows near CA\$1 (BONFX: \$0.75). Keep your positions.

KIRKLAND LAKE GOLD LTD. (KL)

01/05/20 CLOSE = 43.77

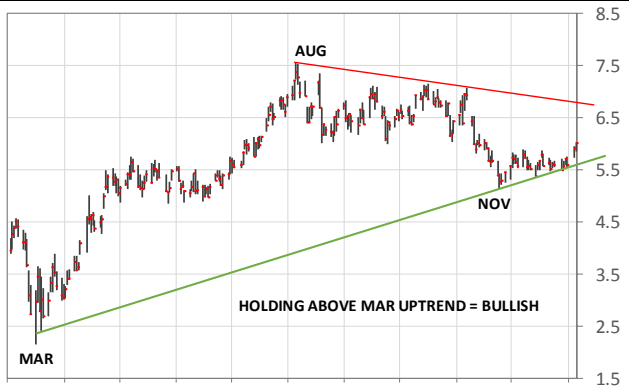

Kirkland Lake (KL) is also confirming support at the Mar uptrend and momentum is picking up steam. A break above the Aug downtrend on a 2dc above \$48 confirms strength that could push KL to the Aug highs near \$58.

Spinner on the rise, breaking away from zero and MT MA showing momentum breaking out. Buy some more at mkt.

B2GOLD CORP. (BTG)

01/05/20 CLOSE = 6.02

B2 Gold (BTG) is building a rising base above the Mar uptrend near \$5.50 showing strength. But resistance at the Aug downtrend near \$6.5 is fast approaching. A break above this first resistance could propel BTG to the Aug highs near \$7.50.

Spinner is rising above the zero line and its MT MA, showing momentum is on the rise. BTG can now rise to the Aug highs near \$7.5. A break above this level means it's off to the races!

Buy at mkt, ideally below \$6.

SILVERCORP METALS INC. (SVM)
01/05/20 CLOSE = 6.96

Silvercorp Metals (SVM) is showing some resistance at the Aug downtrend near \$7.50. Notice SVM is falling after failing to breach the Aug downtrend this week.

More importantly, SVM has confirmed bullish support at the Mar uptrend near \$5.50 and Spinner is on the rise.

The chart suggests SVM could break above the downtrend at \$7.50 and rise to the Aug highs near \$9 ST. Buy some at mkt, ideally below \$7.

HECLA MINING COMPANY (HL)
01/05/20 CLOSE = 6.96

Hecla Mining (HL) is another of my favorites. It's breaking above the Aug highs, flirting with the \$7 handle. HL is very bullish above \$6.50 but has stronger support at the Mar uptrend near \$5.50.

Spinner is on the rise, showing momentum on the rise with more upside potential.

Buy more on any weakness below \$6.

FORTUNA SILVER MINES INC. (FSM)
01/05/20 CLOSE = 9.54

Fortuna silver (FSM) is strong and seems to defy gravity. It broke above the Sept highs and it hasn't looked back. FSM is reaching the top side of the Mar upchannel near \$9.50 just as Spinner reaches an extreme overbought level.

Price action could be telling us FSM will at some point soon return to test the Mar uptrend.

Buy on any weakness below \$8.

BHP Group (BHP) is also rising with strength. It broke above \$67 to new highs. It's flirting with the \$70 handle, just as Spinner forms a bottom right at the zero line.

The chart action is bullish and a break above \$70 could unleash renewed strength and a rise higher would be likely.

I'm raising my second profit target to \$80. Keep your positions for now.

Ivanhoe Mines (IVN.TO & IVPAF.OTC) is one of my favorite positions. Since we bot in Oct and Nov it's up 38%, reaching the top side of the Mar upchannel at CA\$7.50 (IVPAF: \$6).

Profit target was reached. If you took partial profits, you did good. I'm keeping my positions for now.

More upside seems likely, particularly with one of the largest copper mines in the world coming into operation during the third quarter this year.

Buy more on a pull back below \$6.50 (IVPAF: \$5)

EMX Royalty Corporation (EMX) has been another great company. It broke above a bullish ascending triangle, above the Jul highs, showing strength.

Spinner up, showing momentum is bullish. EMX is now very strong above previous resistance at \$3.30 and has deeper support at the Mar uptrend near \$2.90.

EMX also reached our first profit target. If you sold partial position to protect some profits you did good. Personally, I'm keeping for now and adjusting my targets.

Altius Minerals ([ALS.TO](https://www.als.to) & ATUSF.OTC) has been holding near the top side of the Mar upchannel, above \$13.

However, Spinner is showing momentum is falling quickly. This tells us ALS could now fall back to the Mar uptrend near \$11.50 before continuing its upmove.

We recently took great profits and are sitting on reduced exposure. Keep your positions.

Uranium Royalty Corp (URC.V & URCCF.OTC) rose to new closing highs yesterday. It's breaking the top side of the Mar upchannel at CA\$1.50 (URCCF: \$1.20) showing impressive strength.

Spinner at an extreme ST suggesting upside is limited ST. Keep your positions for now and buy on weakness near the Mar uptrend below CA\$1.30 (URCCF: \$1)

Walmart (WMT) is coiling above the Mar uptrend just as Spinner breaks out from an extreme low area. The chart is very bullish showing lots of upside potential for WMT.

WMT's growing online presence will allow it to thrive during the lockdown economy and it could also remain relevant in the post lockdown economy. Keep your positions.

We also bot new positions in Costco (COST). Very similar to WMT, COST has been adapting to changes, incorporating more facilities like deliveries and pick up locations.

COST is bouncing up from the mid-channel line near \$360 showing strength. Spinner on the rise, breaking above zero with room to rise further.

We recently bot new positions. Keep them for now.

Shopify (SHOP) continues to pull back from the highs. It's down nearly 10%. Spinner suggests SHOP could fall even further, to possibly the Nov lows near \$900.

Keep in mind, the Mar uptrend near \$1000 is also strong support. If SHOP holds, a renewed rise to retest the recent Dec highs near \$1250 would be likely.

We recently took handsome profits on partial positions. Keep the rest for now.

PayPal (PYPL), is another E-commerce trade that will do well during the lockdown economy and post lockdown economy.

Notice PYPL is very bullish above the Mar uptrend near \$205. If it holds above this level and rises above \$240, it's off to the races!

Spinner losing steam, alerting some downtime is likely. We recently took nice profits. Keep the rest of your positions.

Our inverted LT U.S. gov bond ETF: TBT continues to rise above the Aug uptrend. It's showing resilience and it's now showing signs of renewed strength.

If TBT stays above the Aug uptrend at \$16.50, it could then rise to the Jul highs near \$18 initially. A break above this level could push TBT even higher.

Keep your positions for now.

MMM is forming a top and has started to decline. It failed to surpass the \$180 highs and it's now just holding at the Mar uptrend near \$165.

Spinner breaking below zero, suggesting some downtime is now likely.

Keep your positions for now.

Our strategy for the new year will consist on concentrating on the resources and precious metals portfolios. There is where I see most potential in the foreseeable future. We have solid stocks with great gains built in and enough cash to pick up developing opportunities.

Good luck and good trading,

NG	Buy some more at mkt, ideally below \$10. NG is confirming support at the Mar uptrend. NG's deeper support is at the Aug lows at \$8.	B	8.30 (Jul-15-20), 8.70 (Jul-22-20), 8.99 (Aug-7-20). Sold half at \$12 for 40% gain (Sept 18-2020). (AVG: \$8.65).	10.17	2dc below 8
BTR.V BONXF.OTC	Holding full position. Testing the Aug downtrend and resistance near CA\$1.30 (BONXF: \$1.02). A break above could push BTR initially to the Aug highs near \$1.60 (BONXF: \$1.15). Keep your positions.	H	\$1.32 (Jul-23-20), \$0.90 (Nov-5-20) (AVG: \$1.10).	1.26	2dc below \$0.8
BRC.V BKRRF.OTC	Holding full position... Bullish! Confirming breakout momentum and rising further, regaining the CA\$1 handle (BKRRF: \$0.80). If BRC now stays above CA\$0.90, a continued rise to the Jul highs near CA\$1.50 (BKRRF: \$1.18) would be likely. Keep your positions.	H	1.10 (Sept, 21- 20), 0.65 (Dec-16-20). (AVG: 0.875).	1.07	2dc below 0.60 (adj).
KL	Building up position. Momentum shifting back in favor of KL. It's testing the Aug downtrend near \$48. A break above is very bullish and opens the door to a continued rise to \$58. Keep your positions. Buy some more at mkt.	B	40.75 (Dec-22-20).	43.77	2dc below 38 (adj).
BTG	Buy at mkt. Showing strength above the Mar uptrend near \$5. 50. A break above the Aug downtrend on a 2dc above \$6.50 would show signs of renewed strength. Start building up your position.	B	-	6.02	2dc below \$5
EQX	Building up position. Bullish above the Mar uptrend at \$10. Has deeper support at \$9. If not in, buy at mkt. I'm buying more on weakness below \$11.	B	10.20 (Dec-22-20).	11.17	2dc below \$9
SVM	Building up position. Buy more at mkt, ideally below \$7. SVM rose to a new high since the Dec lows confirming support above the Mar uptrend. It's now testing the Aug downtrend near \$7.50. A break above this level will show a sign of renewed strength.	B	6.40 (Dec-22-20).	6.96	2dc below \$5.50
FSM	FSM has been a tough one for me to pick up. I really like the action, but I'm always waiting for further weakness... Even though FSM is very strong, it's poised for a pullback, at least to the breakout level near \$8. I'm raising my buy order. Buy below \$8.50.	B	-	9.54	2dc below \$6.50
HL	Building up positions. Bullish break above Aug highs shows renewed strength with continued upside. Buy at mkt, ideally on weakness below \$6.50.	B	\$5.90 (Dec-22-20).	6.96	2dc below \$5.
CURRENCIES (30%)					
U.S. DOLLAR (DXH21)	Broke below 90 showing continued weakness. Capital continues to flow out of the U.S. dollar and into resources, precious metals and global markets with more upside potential. Keep cash position diversified.	H	-	89.41	-
FXB	Holding near the highs. FXB seems to have found support above \$130. Keep cash positions diversified. The pound has lots of upside with Brexit cleared.	H	-	131.65	-
FXA	The Australian dollar remains strong and rising. It recently broke above the top side of its Jun upchannel showing impressive strength. It's pulling back now, but remains very bullish above the Oct uptrend near \$76. Consider FXA's deeper support is the Jun uptrend near \$71. Keep your cash pile diversified.	H	-	77.36	-

INDUSTRIAL METALS AND ENERGY (20%)

BHP	Rose to new highs showing renewed strength. BHP is very bullish above the Oct uptrend near \$65 and has deeper support at the Mar uptrend near \$52. Keep the rest of your positions and sell at our second profit target above \$70. It's getting close!	H	54.75 (Jan-15-20), 52.50 (Jan-30-20), 43 (Mar-5-20), 31.50 (Mar-18-20). Sold half per alert at \$53.50 protecting 18%+ gain (Sept-8-20). 50 (Nov-5-20).(AVG: 47). Sold half per alert at \$62.50 protecting a 33% gain!	69.50	2dc below \$50
IVN.TO IVPAF.OTC	Holding full position. If you sold part of your position at our first profit target, you did well, protecting a 30%+ return. I'm considering keeping my position given exposure to resources overall remains low. I'm also buying more on any pull back below CA\$6.50 (IVPAF: \$5)	H	5.20 (Oct-21-20), 5.70 (Nov-19-20) (AVG: CA\$5.45)	7.56	2dc below \$5.50
EMX	Holding full position. EMX broke above a bullish ascending triangle showing strength with more upside potential. I haven't taken partial profits even after our first target was hit. Exposure to resources remains low and recent bullish action suggests more upside is likely. If you took partial profits, you did well. If not, keep your positions.	H	\$2.68 (Oct-28-20), \$2.75 (Nov-19-20). (AVG: 2.72).	3.71	2dc below \$2.55
ALS.TO ATUSF.OTC	Flirting with the recent highs at the top side of the Mar upchannel. A break above CA\$14 (ATUSF: \$11) on a 2dc will show renewed strength. Keep your reduced positions and wait for a decline to the Mar uptrend below \$13 (ATUSF: \$10.15) to buy new positions... A rising wedge may be forming.	H	10.50 (Nov-13-20), 11.80 (Dec-2-20). Sold half at \$14 for a 25% gain.	13.42	2dc below \$9.50
URC.V URCCF.OTC	Holding full position. URC also reached our first profit target. Low liquidity is making it hard to trade URC (and some other of the junior companies). However, if you can't take partial profits on these, just hold them. The upside potential MT and LT is still open. Keep your positions.	H	\$1.23 (Dec-9-20). \$1.22 (Dec-22-20)	1.55	2dc below \$1.1

MELT UP RISE PORTFOLIO (22%)

WMT	Overweight. WMT is showing support at the Mar uptrend, above \$140. If WMT stays above this level, a bounce up to the Nov highs initially would be likely.	H	130 (Aug-26-20), 136 (Sept-18-20), 142.65 (Dec-23-20).	145.75	2dc below \$135
SHOP	Holding reduced positions after recently taking profits. Momentum is shifting down, pushing SHOP lower. A break below the Mar uptrend will show weakness. Keep an eye on deeper support near \$900. A break below it could open the door for a even deeper decline.	H	930 (Jul-16-20), 900 (Jul-24-20), 875 (Sept-18-20), (AVG: 900). Sold half at \$1200 for 32% gain.	1118.74	2dc below \$850
TBT	Holding full position. Continues to hold above the Aug uptrend. Downside pressure is waning. A break above \$17 will show a sign of strength, and a break above \$18 will confirm it and a continued rise. Keep your positions for now. Sell half at our first profit target.	H	\$15.40 (Aug-12-20), \$16.50 (Nov-12-20) (AVG: \$15.95)	16.68	2dc below \$14.50
PYPL	Holding reduced positions after recently taking partial profits. Looking topy at the highs... Has bullish support at 200. Keep the rest of your positions during weakness.	H	183 (Sept 23-20), 192 (Oct-28-20), 185 (Oct-30-20). Sold half for 33% gain via alert!	234.91	2dc below \$180
MMM	Holding full position. Downside pressure increasing. Keep an eye on the Mar uptrend. If MMM holds, it'll remain bullish. A break below it will show signs of a shift in momentum with more downside. Keep positions for now.	H	169.50 (Oct-21-20), 162.50 (Nov-5-20)	171.58	2dc below \$165 (adj).
COST	Bought some last week. Looking good above Mar uptrend at \$330. Keep your positions.	H	\$374 (Dec-30-20).	375.74	2dc below \$330

Spinner: Spinner is an in-house momentum indicator (not always shown on charts). Momentum indicators use the rate of change in price to determine predominant energy flows. Spinner trading signals are generated when the faster timing line crosses above or below the slower confirming line. Upside crosses in the lower range of positive territory offer the most reliable signals for longs; downside crosses in the top range of negative territory for shorts. Avoid trading against the timing line, i.e., buying/selling if the timing line is in corrective mode (against direction of trade) unless the confirming line is positioning for a new 'confirming cycle'. It's important to always be aware of location, direction & cycling phase of the confirming line. Spinner signals are more effective in trending mkts than in trading ranges where indicators such as Stochastic & Williams %R should be used.
