Weekly Trading Strategies

Achieves gains by trading commodities, currencies and stocks

Omar Ayales

February 16th, 2022

IN ITS 21st YEAR – Nº 975

RATES CONTINUE TO RISE, APPROACHING SECULAR RESISTANCE LEVELS STOCKS & RESOURCES UPTRENDING GOLD CONTINUES TO BUILD A STRONG BASE ABOVE THE AUG UPTREND...

Inflation gauges continue to point towards strong persistent inflation in the U.S. and most other countries globally.

In the U.S. both, the Consumer Price Index (CPI) and the Producer Price Index (PPI), came in at record levels confirming strong activity and price inflation. Whether it's stronger demand or a continued crunch in supply, prices continue to go up. This past week Chipotle announced its fourth price increase since August last year raising prices a total of 10% since then. Chipotle is joining McDonalds and Starbucks who led the initiative earlier on.

Interest rates are rising even stronger. The U.S 10 year yield is piercing the 2% resistance and the 30 year yield is a stone's throw away from reaching its secular resistance near 2.50%. As shown last week, 'risk on' assets tend to rise in a rising rate environment. Yesterday's price action is no coincidence. A continued bounce up in U.S. equities and resources is ongoing.

The rise in resources and equities pushed Altius Minerals (ALS.TO & ATUSF.OTC) past our first profit target.

"An investor without investment objectives is like a traveler without a destination"
-Ralph Seger

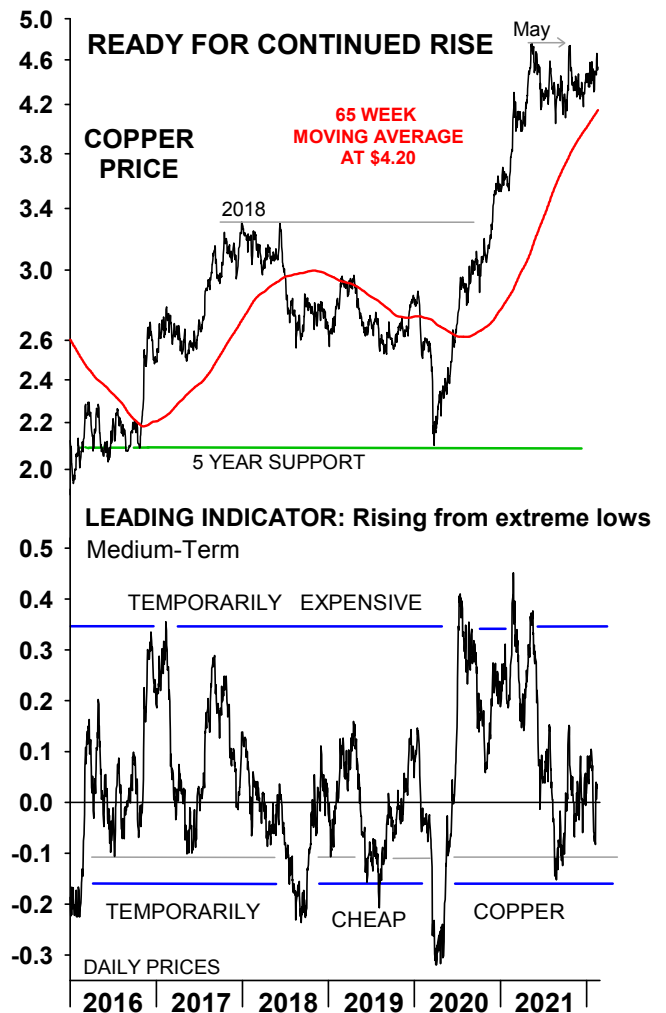

I was overweight the position and sold half protecting a 30% profit since we started buying back in Jun (8 months). I'm still holding nearly a full position and will be ready to buy more on weakness later on. More on ALS below...

If Dr. Copper is of any guide, it shows resources have bottomed above a key support level, above \$4.20 and it's ready to move back up. It could rise to the 2021 highs near \$4.80. On this next chart you'll see copper's MT indicator bottoming near an extreme low level, telling us some uptime ST to MT is likely.

I'll continue to wait for strength to develop further that can allow our positions within resources and stocks to reach profit targets. This will allow us to secure some gains and raise our cash position to prepare for longer term uncertainty.

I'm not a buyer at current levels but will take advantage of any opportunity that comes our way.

Keep in mind a shift towards safety continues to brew... and as soon as this ST to MT move is over, we could see a dramatic shift favoring risk off assets such as gold, U.S. treasuries, the U.S. dollar and utilities.

It can be seen in gold's resilience. It's been rising after forming a double bottom in August 2021, above the Mar lows below \$1700. Gold has been moving higher since forming a clear uptrend with new support at \$1790. Gold's next key resistance will be the 2021 highs near \$1925. A break above this level could push gold even higher to possibly test the old highs near \$2100. Gold's resilience is impressive, thereby also suggesting an upcoming shift towards risk off investments.

It can also be seen with the rising dollar. Although the U.S. dollar index has been pulling back since recently reaching a new high for the move, it continues to trend up in a more intermediate trend. It continues to hold above the bullish uptrend since May 2021 and it could now rise to a higher level, at the 2020 highs near 103.

And although U.S. treasuries are down, they're not out and could come back strong if yields start to show signs of tops at critical resistance levels, such as the 2.50% level on the U.S. 30 year yield.

Our strategy remains the same ... to take advantage of current strength to allow positions to reach profit targets. Make sure to take partial profits when targets are reached.

Don't go out on a buying spree. Allow for weakness to develop later on before buying new positions.

OPEN POSITIONS

RESOURCES: Picking Up Steam

Copper is rising with strength. It's bullish above the Aug uptrend near \$4.20 and it has deeper support at the bottom side of an almost yearlong sideways band near \$4. If copper holds above these support levels, it could then rise to the top side of the Aug upchannel near \$4.70, which, coincidentally, is just below the 2021 highs, a strong resistance.

Ivanhoe Mines (IVN.TO & IVPAF.OTC) remains strong within a high area, above CA\$10.50. It has yet to break above the recent high near CA\$12.50 (IVPAF: \$10.50). However, IVN remains very strong and bullish above the Sept uptrend, with stronger and deeper support at the Oct 2020 uptrend near CA\$9.50 (IVPAF: \$7.50). The leading indicator below rose up, back above zero with some room to rise further. Stay out for now, and wait for a decline below CA\$10.50 (IVPAF: \$8.50) to buy new positions.

LIGHT CRUDE OIL JAN 2022 (CLH22)

02/15/22 CLOSE = 92.07

Crude oil rose further, breaking the top side of the bullish funnel since Jan 2021. It jumped up approaching the \$100 level before pulling back. However, crude remains very strong above \$90 and has deeper support near \$70. Energy is among the strongest sectors. We continue to have strong exposure to uranium.

NEXGEN ENERGY LTD. (NXE)

02/15/22 CLOSE = 4.57

NexGen Energy (NXE) is bouncing up from the key support level at \$3.75 and trying to break above the Nov 2021 downtrend. The leading indicator is on the rise. It recently broke above zero and suggests more upside for NXE is likely ST. To keep momentum going, NXE must now rise and stay above \$5. Keep your positions.

URANIUM ROYALTY CORP. (URC.V)

02/15/22 CLOSE = 4.37

Uranium Royalty (URC.V. & UROY) is also bouncing up from key support at CA\$3.50 (UROY: \$2.75). It's testing the Nov downtrend near CA\$4.50 (UROY: \$3.60) showing signs of strength. However, if URC continues to resist at this level, it'll show weakness. Watch for a break above CA\$5 (UROY: \$4) to show a stronger sign of strength. URC's leading indicator is rising, breaking above zero showing momentum is picking up steam. Keep your positions.

Ur-Energy (URG) continued to rise after breaking above the Nov downtrend showing rising strength. More recently, it pulled back, but once again, it's showing support above \$1.10. This new low near \$1.20 is forming a new uptrend since Jan and if URG now stays above \$1.20, it'll show strength developing. If URG now rises above \$1.50, it would show renewed strength that could push URG higher, to possibly the recent highs above \$2. Keep your positions

Altius Minerals (ALS.TO & ATUSF.OTC) shot above the Jun highs, showing solid strength with increased upside potential.

ALS reached our first profit target near the top side of the upchannel at CA\$22 (ATUSF: \$18). However, notice the leading indicator at a record high suggesting the up move could be overdone. A pull back to break out level near CA\$19 (ATUSF: \$15) is likely. I'll be looking to buy again on weakness. Otherwise keep the rest of your positions.

Cleveland Cliffs (CLF) pulled back after breaking back above a key support level near \$19. It's now looking ready to resume its rise. Must rise above \$23 to show renewed strength. The leading indicator continues to develop, showing upside momentum that could push CLF to the Oct downtrend target at \$23. Keep your positions for now, sell half above \$22.

We took profits and raised our exposure to cash. Currently, exposure to resources represents 27% of our total portfolio. We'll continue to take advantage of ongoing strength in resources to take profits at key levels.

PRECIOUS METALS: Looking Good

Gold pushed higher, breaking to a new high for 2022 and the Nov high. The move was strong, showing momentum continues to trend upward. Gold will stay strong as long as it stays above its key support at the Aug uptrend near \$1790. Notice the leading indicator below, breaking above both the zero line and the red line suggesting momentum is picking up steam.

GOLD APR 2022 (GCJ22)
02/15/22 CLOSE = 1856.2

Overall gold remains strong with renewed upside potential. Keep your positions.

SILVER MAR 2022 (SIH22)
02/15/22 CLOSE = 23.342

Silver is bouncing up from the Sept uptrend & key support near \$22. Silver is approaching the May downtrend near \$24, where it's showing some resistance. A break above this level would confirm recent strength and will open the door to possibly test the Feb 2021 downtrend at \$26. Notice the leading indicator below breaking above both, the zero and red lines, suggesting momentum is picking up steam. Keep your positions, a rise to \$26 initially, is likely. And a break above it would be very bullish.

GOLD BUGS INDEX (HUI)
02/15/22 CLOSE = 266.11

Gold shares are also pushing higher. The HUI Index rose above the May downtrend at 265. It had done so already back in Jan, but then pulled back in normal technical manner. The HUI held above the Sept uptrend confirming higher lows and has now once again, broken above the resistance, confirming growing upward momentum. Notice the leading indicator below, is also up-trending since last Jun; more recently it broke above the zero and red lines, showing momentum picking up steam. The chart suggests the HUI Index could rise to the top side of the Sept up-channel near 290. Keep your positions for now.

Last week shares for Kirkland Lake (KL) were officially de-listed. KL holders should've received about 0.794 cents shares of Agnico Eagle Mines (AEM) per share of KL. From now on, we'll be showing AEM's chart and commentary. AEM is a leader and one of our long standing favorite gold miners. With both Sean Boyd and Tony Makuch at the helm, the new AEM is in a position to thrive even stronger. The merger

between two of the best gold miners out there in terms of operations, management, assets and growth potential will most definitely become a 'daily staple' when investors turn to the gold universe. A great asset to hold.

On the chart, AEM has been forming a massive downside wedge pattern with an upside target above \$65. AEM must break above the May downtrend on a dc above \$53 to confirm the bullish pattern. Moreover, the leading indicator below is breaking out from both the zero and red lines showing momentum picking up steam. Keep your positions for now and hold during weakness.

Novagold (NG) is also bouncing up from the Jan lows. It's testing the Jun 2021 downtrend near \$7. The leading indicator below is on the rise, up trending since last Jun, and more recently breaking above both the zero and red line, suggesting momentum is picking up steam. If NG breaks above \$7, it'll show signs of renewed strength, by extending its bounce up to the Nov highs initially, near \$8. Keep your positions.

Blackrock Silver Corp (BRC.V. & BKRRF.OTC) is also bouncing up from the Jan 2021 uptrend near CA\$0.80 (BKRRF: \$0.60). It's now breaking the Nov downtrend and showing signs of growing momentum. A follow up break above the May downtrend at CA\$1.10 (BKRRF: \$0.95) could take BRC.V to the top side of the Jan 2021 upchannel near CA\$1.35 (BKRRF: \$1.15), initially. Notice the leading indicator below, is breaking out, showing momentum picking up steam. Keep your positions.

Hecla Mining (HL) is bouncing up from the bottom side of a sideways band confirming support above the Jan lows. HL will continue to develop momentum as long as it holds above \$5. The leading indicator below is showing strength, rising above the zero and the red lines. Keep your positions for now. A rise to the top side of the band near \$6.50 is likely ST.

Equinox Gold Corp (EQX) also continues to bounce up from extreme lows, confirming support near \$6. EQX must now rise above the Aug 2020 downtrend near \$7.50 to show signs of renewed strength. Notice the leading indicator below, shooting upward with strength, showing momentum picking up steam. Keep your positions for now.

Fortuna Silver Mines (FSM) continues to form a bottom above the Dec lows. It's also nearing the Jan downtrend at \$4, but still showing strong resistance. The leading indicator below is showing promise by breaking above the zero line, showing momentum may be rising. Keep your positions for now. A continued rise looks likely.

Osisko Gold Royalties (OR) re-confirmed support at the \$11 level by rising above the Nov downtrend near \$12. The breakout is bullish showing OR could now rise above stronger resistance at the \$13 level. A break above this level could fuel a rise to the Jun highs near \$15. The leading indicator below is very bullish with room to rise further. Keep your positions.

Harmony (HMY) continues to trend up, above the Sept uptrend at \$3.40. HMY is showing strong resistance at the May 2021 downtrend. HMY must rise above this key

resistance to show signs of renewed strength. The leading indicator is breaking out showing momentum picking up steam... Keep your positions; HMV remains bullish above the Sept uptrend.

We continue to have strong exposure to precious metals. The gold up move this past week is looking strong, exposing growing momentum. The up move in gold miners and silver is also a strong indication the rebound rise is broad-based.

STOCKS: Rebounding

Airbnb (ABNB) broke above the Nov downtrend near \$160 showing impressive strength. It's now testing the \$180 handle, reaching a 2 month high. ABNB's next resistance is at the Nov highs near \$210. The leading indicator below is on the rise, near an extreme telling us upward momentum remains strong. Keep your positions for now.

Coinbase (COIN) is also rebounding from extreme lows. It's recovering the \$200 handle and looking ready for more upside. If COIN now holds above \$200, it could then rise to the Nov highs, initially, near \$350. Keep your positions for now.

Shopify (SHOP) continues to consolidate at the Sept 2020 lows near \$850. A clear break below could push SHOP to an intermediate support near \$650. However, notice the leading indicator on the rise, showing momentum picking up steam. To show renewed strength, SHOP must rise above the Nov downtrend near \$1050. Keep your positions.

COINBASE GLOBAL, INC. (COIN)
02/15/22 CLOSE = 208.95

SHOPIFY INC. (SHOP)
02/15/22 CLOSE = 889.5

PAYPAL HOLDINGS, INC. (PYPL)
02/15/22 CLOSE = 115.46

PayPal (PYPL) continued to fall further, reaching an extreme low, just above \$110. PYPL's decline remains concerning, mainly because it's such a great company, with a great business model. I still believe a rebound is likely. I'm waiting for a break above \$150 to start unloading positions.

These Other Stocks only represent a 15% of total portfolio. We've done great trading them over the past two years and will continue to hold and eventually buy new positions on weakness.

Good luck and good trading,

Omar Ayales

URC.V	Overweight. URC continues to rebound from key support near \$3.50, showing signs of strength. It recently broke the Nov downtrend, but continues to show resistance. Keep your positions for now.	H	\$3 (Aug-18-21), \$3.10 (Aug-26-21). Sold half at \$6.30 for 105% gain! Bot: \$5.75 (Oct-15-21), \$5.65 (Oct-29-21). Sold excess at CA\$6.50 for 48% gain! Bot: CA\$4.90 (Dec-3-21). AVG: CA\$4.50.	4.37	2dc below \$3.25.	ST: \$8, MT: \$10.
URG	Overweight. Forming new uptrend since Jan. Remains bullish above \$1.20, with deeper support at \$1. Watch for break above \$1.50 to show renewed strength that could push URG higher. Keep your positions.	H	Bot: \$1.90 (Nov-10-21), \$1.45 (Nov-30-21), \$1.30 (Dec-22-21). AVG: \$1.55.	1.27	2dc below \$1.10.	ST \$2.40; MT: \$3
ALS.TO	Holding a full position after selling some last week as our first target was triggered. Could now rise to the top side of the Oct 2020 upchannel near \$23. Remains bullish above Oct 2020 uptrend at \$16.50. Keep the rest of your positions.	H	\$16.75 (Jun-28-21), \$16 (Aug-18-21), \$16.15 (Oct-18-21). Sold half at \$21 to protect 30% gain. AVG: CA\$16.30.	21.26	2dc below \$13.50 (ATUSF: \$10.50)	\$21 & \$30
CLF	Overweight. Continues to bounce up from the Jan lows. It could now resume its rise to test the Oct downtrend near \$23. Sell half above \$22.	H, S	\$24 (Jul-29-21), \$24.90 (Aug-13-21), \$19.90 (Sept-29-21), \$21.50 (Nov-17-21), AVG: \$22.55.	19.77	Hold during weakness.	ST: \$26 & MT: \$40.
MELT UP RISE PORTFOLIO (15%)						
SHOP	Overweight. SHOP continues to consolidate near the Sept 2020 lows. With the indicator on the rise, it may be leading the way up. A break above Nov downtrend would look good, above \$1050.	H	Bot \$1400 (Dec-3-21), \$1340 (Jan-3-22), \$1075 (Jan-22). AVG: \$1270.	889.50	Keep during weakness.	ST: \$1800
PYPL	Overweight. Collapsed! It's now in an ultra extreme situation. Keep an eye on \$110 support, and \$165 for a ST breakout. Sell part on a rebound rise above \$150.	H	Bot: \$255 (Mar-4-21), \$225 (Mar-5-21); Sold half at \$300 for 25% gain (Jul-12-21). Bot: \$274 (Aug-26-21), \$205 (Nov-17-21). AVG: \$247.	115.46	Keep during weakness.	\$270, \$360 ST, \$400 MT.
COIN	Overweight. COIN is rebounding from extreme lows, trying to break the Nov downtrend at \$210. If COIN now holds on to its recent gain above \$190, it could rise further, to possibly the Nov highs near \$350. Keep your positions.	H	\$295 (Apr-29-21), \$270 (Aug-10-21). Sold half at \$340 for 20% profit (Nov-2-21). Bot: \$290 (Dec-2-21), \$185 (Feb-2-22). AVG: \$255.	208.95	Hold during weakness	ST: \$340 & MT: \$450.
ABNB	Holding full position. ABNB broke above Nov downtrend to a 2mon high. Poised to rise to the Nov highs near \$220. Keep your positions.	H	\$149 (Jun-16-21), \$139.50 (Jul-14-21). Sold half at \$170 for average 18% gain. Sold the rest at \$200 for average 38% gain. Bot: \$182 (Nov-23-21), \$170 (Dec-1-21), \$152.50 (Feb-2-22). AVG: \$168.	180.07	2dc below \$130	\$220 & \$250

Trading Strategy

GCRU Trading is all about achieving profits by trading stocks, commodities and bonds. We have a diversified approach using companies with great fundamentals offering great value compared to the broader market. Trades are driven mainly by technical analysis but stocks are picked based on their fundamentals, momentum and their overall strength in their sector. All recommended companies are great assets, and even though we trade short and intermediate trends, they are worthwhile keeping longer term if you're building a longer-term portfolio.

I also believe in an approach that allows us to average in and average out. This is important because averaging in near a low, and averaging out near a peak gives us great profit advantages.

My portfolio is designed for you to follow it down to the penny, but you can also use it as a reference or guide. Or you can just use the individual trades I'm constantly coming up with.

The track record I keep takes into account all of the trades executed. It doesn't take into account performance on cash, dividends nor does it contemplate associated fees or expenses.

For trading purposes, I consider a full position to be one that is 4% of my total portfolio. I tend to buy partial positions (consisting of 2% of total portfolio) and at any given moment I could be overweight, meaning owning more than a full position.

On the trader sheets found in the final pages of each issue, you'll see a reference to our positioning, be it overweight, full, reduced or small. I also include next to each portfolio section, the percentage allocated to that particular sub portfolio.

Transparency, communication and discipline are keys to successful trading. If you have any questions or concerns, please feel free to email me at oayales@adenforecast.com.

Quoting *GCRU* is permitted provided *GCRU* name, website address & subscription price are given.

All charts in *GCRU* are daily prices.

Subscribers can obtain free online chart updates for all gold shares in *GCRU* via: www.bigcharts.com. To view Canadian stks please use CA as prefix (i.e., to view Agni Eagle (Toronto) you must use CA: AEM).

Note: U should NOT feel our recommended prices are set in concrete. If mkts suddenly feel hot or cold to U, or dramatic news occurs, U can buy or sell, or stop at slightly higher or slightly lower prices. It also hinges on your experience level. Some people can use our prices as guides & know when they can take bigger risks.

Spinner: Spinner is an in-house momentum indicator (not always shown on charts). Momentum indicators use the rate of change in price to determine predominant energy flows. Spinner trading signals are generated when the faster timing line crosses above or below the slower confirming line. Upside crosses in the lower range of positive territory offer the most reliable signals for longs; downside crosses in the top range of negative territory for shorts. Avoid trading against the timing line, i.e., buying/selling if the timing line is in corrective mode (against direction of trade) unless the confirming line is positioning for a new 'confirming cycle'. It's important to always be aware of location, direction & cycling phase of the confirming line. Spinner signals are more effective in trending mkts than in trading ranges where indicators such as Stochastic & Williams %R should be used.

ABBREVIATIONS	
	1-day close (the share price must close above or below the indicated price level, before our recommendation is activated)
1dc	
2dc	2-day close (consecutive)
bot	bought
CAD\$	Canadian dollar
H&S	head & shoulder
LOC	line on close
LT	long term
MT	medium term
NL	neckline
PF	portfolio
PO	price objective
Recom	recommended
RH&S	reverse head & shoulder
RS	relative strength
ST	short term
Sym/tri	symmetrical triangle
Tgt	target
Unch	unchanged
Vol	volume
Wk	week
Ystdy	yesterday
C	close
