GCRU Trading

BIG PIC

The consumer price index (CPI), a gauge for inflation, came in stronger than expected, confirming the U.S. consumer remains stronger and hotter than anticipated, defying all claims to the contrary.

The combination of a stronger CPI reading, and a resilient labor market confirms the U.S. economy remains very strong relative to its peers. It provides the expectation that earnings growth for U.S. companies will likely continue.

It's also allowing economists and analysts to scale back their expectations of a rate cut from the Federal Reserve in 2024, which in turn allows for the expectation of continued positive interest rates.

The data supporting a stronger U.S. economy is supportive of a stronger dollar. Just yesterday, the U.S. dollar index rose to a new high since bouncing up from critical support at 100 during Dec 2023.

Price action in the U.S. dollar index suggests it will remain stronger than anticipated, at least ST. The next key level to watch on the upside on the U.S. dollar index

CONTINUED DECLINE**

OMAR AYALES

is 107. If the dollar breaks above this level, it'll show renewed strength and the start of a new leg-up rise.

But, if the U.S. dollar index fails to surpass resistance at 107 (Oct 2023 highs), it could then fall back to re-test critical support at 100. As stated in past issues, do not count the U.S. dollar out unless it breaks below 100.

The stronger dollar is putting downside pressure on most global currencies and commodities. Copper

broke below a key intermediate uptrend at \$3.75, and gold broke below bullish support at \$2025. The breakdown in assets suggests ongoing weakness is likely.

For gold, it means the 'B' decline continues to develop.

Although more gut-wrenching pain is now possible, given yesterday's breakdown, it's important to understand the bigger picture to help "see the forest for the trees" and allow some perspective that can help us be patient while we wait.

My next chart below shows a 24+ year chart for gold. It captures gold's secular bull market since the early 2000s. It also has a leading indicator that helps us measure longer-term momentum.

Notice gold is a longer-term bullish above the red line, it's 23-

month MA. Currently, the trend is just below \$1900 and near our 'B' decline target (\$1925). Interestingly, the 23-month MA is converging with gold's 24-year uptrend, confirming a rock-solid support level.

The leading indicator shows momentum on the rise. It's moving up, well above the zero line, with lots of room to rise further. Notice the last two times the indicator peaked were during 2011-12 and 2020-21. Both longer-term peaks in gold. The indicator is back on the rise and is on pace to reach higher levels.

The chart tells us gold remains very strong on a secular level. It has solid support near \$1900, and the up-and-coming 'C' rise is poised to push gold much higher.

"We should treat market truisms with respect but not as gospel" -Dick Davis

We recently unloaded about half of our total exposure to uranium producers, anticipating an intermediate peak, even though my longer-term view remains bullish.

Notice this updated chart of uranium. At a record high level, with the longer-term leading indicator at an extreme high showing strength, but also anticipating exhaustion. The chart suggests a pullback is now likely. Consider uranium remains longer term bullish above the 65wk MA (red line), now near \$55.

We'll continue to hold reduced exposure to uranium and could be increasing exposure during a stronger pull back.

OPEN POSITIONS

PRECIOUS METALS: 'B' decline continues to mature.

Gold Price

- Broke the Oct uptrend and support level today near \$2025. Let's now see if \$2000 holds. Deeper support is near the lower \$1900s.
- Gold must break above \$2075 to trigger the end of the current 'B' decline and the start of the up & coming 'C' rise.
- Leading indicator shows gold remains under pressure ST.
- Holding a full position. Keep your positions.

Silver Price

- Testing support at the Oct uptrend near \$22. If silver continues to stay near \$22, it could rise to critical resistance at \$26, the 2023 high.
- Silver has deeper support at \$21.
- Leading indicator under pressure below zero; has been up-trending since Dec, telling us momentum continues to build.
- Overweight. Keep your positions.

GOLD MINERS: Testing deeper support levels; continues to show weakness overall. May be approaching intermediate bottom.

AGNICO EAGLE MINES LIMITED (AEM)

02/13/24 CLOSE = 44.98

Agnico Eagle Mines (AEM)

- Fell to Oct low area, reaching the lower side of the down channel since Dec. It's forming an ST downside wedge, which means if \$47 is broken, it could test \$49, the Dec downtrend, ST. A clear rise above the Dec downtrend will show renewed strength that could push AEM higher, initially the Dec highs at \$56.

- The break below \$46 opens the door to a continued decline to possibly the lower \$40s.

- Leading indicator under pressure below zero.

- Overweight. Keep your positions. Allow for weakness.

ALAMOS GOLD INC. (AGI)

02/13/24 CLOSE = 11.39

Alamos Gold (AGI)

- Fell to the lower side of the Dec 2022 up channel, with deeper support near \$11.

- AGI must rise above the Dec 2023 downtrend at \$13 to show signs of renewed strength. Otherwise, will remain under pressure.

- Leading indicator resisting at the zero level, showing weakness.

- Overweight. Keep your positions. Allow for weakness.

B2GOLD CORP. (BTG)

02/13/24 CLOSE = 2.48

B2 Gold (BTG)

- Fell further after failing to hold at support level, reaching a new low for the move at the lower side of the Dec down channel. It must break back above \$2.80

initially, but more importantly, above \$3.10, to show renewed strength.

- Leading indicator is under pressure.
- BTG has been weaker than the rest, likely due to weaker forward guidance due to a delay in obtaining an operating permit at the Fekola project in Mali. Other than that, BTG finished 2023 very strong. It was the company's 8th consecutive year of meeting or exceeding annual production guidance. Overall, BTG is a very efficient gold producer. It also has one of the strongest dividend yields in the industry at just above 4.5% per year.
- Holding a full position. Keep your positions.

Franco Nevada Corp (FNV)

- Bouncing up from the lows, confirming deeper support above \$100. FNV has formed a sideways band since its Dec lows. A break above \$110-\$115 and it's off to the races!
- FNV must break above May 2023 downtrend & resistance at \$130 to show renewed strength.
- Leading indicator is holding near zero, uptrending since Nov last year.
- Holding a full position. Keep your positions.

Harmony Gold Mining (HMY)

- Fell to Jan lows and deeper support below \$5.50.
- Must rise above \$6.50 to shake off weakness and show renewed strength.
- Leading indicator is bearish below zero, showing weakness remains ST.
- Holding a full position. Keep your positions.

HECLA MINING COMPANY (HL)

02/13/24 CLOSE = 3.37

SILVER SHARES: Vulnerable; testing key support levels. May be approaching intermediate bottom.

Hecla Mining Co (HL)

- Breaking below support at \$3.50.
- HL must break above the Dec downtrend at \$4 to confirm renewed strength that could push HL to the Dec downtrend and possibly the Dec peak.
- The leading indicator continues to the bottom, showing weakness is ongoing.
- Holding a full position. Keep your positions.

VIZSLA SILVER CORP. (VZLA)

02/13/24 CLOSE = 1.28

Vizsla Silver Corp (VZLA)

- Pulling back from recent highs, approaching the Nov uptrend and support near \$1.25. A break below could extend weakness, pushing VZLA to even deeper support near \$1.
- Must break above the recent peak at \$1.65 to show renewed strength.
- Leading indicator bearish below zero.
- Holding a full position. Keep your positions.

WHEATON PRECIOUS METALS CORP. (WPM)

02/13/24 CLOSE = 43.28

Wheaton Precious Metals Corp (WPM)

- Broke clearly below the Oct uptrend, showing ongoing weakness.
- To reverse bearish action, WPM must rise above \$47, initially.
- Leading indicator is under pressure below zero.
- Overweight. Keep your positions.

BHP GROUP LIMITED (BHP)**02/13/24 CLOSE = 58.93**

RESOURCES & ENERGY: Copper sinks below support while crude oil bounces up, showing growing signs of renewed strength.

BHP Group Ltd (BHP)

- Broke below support at \$60.
- BHP must now rise above \$62 to confirm a rising trend.
- Leading indicator remains under pressure below zero.
- Overweight. Keep your positions.

CLEVELAND-CLIFFS INC. (CLF)**02/13/24 CLOSE = 19.17****Cleveland Cliffs Inc (CLF)**

- Forming a bullish flag pattern with an upside target at \$23.50. The base of the flag is at \$18, right at the Sept uptrend. The pole extends to the recent peak just below \$21. If CLF breaks above \$21, it could then rise to the pattern's target.
- A break below \$19 would void the pattern, and a break below \$18 could reverse the uptrend since Sept, extending weakness.
- Leading indicator continues to unwind, near zero.
- Holding a full position. Keep your positions.

FREEPORT-MCMORAN INC. (FCX)**02/13/24 CLOSE = 36.66****Freeport McMoran (FCX)**

- Broke below ST support near \$39. Could now fall further to \$35.
- To reverse weakness, must rise above the Jan 2023 downtrend near \$43.
- Leading indicator is under pressure below zero.
- Holding a full position. Keep your positions.

IVANHOE MINES LTD. (IVN.TO)**02/13/24 CLOSE = 14.18****Ivanhoe Mines ([IVN.TO](#))**

- Holding strong near a bullish uptrend since Nov. Remains bullish above \$14.
- Must break above \$15 to show renewed strength.
- Leading indicator testing the zero line.
- Holding a full position. Keep the rest of your positions.

EXXON MOBIL CORPORATION (XOM)**02/13/24 CLOSE = 101.3**

BIG OIL: Are holding up better; still within the high area of a recent bounce up.

Exxon Mobil Corp (XOM)

- Looks good above \$100, consolidating the recent breakout. Must rise above \$105 to open the door to upside potential.
- A break below support near \$95 would be bearish.
- Leading indicator is pulling back but holding above zero.
- Overweight. Keep your positions.

SHELL PLC (SHEL)**02/13/24 CLOSE = 63.42****Shell PLC (SHEL)**

- Resisting below the Nov downtrend at \$67. If SHEL fails to break resistance, it could then fall below support at \$60, the Jul 2022, uptrend confirming weakness.
- However, SHEL remains bullish above \$60. A break above \$68, and it's off to the races!
- Leading indicator still above the zero line.
- Holding a full position. Keep your positions.

TOTALENERGIES SE (TTE)
02/13/24 CLOSE = 64.43

Totalenergies SE (TTE)

- Continues to hold above \$62.5, showing support. TTE could now rise above ST resistance \$66.
- A break below \$62.50 would extend weakness.
- Leading indicator is holding at the red and zero lines. Momentum still building.
- Holding a full position. Keep your positions.

NEXGEN ENERGY LTD. (NXE)
02/13/24 CLOSE = 7.45

URANIUM PRODUCERS: Pulling back. We'll be looking to buy more on signs of a bottom.

NexGen Energy (NXE)

- Breaking below rising wedge formed between the Jan uptrend and the top side of the May up-channel. NXE could now pullback to possibly the May uptrend near \$6.75.
- Leading indicator continues to unwind, testing the zero line.
- Holding a small position. Keep your positions.

URANIUM ROYALTY CORP. (URC.TO)
02/13/24 CLOSE = 3.89

Uranium Royalty Corp ([URC.TO](https://www.uraniumroyalty.com))

- Declining and approaching the Jul uptrend. If URC holds at support at \$3.70, it could bounce back up and resume its up move.
- Leading indicator is looking for a bottom near an extreme.
- Holding a full position. Keep your positions.

EMERGING MARKETS: Also feeling the pinch from a stronger U.S. dollar index.

Ishares Latin America 40 ETF (ILF)

- Dipping below the Oct uptrend and support level near \$27.50. A break below this level would show weakness and push ILF lower, to possibly \$25.
- Must rise above \$30 to show renewed strength.
- Leading indicator above zero.
- Holding a small position. Keep your positions.

YPF S.A. (YPF)

- Under pressure below the recent highs but continues to hold strong above the mid-channel line at \$15.
- A break below \$15 could push YPF lower to the Aug 2022 uptrend near \$11. Conversely, a break above \$19 could push YPF into a stronger phase of its bull market.
- Leading indicator under pressure.
- Overweight. Keep your positions.

OTHER

Annaly Capital Management Inc (NLY)

- Breaking down below support at \$19, showing weakness. Could now fall to \$17 ST. Has deeper support near \$15.
- Must rise above \$20, initially, to show renewed strength.
- Leading indicator under pressure.
- Holding a full position. Keep your positions.

Trading Strategy

GCRU Trading is all about achieving profits by trading stocks, commodities and bonds. We have a diversified approach using companies with great fundamentals offering great value compared to the broader market. Trades are driven mainly by technical analysis but stocks are picked based on their fundamentals, momentum and their overall strength in their sector. All recommended companies are great assets, and even though we trade short and intermediate trends, they are worthwhile keeping longer term if you're building a longer-term portfolio.

We also believe in an approach that allows us to average in and average out. This is important because averaging in near a low, and averaging out near a peak gives us great profit advantages.

Our portfolio is designed for you to follow it down to the penny, but you can also use it as a reference or guide. Or you can just use the individual trades we're constantly coming up with.

The track record we keep takes into account all of the trades executed. It doesn't take into account performance on cash, dividends nor does it contemplate associated fees or expenses.

For trading purposes, we consider a full position to be one that is 4% of our total portfolio. We tend to buy partial positions (consisting of 2% of total portfolio) and at any given moment we could be overweight, meaning owning more than a full position.

On the trader sheets found in the final pages of each issue, you'll see a reference to our positioning, be it overweight, full, reduced or small. I also include next to each portfolio section, the percentage allocated to that particular sub portfolio.

Transparency, communication and discipline are keys to successful trading. If you have any questions or concerns, please feel free to email me at oayales@adenforecast.com.

Quoting *GCRU* is permitted provided *GCRU* name, website address & subscription price are given.

All charts in *GCRU* are daily prices.

Subscribers can obtain free online chart updates for all gold shares in *GCRU* via: www.bigcharts.com. To view Canadian stks please use CA as prefix (i.e., to view Agni Eagle (Toronto) you must use CA: AEM).

Note: U should NOT feel our recommended prices are set in concrete. If mkts suddenly feel hot or cold to U, or dramatic news occurs, U can buy or sell, or stop at slightly higher or slightly lower prices. It also hinges on your experience level. Some people can use our prices as guides & know when they can take bigger risks.

Spinner: Spinner is an in-house momentum indicator (not always shown on charts). Momentum indicators use the rate of change in

price to determine predominant energy flows. Spinner trading signals are generated when the faster timing line crosses above or below the slower confirming line. Upside crosses in the lower range of positive territory offer the most reliable signals for longs; downside crosses in the top range of negative territory for shorts. Avoid trading against the timing line, i.e., buying/selling if the timing line is in corrective mode (against direction of trade) unless the confirming line is positioning for a new 'confirming cycle'. It's important to always be aware of location, direction & cycling phase of the confirming line. Spinner signals are more effective in trending mkts than in trading ranges where indicators such as Stochastic & Williams %R should be used.
