

TRADER REPORT

Weekly Trading Strategies

GCRU Trading

The end of the quarter was a bullish one for gold as it reached a new record high for the move last Thursday, just before the regular break on Good Friday; but even more importantly, gold miners are coming back...

Gold has been hot, red hot ... reaching a record high daily at the start of the second quarter. The 'C' rise is proving to be what we've been waiting for, and our positions are on the rise. And, by the looks of it, there's lots of upside potential remaining.

Even more importantly, last week's up move wasn't on its own. The miners, which had been weak relative to gold, woke up and started to move up on gold's strength. This move is very bullish as the miners' strength is broadening the gold universe.

As you'll see below, most of our positions have surpassed or are surpassing critical intermediate resistance levels, suggesting a continued upside is likely. Their leading indicators are in bullish territory,

IN THIS ISSUE

GOLD UNIVERSE BREAKS HIGHER;

THE MINERS ARE CATCHING UP, SILVER CONTINUES TO LAG...

THE U.S. DOLLAR STAYS RESILIENT AMID STRONG ECONOMIC DATA OUT OF THE U.S.

QUARTERLY REVIEW

OMAR AYALES

confirming renewed strength and opening the door to a new leg-up rise for gold and the miners.

The HUI Index, a gold miner index, breaking above resistance at 250. Moreover, the rise thus far has been bullish, and the leading indicator below the chart shows momentum picking up steam.

And although silver is showing lots of upside potential and remains on a bullish uptrend, it's been the weakest link. But it's now getting closer to its key resistance at \$26.50. Silver must rise above this level initially to show its own renewed strength and confirm the golden trifecta's bullish breakout. You'll remember the golden trifecta being the joint price action in gold, silver and the miners.

Moreover, consider silver's stronger longer-term resistance is at \$30.

Noteworthy, with strength in gold and copper (resources), silver should be rip-roaring. Not only for demand as a currency and safe haven due to its association with gold, but industrial demand for resources overall has been strong too, as confirmed by price action on the base metals shown on a chart here last week. Rising demand from strong economic activity can also be seen in the rise of energy prices.

It could be just a question of time before silver catches up to gold's luster. Notice the leading indicator on the chart above; it's telling us momentum could be picking up steam...

"There's no fever like gold fever!" - Anon.

Strong Economic Data from U.S. Keeps U.S. Dollar Index Resilient

The past week was full of strong economic data. U.S. GDP came in at 3.4%, higher than expected; initial jobless claims were a tad lower than expected. Consumer spending and consumer sentiment (the real driver of the U.S. economy) were on the rise, while PCE (a preferred gauge by the Fed when measuring inflation) held at 2.5%, within expectations but higher than last month.

On Monday, the Manufacturing PMI Index for March came in at 50.3, a reading that is not only much higher than expected but also shows that U.S. manufacturing is expanding for the first time since November 2022. This is bullish for copper and base metals overall, as demand for commodities could continue to rise, keeping prices higher.

The news is bullish for the U.S. dollar too. The U.S. dollar index is on the brink of breaking out above its resistance at 105, even though it has already broken a key downtrend since October 2023. Moreover, as you'll see on the dollar chart, the leading indicator is bullish and on the rise.

Can it rise together with gold? Or will the dollar resist below 105 and continue to downtrend?

Gold and the dollar do not usually move together. However, at times, they may, particularly when both are sought as safe havens during extreme uncertainty or

KEY PRICES			
Name/Symbol	Apr 02,24 Price	Change	Mar 26,24 Price
Gold (GCM24)	2281.80	82.60	2199.20
Silver (SIK24)	25.92	1.30	24.62
HUI (HUI)	255.05	23.27	231.78
Copper (HGK24)	4.07	0.06	4.01
Crude Oil (CLK24)	85.15	3.53	81.62

when the U.S. economy is a driver of global growth. In other words, they tend to move opposite, but at times they will move together like we're seeing now.

Quarter Review

The first quarter of the year comes to an end. It was a strong continuation Q4-2023. This first quarter we sold the excess exposure with handsome profits built into our positions in resources, energy, and emerging markets and invested in precious metals. The best purchases were in Jan 2024 and make up most of the active portfolio are: silver rising a +14% since Jan, as well as: AGI (+20%), HMY (+54%), HL (+20%), TTE (+14%), YPF (+24%) and VZLA (+23% since March). We sold partial positions in NexGen Energy (NXE), (+33%) Ivanhoe Mines (IVN.TO) (+27%), Uranium Royalty (URC.TO) (+11%) and India iShares 50 ETF (INDY) (+13%).

CHART INDEX

Precious Metals	5

Resources & Energy	
Industrial Metal Cos	8
Big Oil	10
Uranium Cos	11
Emerging Markets	11
Other	12
Trader Sheet	13

Our strategy is paying off, gold and the miners kicked off a new bullish cycle that could last the rest of the year. Our precious metals portfolio alone is up 18% (36% annualized) over the past two quarters (and the 'C' rise is just getting started).

Our total portfolio ended the first quarter of the year up +8% (+32% annualized). As you'll see below, I'm selling NLY today for nearly break even. By tomorrow our cash exposure will be 9% of the total portfolio. I'll keep cash earning interest in a money market account earning overnight interest, waiting for dips and weakness to buy more. I will take advantage of strength to shuffle out our weaker positions too.

OPEN POSITIONS

PRECIOUS METALS: Picking up steam! The entire precious metals arena took a bullish turn this past week as the miners are now breaking out above critical resistance levels as shown above. We're keeping a close eye on silver's resistance near \$26.50.

Gold Price

- Bullish! Rose to a new high! Gold is now confirming the bullish flag pattern we identified recently. The upside target remains between \$2350-\$2400.
- Gold has bullish support above the Feb uptrend near \$2150. Deeper support remains near \$2000.
- Leading indicator in bullish territory, breaking back above the red line, suggesting momentum will continue to pick up steam.
- We have a full position. Hold.

Silver Price

- Looks very strong above the Feb uptrend near \$23.75. Has deeper support at \$22. Silver must break above \$26.50 to show renewed strength.
- A break above \$26.50 could push silver to its longer term, more relevant resistance at \$30. A break above this level would be very bullish and could kick start silver's path to \$50.
- Leading indicator remains bullish, holding at the zero line.
- Overweight. Hold.

GOLD MINERS: Gold miners are even hotter than gold. They've been on the rise, showing awesome upside potential.

Agnico Eagle Mines (AEM)

- Bullish rise to the top side of the Feb upchannel. AEM remains very strong above the Feb uptrend near \$56.
- AEM is surpassing our first profit target. This means the rise could stall for a bit with a possible dip below \$60 to test the Feb uptrend. However, do not sell. Rather, consider buying more during the pull back.

- Leading indicator breaking above red line is very bullish.
- Overweight. Hold.

Alamos Gold Inc (AGI)

- Broke above bullish pattern showing impressive strength. AGI is now approaching the top side of the Dec 2022 upchannel near \$15.50.

- AGI remains very strong above \$14 with deeper support at \$12.50 and \$11.50.

- Leading indicator is bullish, breaking above the red line; momentum steaming.

- Overweight. Hold.

B2 Gold Corp (BTG)

- BTG must break above \$3 to show a clear reversal from yearlong weakness.
- Leading indicator could be turning bullish.

- We have a full position. Hold for now. Waiting for bounce up to mature to unload.

Franco Nevada Corp (FNV)

- Breaking above the Oct 2023 downtrend near \$120 showing a bullish trend reversal. If FNV now stays above the bullish Feb uptrend near \$115, it could rise to the Oct 2023 highs near \$140, or higher.
- Leading indicator is bullish above an uptrend since Nov, breaking above the red line.
- Overweight. Hold.

Harmony Gold Mining (HMY)

- Bullish! Rose to a new high, consolidating its move above \$8, showing increased upside potential.
- Has bullish support at \$8 with deeper support near \$6.
- Leading indicator is bottoming above zero.
- We have a full position. Hold.

Hecla Mining (HL)

- Bullish rise to new high for the move. Remains very strong above the Feb uptrend near \$4.50. However, it must rise above \$5 to show renewed strength.
- Leading indicator is breaking above the red line, showing momentum heating up further.
- We have a full position. Hold.

WHEATON PRECIOUS METALS CORP. (WPM)

04/02/24 CLOSE = 49.18

Wheaton Precious Metals Corp (WPM)

- Bullish rise to a new high for the move. Must now break above the Apr 2023 downtrend & resistance near \$50 to show renewed strength and the start of a new leg up rise.
- WPM has bullish support at the Feb uptrend near \$47.
- Leading indicator is on the rise, breaking above the red line, showing momentum could get hotter.
- Overweight. Hold.

VIZSLA SILVER CORP. (VZLA)

04/02/24 CLOSE = 1.41

Vizsla Silver Corp (VZLA)

- Bullish rise to a new high for the move. VZLA looks solid above the Nov uptrend near \$1.10 and it could now reach the recent peak near \$1.70.
- Leading indicator is bullish, breaking above the red line while being above zero.
- Overweight. Hold.

COPPER MAY 2024 (HGK24)

04/02/24 CLOSE = 4.0705

RESOURCES & ENERGY: Holding Strong Overall.

INDUSTRIAL METALS: Copper is reaching a new high for the move as it bounces up from the Feb uptrend & support. It's strong above \$4 with lots of upside potential. Consider stronger copper and base metals remain likely given resilient construction and economic activity in the U.S.

BHP GROUP LIMITED (BHP)

04/02/24 CLOSE = 59.17

**BHP Group (BHP)**

- Breaking above the Dec downtrend, confirming support at the lower levels near \$54.50 and opening the door to a rebound rise.
- Leading indicator is bullish above zero and the red line. It could now pick up steam.
- Overweight. Hold. Waiting for a stronger bounce to unload.

Cleveland Cliffs (CLF)**CLEVELAND-CLIFFS INC. (CLF)**

04/02/24 CLOSE = 22.38

- Bullish rise to the Mar 2023 highs near \$23. Must now break above this level to show further strength and a continued upmove, to possibly the top side of the Sept upchannel near \$24, initially. Consider the Mar 2022 peak being the next intermediate target is at \$32.
- Consider CLF remains bullish above \$20, the Sept uptrend. A break below would reverse the current up move.
- Leading indicator is bullish above zero and the red line.
- We have a full position. Hold.

FREEPORT-MCMORAN INC. (FCX)

04/02/24 CLOSE = 48.38

**Freeport McMoran Inc (FCX)**

- Breaking well above the Jan 2023 peak at \$46 showing impressive strength. Could now rise further, to the Mar 2022 peak near \$52.
- Leading indicator continues to trend up, bullish above the zero line.
- We have a full position. Hold.

IVANHOE MINES LTD. (IVN.TO)**04/02/24 CLOSE = 16.25****Ivanhoe Mines (IVN.TO)**

- Bullish rise to a new high! Remains very strong above the Nov uptrend near \$15. Could now rise to the top side of the Nov upchannel near \$17, initially.
- Leading indicator remains bullish above zero, could be resuming its bullish rise up.
- We have a full position. Hold.

LIGHT CRUDE OIL MAY 2024 (CLK24)**04/02/24 CLOSE = 85.15**

BIG OIL: Continues to rise with strength! Crude oil reached a new high for the move, suggesting the rise could extend to its next support area near \$90. The up move is invigorating big oil companies. More upside is now likely.

EXXON MOBIL CORPORATION (XOM)**04/02/24 CLOSE = 119.28****Exxon Mobil Corp (XOM)**

- Bullish rise to yet another new high for the move. It's fast approaching the Sept 2023 high near \$120. A break above this level, and it's off to the races!
- XOM has strong ST support at \$115. Bullish support is at \$110, but if broken, a bearish reversal would ensue.
- Leading indicator is bullish above zero, but with some pressure ST below the red line.
- Overweight. Hold.

TOTALENERGIES SE (TTE)**04/02/24 CLOSE = 71.7****Totalenergies SE (TTE)**

- Break out to new highs, above \$70! TTE may now rise further as long as it holds above bullish support at \$65.
- Leading indicator bottoming above zero, suggesting momentum could pick up steam.
- We have a full position. Hold.

URANIUM CO: Starting to show signs of strength, momentum developing.

URANIUM ROYALTY CORP. (URC.TO)**04/02/24 CLOSE = 3.46****Uranium Royalty Corp (URC.TO)**

- Breaking above a bullish downside wedge with upside target near CA\$4. This means, a rise to the CA\$4 initially is likely. A break above \$4 and it's off to the races.
- The recent break out is also confirming support above the Jan lows near \$3.20.
- Leading indicator is on the rise.
- Overweight. Hold.

EMERGING MARKETS: Latin America and India remain among the strongest.

YPF SOCIEDAD ANÓNIMA (YPF)**04/02/24 CLOSE = 19.91****YPF S.A. (YPF)**

- The Argentine energy company has been on a bullish uptrend. It's now pulling back below \$20 but holding strong above bullish support near \$19.
- Consider YPF has stronger support at the mid-channel line near \$15 and deeper support at the Aug 2022 uptrend near \$12.
- Leading indicator is bullish above zero.
- We have a full position. Buy some at mkt, ideally near lower \$19s.

OTHER

Annaly Capital Management (NLY)

- Failed to surpass the September 2023 downtrend at \$20.50 showing weakness. It's now breaking below the October uptrend, suggesting more downside is likely.
- Holding a full position. Sell at mkt for a 3% loss; consider we gained +6% on yield alone for a grand total of +3%.
- I never include dividends received on performance, but the original purpose of this trade was NLY's handsome dividend yield. NLY's downside risk is not worthwhile. Stay out.

Good luck and good trading,

Omar Ayales

Trading Strategy

GCRU Trading is all about achieving profits by trading stocks, commodities, and bonds. We have a diversified approach using companies with great fundamentals offering great value compared to the broader market. Trades are driven mainly by technical analysis, but stocks are picked based on their fundamentals, momentum, and their overall strength in their sector. All recommended companies are great assets, and even though we trade short and intermediate trends, they are worthwhile keeping longer term if you're building a longer-term portfolio.

We also believe in an approach that allows us to average in and average out. This is important because averaging in near a low, and averaging out near a peak gives us great profit advantages.

Our portfolio is designed for you to follow it down to the penny, but you can also use it as a reference or guide. Or you can just use the individual trades we're constantly coming up with.

The track record we keep considers all the trades executed. It doesn't consider performance on cash, dividends nor does it contemplate associated fees or expenses.

For trading purposes, we consider a full position to be one that is 4% of our total portfolio. We tend to buy partial positions (consisting of 2% of total portfolio) and at any given moment we could be overweight, meaning owning more than a full position.

On the trader sheets found in the final pages of each issue, you'll see a reference to our positioning, be it overweight, full, reduced, or small. I also include next to each portfolio section, the percentage allocated to that sub portfolio.

Transparency, communication, and discipline are keys to successful trading. If you have any questions or concerns, please feel free to email me at oayales@adenforecast.com.

Quoting *GCRU* is permitted provided *GCRU* name, website address & subscription price are given.

All charts in *GCRU* are daily prices.

Subscribers can obtain free online chart updates for all gold shares in *GCRU* via: www.bigcharts.com. To view Canadian stks please use CA as prefix (i.e., to view Agni Eagle (Toronto) you must use CA: AEM).

Note: U should NOT feel our recommended prices are set in concrete. If mkts suddenly feel hot or cold to U, or dramatic news occurs, U can buy or sell, or stop at slightly higher or slightly lower prices. It also hinges on your experience level. Some people can use our prices as guides & know when they can take bigger risks.

Spinner: Spinner is an in-house momentum indicator (not always shown on charts). Momentum indicators use the rate of change in price to determine predominant energy flows. Spinner trading signals are generated when the faster timing line crosses above or below the slower confirming line. Upside crosses in the lower range of positive territory offer the most reliable signals for longs; downside crosses in the top range of negative territory for shorts. Avoid trading against the timing line, i.e., buying/selling if the timing line is in corrective mode (against direction of trade) unless the confirming line is positioning for a new 'confirming cycle'. It's important to always be aware of location, direction & cycling phase of the confirming line. Spinner signals are more effective in trending mkts than in trading ranges where indicators such as Stochastic & Williams %R should be used.
