JULY 6, 2017

IN ITS 16TH YEAR- N° 745

GETTING CLOSER

Seasonality kicked in as gold broke below its Dec 2016 uptrend dropping over \$20 on Monday in light trading. Gold is now holding at its 23 mo MA, but it's still looking vulnerable for more downside.

The entire gold universe took a dive. Silver dipped below \$16 and tested its Dec lows, while gold shares reached their Mar/May lows near 180. On the brighter side, the A/D Line continues to hold above its own uptrend since Dec 2016 reflecting gold's backbone strength.

And although many were surprised, we've been patiently waiting for lower lows to add to our positions. And that we did! We bought more gold, silver and AEM this week as we continue to accumulate during weakness.

Bottom line: The B decline finally hit a higher gear and you could see more downside pressure ST. But the good news is the decline is getting closer to a bottom.

'B' DECLINE WRATH NEARLY OVER

"We used to have a very, very solid country because it was based on a gold standard"
-Donald Trump -

Gold has now declined 6% since the 'B' decline started about 11 weeks ago. Keep in mind an average decline for 'B' declines range anywhere from 6% to 11%.

This is why we're showing gold's ABCD as our **chart of the week** on page 1. It's a closer up version than what we showed a couple of weeks ago. The chart starts near gold's bottom in Dec 2015. Coincidentally, that was gold's last 'B' decline. At that moment, the 'B' decline overshot the 'D' decline, which was unusual but it marked a key reversal low for gold.

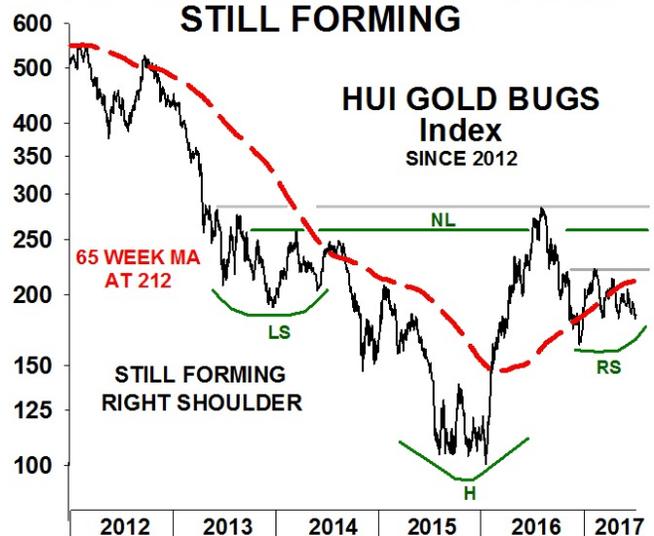

The decline was followed by a strong and bullish 'C' rise to \$1380 during 2016. Gold peaked at the height of Brexit concerns and coincidentally, right at a 3-year high resistance near \$1380. Gold then declined in normal 'D' decline fashion until it reached the Dec 2016 lows.

From then on the 'A' rise in gold developed this year in a decent rise and now so far the 'B' decline has been within reason. The As and Bs tend to be a consolidation pattern following a strong 'C' rise.

Notice gold's leading MT indicator on the chart is now falling and finally picking up steam as it nears an oversold level. This means the 'B' decline is nearing maturity.

It seems as if the indicator is telling us gold's downside is limited to the \$1190-\$1200 level. That also means gold could possibly fall another \$20-\$30 and still remain within a bullish uptrend cycle since Dec 2015.

GOLD SHARES: MAJOR BOTTOM STILL FORMING

BLOW UP OF RIGHT SHOULDER (RS)

If gold declines to that level, we recommend adding to your positions once again. But don't be surprised if gold holds near current levels.

Gold shares and silver also continued to decline. Silver reached the Dec lows while HUI is holding at the Mar/May lows as their bottoming process continues. Both levels reached have been near our 'B' decline targets.

This doesn't mean silver and gold shares can't fall further. Actually, as we approach this bottom area, it's not unusual to see volatility spike up. Rises and declines become more pronounced as the bottoms set in.

This is why we've adjusted our stop in silver. We've been waiting for these lows for a while now and don't want to get whipped out and miss the long awaited 'C' rise. Most of our positions are near the low area and are poised to perform and deliver handsome profits by the time the rise we call 'C' starts, develops and matures.

The **chart above** on page 2 shows HUI continues to form a massive H&S bottom. A very bullish pattern no doubt. And one that normally occurs during a bottoming process. Notice the right shoulder continues to form with a neckline resistance and breakout level at 250.

The lower chart shows a blow up of the right shoulder and it tells us if HUI and gold shares still decline further to the Dec 2016 lows, they'd continue to form the right shoulder of the bullish pattern.

To complete the pattern, HUI must rise above 250 on a 2dc. The pattern's target is at the 350-400 level.

Also consider we've passed the worst months for gold and are about to embark on a seasonally bullish time for gold. One that could coincide with gold's 'C' rise. And with geopolitical tensions brewing in North

Korea and China, a rise almost seems imminent.

On the other hand, the dollar and the 10 year yield have been rebounding. They're both coming out of extreme oversold levels and may still have room to rise. However, they have heavy resistance levels coming up and it's to be seen if the dollar or the 10YY rise with enough strength to overcome them.

Bullish Dow Theory Confirmation!

The Industrials and Transport Averages rose to new highs this past week triggering a bullish Dow Theory confirmation! The Transports had been lagging, then resisting. But this week it broke to new ground, confirming the stock market remains bullish and poised for more upside.

We sold half of our DIAs into strength, securing a 5% gain. We continue to keep the rest of our position and wait for the renewed bull market confirmation to develop. We've also raised our protective stops.

It's no coincidence that Dr. copper has been rising. It started a few weeks ago and just this week, it broke above a downtrend showing ST strength. It has, however, reached a stronger resistance level since but it has struggled to surpass it. As long as copper stays above \$2.45, it'll remain bullish and positioned for more upside.

But not only copper turned up the heat. Crude oil is also rising feverishly from the lows. It broke above a bullish downside wedge pattern with upside target near the

\$50 area. Although yesterday crude gave back some of its gains, it remains strong within its rebound and bound to reach our first profit target. We've lowered our first profit target and recommend selling half when it is reached.

Our strategy of the week is to keep a close eye on gold. If you didn't buy near \$1225, buy some at mkt. Buy more if gold declines to the \$1200 level. Add some silver to your positions below \$16 if you don't have a full position. Continue accumulating gold shares selectively. Don't rush, we still have some time before the 'B' decline fully develops.

Good luck and good trading,

Omar Ayales

CHART SECTION

GOLD AUGUST 2017 (GCQ17) 7/05/2017

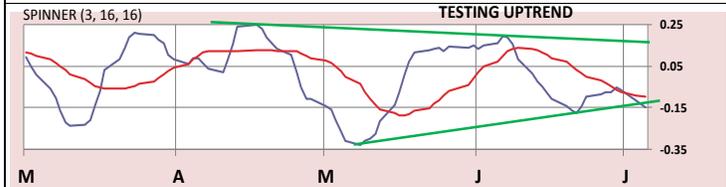

CLOSE = 1221.7

Long	1170 (Jan-5-17), 1220 (Mar-16-17). Sold half at 1287 for an average 8% gain. 1225 (Jul-3-17).
Stop	2dc below 1200.
Profit Targets	1380 & 1450.
Recom	Keep your positions. Buy again near 1200.

SPROTT PHYSICAL GOLD TRUST (PHYS) 7/05/2017

CLOSE = 9.98

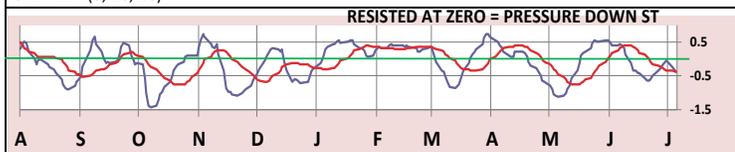

Long:	9.63 (Jan-5-17), 10.12 (Mar-16-17). Sold half at 10.54 for an average gain of 7%. 9.98 (Jul-3-17).
Stops	2dc below 9.80.
Profit Targets	11.50 & 12
Recom	Keep your positions. Buy again near 9.80.

Gold lost its first key support earlier this week on light trading. Gold broke below 1240 and reached our re-entry level near 1225 allowing us to pick up some more gold after patiently waiting. Although gold is now holding at its 23 mo MA (1222), more downside remains likely as our indicators are showing the 'B' decline is not over yet. Remember gold has key bull market support at the 1190 to 1200 level where the Dec 2015 uptrend and the Mar lows are converging. Spinner resisted below the zero-line confirming weakness but it also remains on an uptrend since May telling us momentum continues to creep upward. Gold will start showing signs of a bottom if (1) it holds above a key support level such as 1190-1200 level, and (2) it rises above the Jun downtrend on a 2dc above 1245. To show renewed strength, gold must rise above its double 'A' peak at 1300. We've been patiently waiting for this moment. Be ready to buy more at gold's next support level. Gold's bottom is now in sight...

SILVER SEPTEMBER 2017 (SIU17) 7/05/2017
CLOSE= 15.896

SPINNER (3, 16, 16)

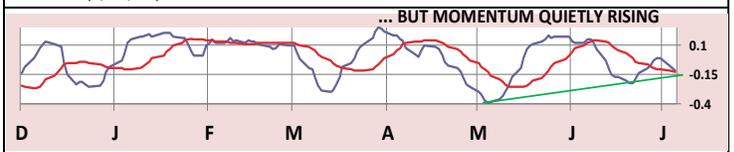

Long	17.35 (Mar-16-17), 17 (May-1-17), 16.35 (May-4-17), 17 (Jun-12-17), 16.30 (Jun-26-17), 16.15 (Jul-3-17).
Stop	2dc below 15.85 (adj).
Profit Targets	19.25 & 20.50
New Recom	Keep your positions. Adjust your stops.

SPROTT PHYSICAL SILVER TRUST (PSLV) 7/05/2017
CLOSE= 6.11

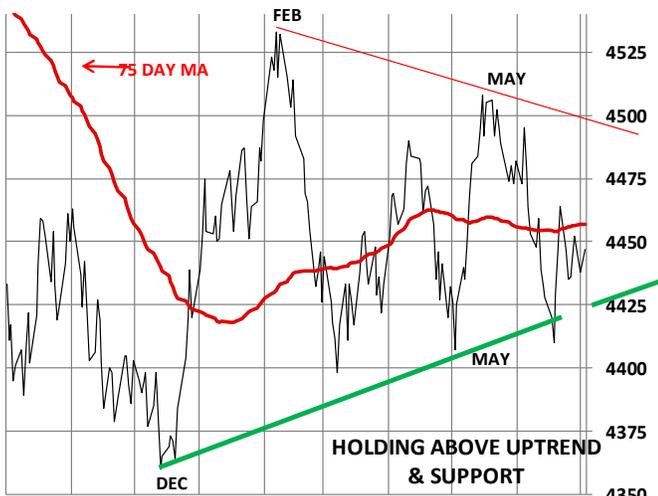

SPINNER (3, 16, 16)

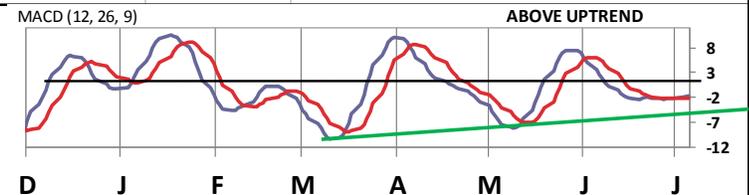

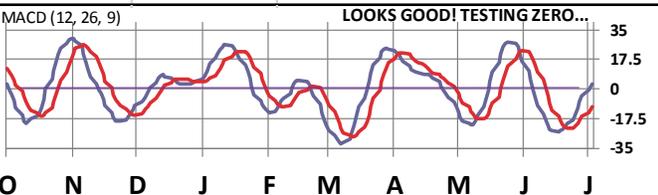

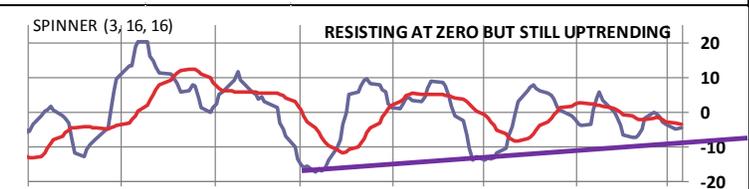

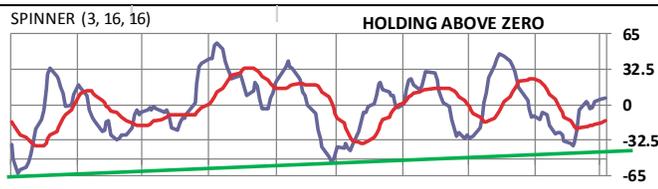

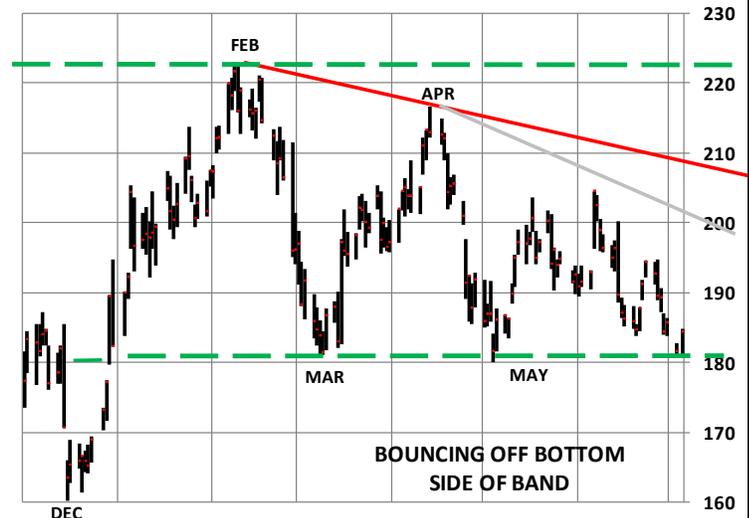

Long	6.60 (Mar-16-17), 6.40 (May-1-17), 6.20 (May-4-17), 6.55 (Jun-11-17), 6.23 (Jun-21-17), 6.15 (Jul-3-17).
Stop	2dc below 6 (adj).
Profit Targets	7.20 & 7.90
New Recom	Keep your positions. Adjust your stops.

Silver edged lower after gold's decline. It broke an uptrend since Dec allowing us to pick up more. Silver is now testing the Dec low and support level at 15.85. Spinner clearly showing ST weakness as it resists at the zero line. Keep in mind, however, the bottoming process continues and if silver holds near the Dec lows, it'll show strength that could push silver higher. On the upside, silver must rise above 17.75, the Aug downtrend, to show renewed signs of strength. We lowered our stop loss to the Dec lows at 15.85. Although we're near the lows, we could see some volatility at these levels as Silver consolidates its decline. We don't want you to get stopped out. Allow for some leeway. If you're not in the silver trade, buy below 16.

**ADEN GOLD STOCKS ADV/DECLINE 7/05/2017
CLOSE = 4447**

HUI GOLD BUGS INDEX (HUI) 7/05/2017 CLOSE= 184.26

HUI took a dive after gold dipped on Monday... It's bouncing off a solid support level at the Mar/May lows near 180. Interestingly, the A/D Line continues to hold above the Dec uptrend despite showing weakness below its 75-day MA. Moreover, Spinners for both HUI and the A/D Line remain up trending, showing momentum continues to creep upward. Spinner for the A/D Line especially is holding above zero showing signs of strength. This tells us the bottoming process continues and the lows are near. The decline has allowed us to pick up more gold shares too. On the downside, if HUI breaks below the 180 level on a 2dc, we could see HUI decline to the Dec lows on a worst-case scenario. If you do not have full positions in gold shares, we recommend taking advantage of weakness to buy. Be patient. Let weakness play out. The bottom is in sight. Patience will be rewarded.

MKT VECTORS JR. GOLD MINERS (GDXJ) 7/05/2017 CLOSE= 32.55

Junior Gold Miners ETF (GDXJ) - NYSEArca

Long at:	37.30 (Mar-16-17), 35.75 (Apr-17-17), 31.90 (Apr-25-17), 29.70 (May-4-17).
Stop:	2 dc below 28.
Profit target:	38 & 50.
New Recom:	Keep your positions. If not in, buy below 31.

Junior gold miners continue to fare better than seniors. Although the Juniors declined together with the entire gold universe on Monday's light trading session, they're showing strength by holding above key support. Spinner has been flat and neutral, not providing direction for momentum. In the meantime, GDXJ's trading range is narrowing. A break above the Aug downtrend on a dc above 35 could propel GDXJ to the Feb highs near 43. Conversely, a break below the Dec uptrend on a 2dc below 30 could push GDXJ to the Dec lows near 28. We recommend allowing for weakness to play out and buy on weakness if you're not yet in with a full position.

Agnico Eagle Mines Limited (AEM) 7/05/2017 CLOSE= 44.23

Agnico Eagle Mines Limited (AEM) -NYSEArca

Long:	42.50 (Mar-16-17). Sold half at 46.05 for an 8% gain. 44.75 (Jun-29-17).
Stop:	2dc below 40.
Profit Target:	60
New Recom:	Keep your positions. If not in with a full position buy again below 43.

AEM broke below both an uptrend since Dec and a bullish ascending triangle exposing some weakness as a sideways consolidation band emerges. The break below the Dec uptrend tells us the bottoming process continues and continued weakness is likely before AEM resumes its bullish upward path. AEM must break above the Feb/May highs on a 2dc above 50 to show renewed strength that could push AEM to the Aug highs. The decline also allowed us to pick up more AEM at these lower levels. If you didn't buy, take advantage of continued weakness to add to your position.

Wheaton Precious Metals Corp Co (WPM) 7/05/2017 CLOSE= 19.44

BOUNCED UP FROM UPTREND & SUPPORT

Wheaton Precious Metals (WPM)

Long at:	19.80 (Mar-17-17). Sold half at 21.65 for a 9% gain. 18.90 (May-4-17), 19.50 (Jun-14-17), 19 (Jun-15-17)
Stop:	2dc below 18.50
Profit Target	23 & 28.
New Recom:	Keep your positions. Sell half at first target.

WPM gave back its recent gains showing signs of continued weakness as it failed to rise above a key resistance level. However, today's bounce up after testing the Dec uptrend, shows support at the Mar low and that Dec uptrend is strong. Spinner above zero telling us momentum continues to rise. To show renewed strength, WPM must now rise above the May downtrend on a 2dc above 20 and follow up with a rise above the Feb downtrend at 21.50. Keep your positions.

B2Gold Corp. (BTG) 7/05/2017 CLOSE= 2.8

B2Gold Corp. (BTG) -NYSE MKT

Long at:	2.45 (May-25-17).
Stop:	2dc below 2.30
Profit target:	3 & 3.30
New Recom:	Keep your positions. Sell half at first profit target.

BTG continues to impress. It's holding above its bullish May uptrend even after gold's harsh decline on Monday. Spinner is losing steam but with a neutral tone. If BTG holds at the May uptrend near 2.75, it'll show impressive strength. Keep in mind however, if BTG breaks below the uptrend, its rock-solid support remains at the Dec uptrend near 2.20. Keep your position and be ready to sell half at our first profit target.

McEwen Mining Inc. (M U X) 7/05/2017 CLOSE= 2.56

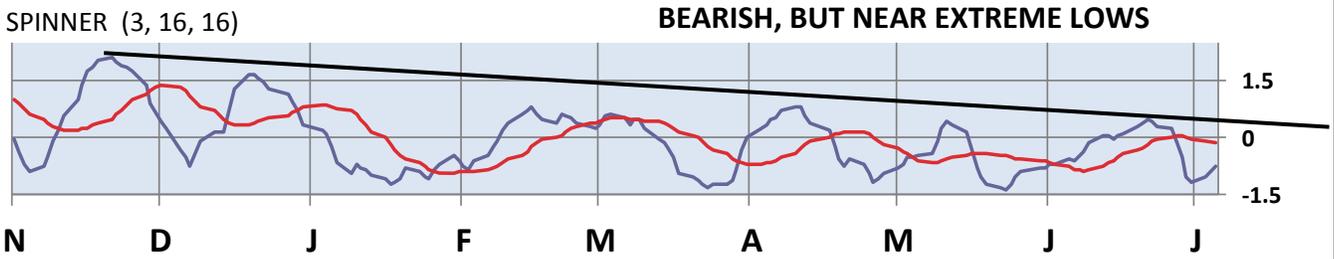

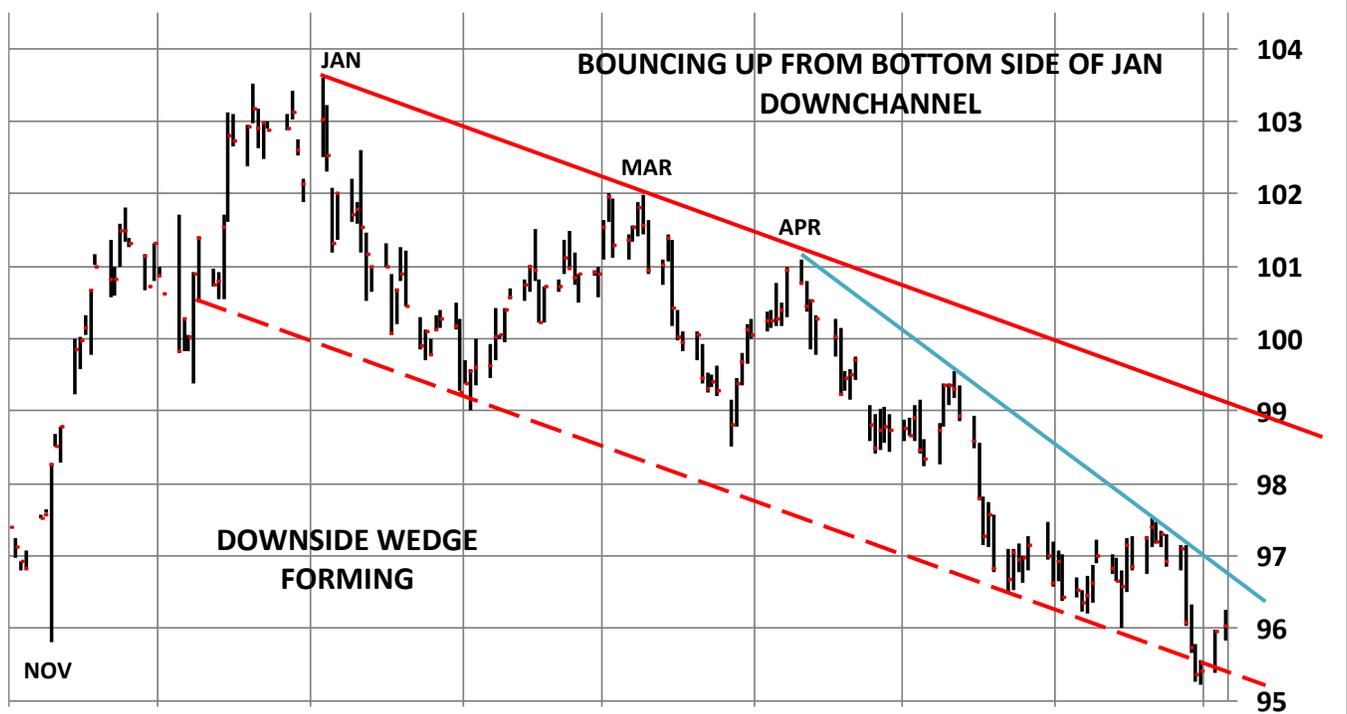

McEwen Mining Inc. (MUX) - NYSE

Long at:	2.72 (May-25-17), 2.50 (May 31-17), 2.50 (Jun 5 -17), 2.62 (Jun-9-17).
Stop:	2dc below 2.35
Profit target:	3.50 & 4
New Recom:	Keep your position. Sell half at first profit target.

MUX continues to consolidate above a key support level while Spinner rises, showing strength. MUX also continues to form a downside wedge with upside target near 4. A break above 2.65 on a 2dc would confirm the bullish pattern which will trigger MUX's rise. On the downside, if the support level is broken to the downside, we could see a decline to the 52 wk lows near 2.35, our stop. Keep your positions for now.

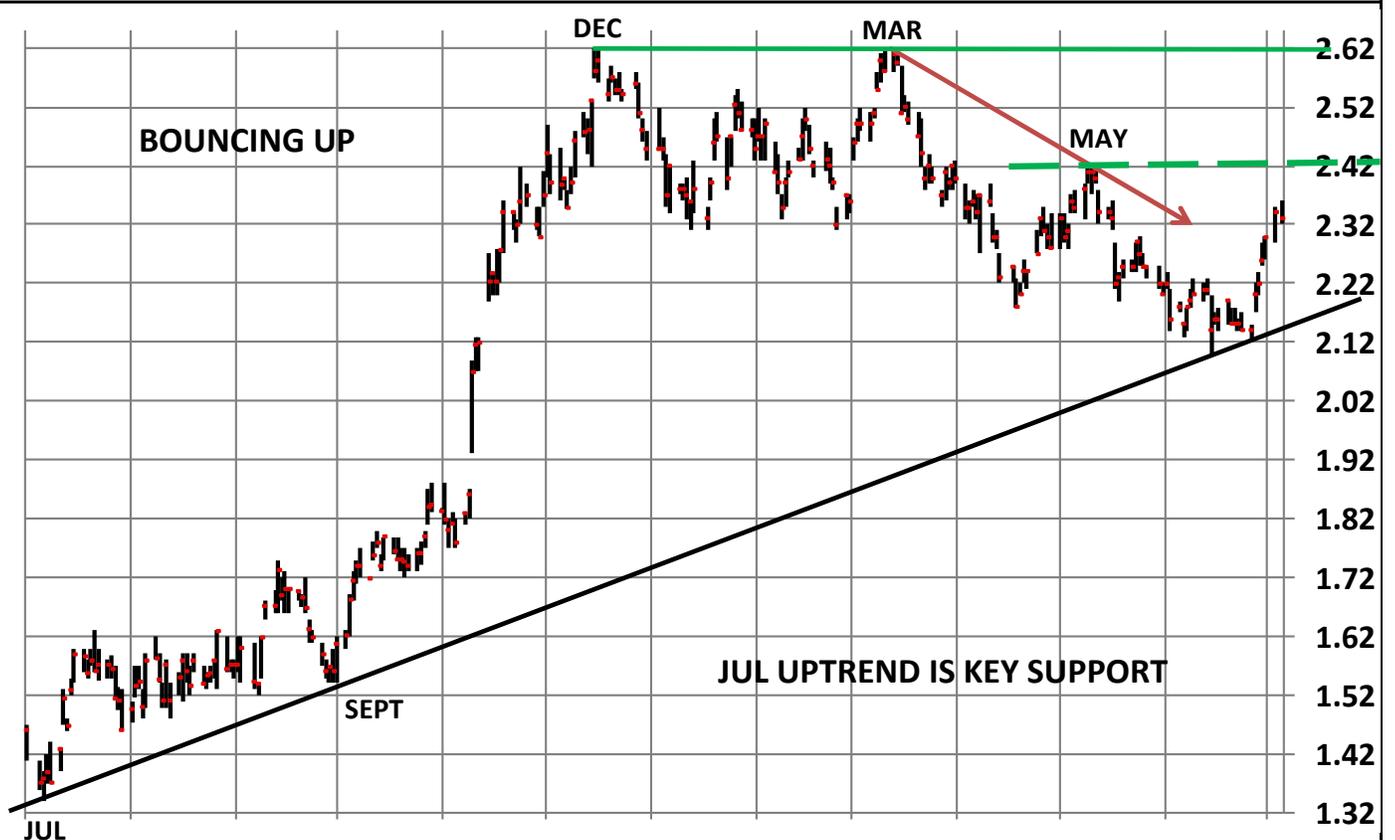

U.S. DOLLAR INDEX SEPTEMBER 2017 (DXU17) 7/05/2017
CLOSE= 96.059

Bull Call Spread	Sept 2017 99/102 @ \$400 (May-31-17).
Recom	Keep your position. Sell on a rise to 99.

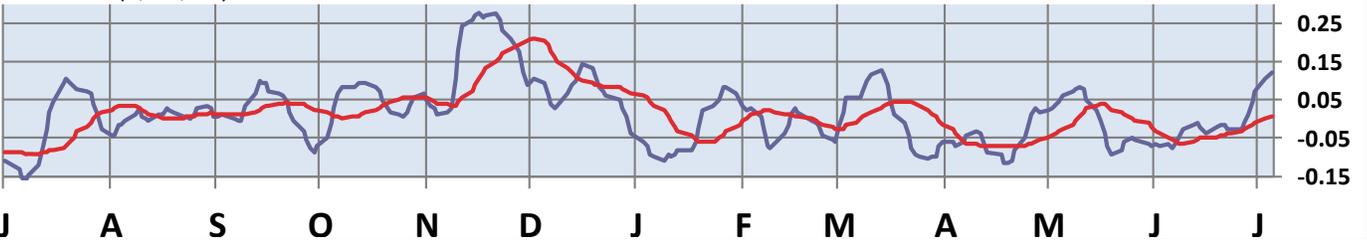

Dead Cat Bounce? The dollar continued to decline after breaking below a soft support level at 96.50. The dollar is now rebounding after reaching the bottom side of the Jan downchannel at the lower 95 level while Spinner starts to form a bottom at an extreme oversold level. This tells us the dollar is poised to rebound to the Apr downtrend near 96.50. A break above this resistance would propel the dollar to the Jan downtrend near 99, our profit target. Overall the dollar remains technically bearish and the rebound rise is looking like a dead cat bounce more than anything. Keep your bull call spread and take advantage of strength on the rebound to sell.

CBOE Interest Rate 10 Year T No (^TNX) 7/05/2017 CLOSE= 2.33

SPINNER (3, 16, 16)

ON THE RISE - JUMPING UP!

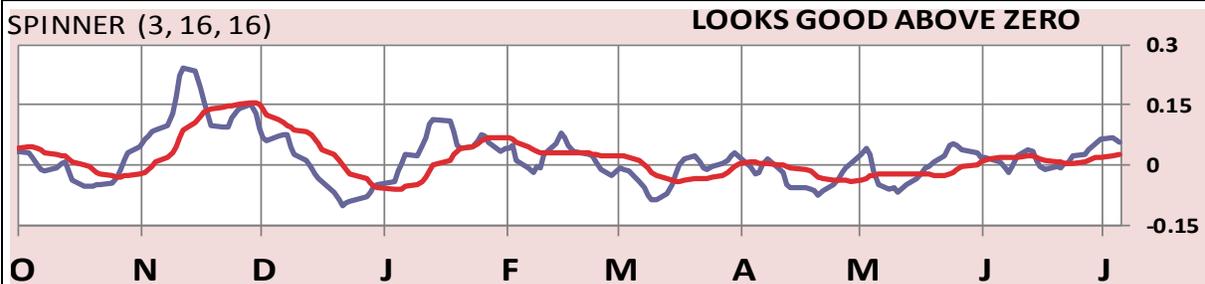

CBOE Interest Rate 10 Year T No (^TNX) - Chicago

New Recom: **Stay out**

The 10YY held at its 2016 uptrend at 2.12 showing support as Spinner rose above the zero line. The 10YY has confirmed strength by rising above the Mar downtrend and it's reaching the May high and resistance level near 2.42%. A break above this level would bolster yields and a rise to the Dec/Mar highs near 2.62 would then be likely. Keep in mind, however, if yields fail to rise above the May highs, a decline to re-test the 2016 uptrend would then be likely. Rising yields seem to be outpacing inflation which is hurting gold. It's yet to be seen how much further could rates rise as opposed to inflation expectations. Stay out for now.

COPPER SEPTEMBER 2017 (HGU17) 7/05/2017

CLOSE= 2.66

New Recom **Stay out for now.**

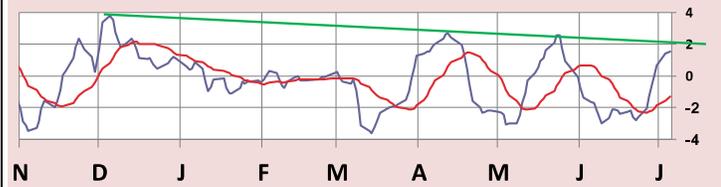

Copper rose to nearly the topside of an 8 mo long sideways band, while Spinner turned bullish showing rising momentum ST. Copper will remain technically bullish with upside potential by staying above the Oct uptrend near \$2.57. If copper holds above the uptrend and breaks out of the top side of the band, it'll confirm strength within its cyclical bull market rise that started in 2016. However, strong resistance at these highs is pushing copper lower. If it fails to break above resistance, it'll likely decline to test the Oct uptrend, and if broken, then copper's stronger support level at \$2.45 could be tested. Dr. Copper is telling us global demand remains resilient and rising. A sign that inflation could pick up in the months ahead.

**LIGHT CRUDE OIL AUGUST 2017 (CLQ17) 7/05/2017
CLOSE= 45.13**

SPINNER (3, 16, 16)

BULLISH ABOVE ZERO... TESTING RESISTANCE

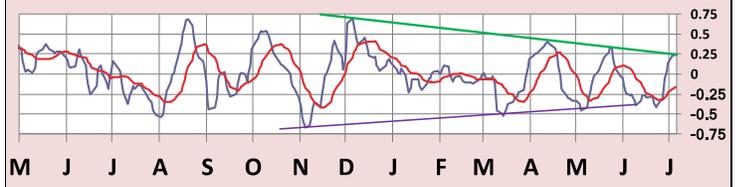

Long;	45.90 (May 4, 2017). Sold half at 51.55 for a 12% gain. 42.75 (Jun-21-17).
Stops	2dc below 41.50.
Profit Targets	50 (adj) & 55
New Recom:	Keep your position. If not in, buy below 43.

**POWERSHARES DB Oil ETF (DBO) 7/05/2017
CLOSE= 7.88**

SPINNER (3, 16, 16)

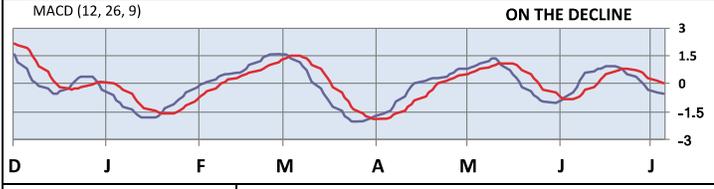

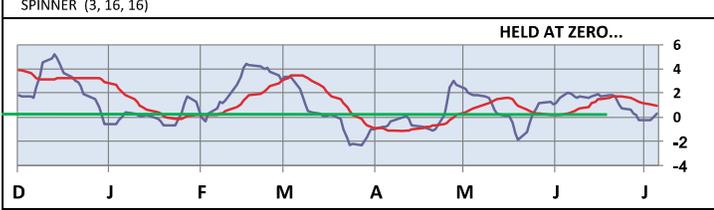

TESTING KEY RESISTANCE

Long	8.05 (May 4, 2017). 7.47 (Jun-21-17).
Stops	2dc below 7.25.
Profit Targets	8.50 (adj) & 9.50
New Recom:	Keep your positions. If not in, buy some below 7.50.

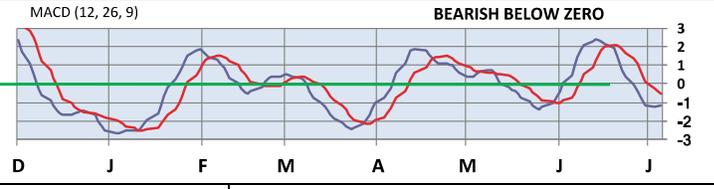

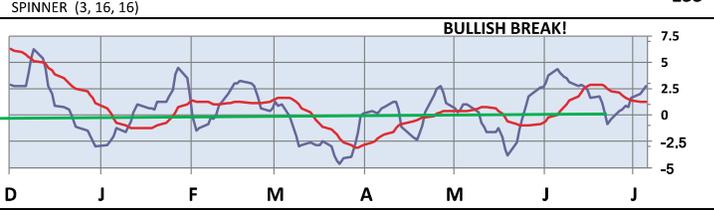

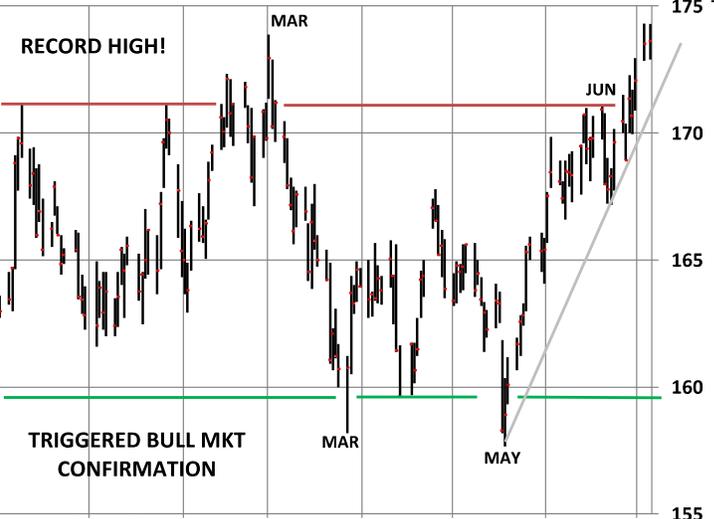

Crude broke above the downside wedge (with an upside target at 50) showing impressive strength! Spinner broke above zero confirming strength. However, Spinner is also reaching a downtrend of its own telling us crude's upside may be limited ST. Crude's rise is showing it has legs to continue rising to the wedge target. Keep your positions for now. Sell half at first (adj) profit target.

SPDR DOW JONES INDUSTRIAL (DIA) 7/05/2017
CLOSE= 214.62

Entry Level	205 (Apr-11-17). Sold half at 215 for 5% gain.
Stop	2dc below 205 (adj.)
Profit Target	215 (reached!) & 240
New Recom:	Keep your last half position. Sell at second profit target.

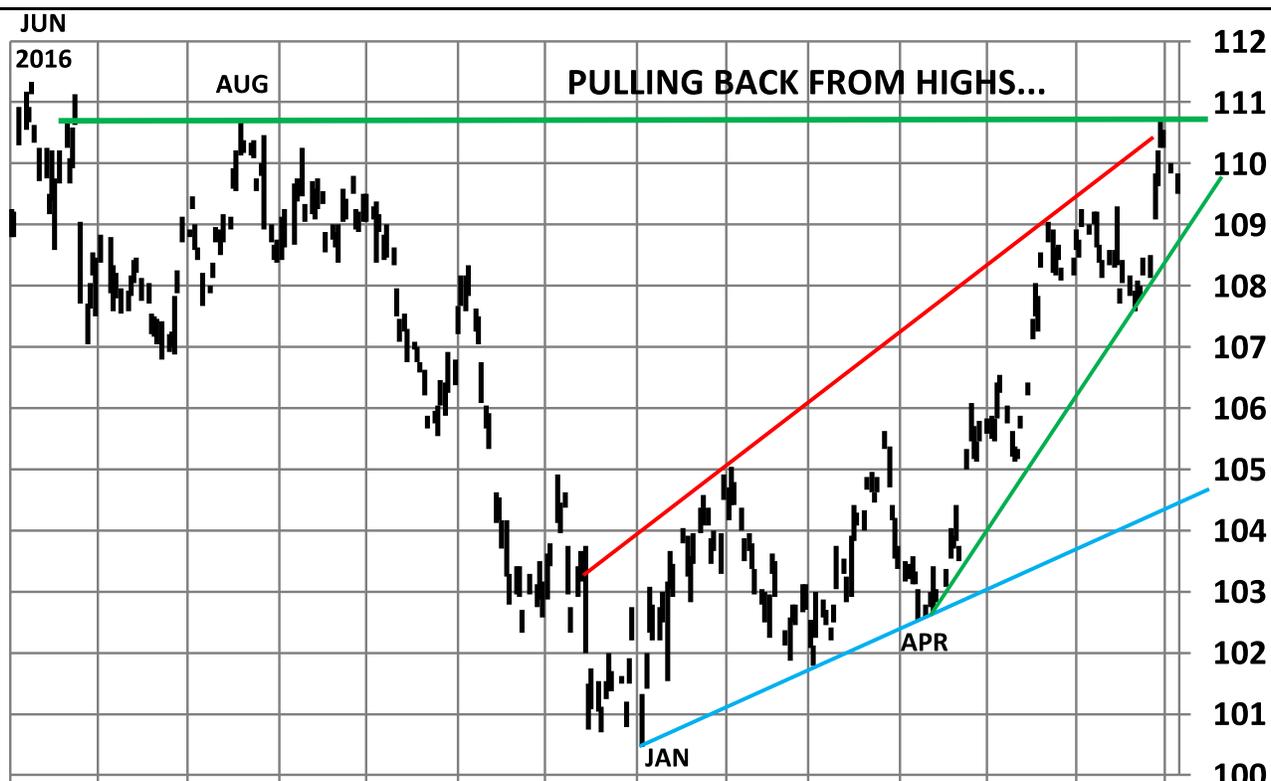

Shares Transportation Average (^IYT) 7/05/2017
CLOSE= 173.64

Entry Level	N/A
Stop	N/A
Profit Target	N/A
New Recom:	Stay out.

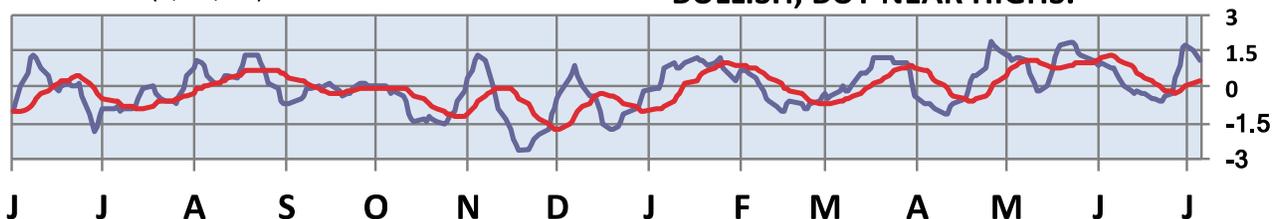

The Transportation Average finally broke to new highs triggering a Dow Theory Bull Market confirmation! This tells us stocks are poised to continue rising higher! We sold half of our position in DIA at 215 for a 5% gain. We will continue to hold the rest as the renewed bull market confirmation is pointing to more upside. Notice Spinners are bullish too. DIA's Spinner held above zero and ready for more upside. IYT's Spinner crossed its MT MA and zero line showing impressive strength. On the downside, keep an eye on the following levels: DIA: 210 and IYT: 170. A break below these levels would show signs of weakness. Keep the second half of your DIAs for now.

CurrencyShares Euro ETF (FXE) 7/05/2017 CLOSE= 109.73

SPINNER (3, 16, 16)

BULLISH, BUT NEAR HIGHS.

CurrencyShares Euro ETF (FXE) NYSEArca - Nasdaq Currency in USD

Recom:

Buy some at 107.50 and more on or near 106. Place stops at 2dc below 102. Profit targets at 125 & 150.

The euro is showing signs of weakness as it resists at the Aug 2016 highs. If FXE now confirms weakness by breaking below the Apr uptrend, a decline to the Jan uptrend near 105 would then be likely. Keep in mind, we'll likely see euro weaken as the dollar rebounds. Take advantage of upcoming euro weakness to buy.

Quoting *GCRU* is permitted provided *GCRU* name, website address & subscription price are given.

All charts in *GCRU* are daily prices.

Subscribers can obtain free online chart updates for all gold shares in *GCRU* via: www.bigcharts.com. To view Canadian stks please use CA as prefix (ie, to view Agnico Eagle (Toronto) you must use CA:AEM).

Note: U should NOT feel our recommended prices are set in concrete. If mkts suddenly feel hot or cold to U, or dramatic news occurs, U can buy or sell, or stop at slightly higher or slightly lower prices. It also hinges on your experience level. Some people can use our prices as guides & know when they can take bigger risks.

Spinner: Spinner is an in-house momentum indicator (not always shown on charts). Momentum indicators use the rate of change in price to determine predominant energy flows. Spinner trading signals are generated when the faster timing line crosses above or below the slower confirming line. Upside crosses in the lower range of positive territory offer the most reliable signals for longs; downside crosses in the top range of negative territory for shorts. Avoid trading against the timing line, ie, buying/selling if the timing line is in corrective mode (against direction of trade) unless the confirming line is positioning for a new 'confirming cycle'. It's important to always be aware of location, direction & cycling phase of the confirming line. Spinner signals are more effective in trending mkts than in trading ranges where indicators such as Stochastic & Williams %R should be used.
